DEAR SOUTH AFRICA.co.za

Draft regulations for the Exportation of Live Animals by Sea

24 July — 25 August 2025

Public participation – comments

https://dearsouthafrica.co.za/live-animal-export/

Question 1: Do you believe that animals suffer on livestock sea vessels and that animal cruelty is inherent in the live animal export process?

Question 2: Do you believe that these regulations are capable of ensuring animal welfare?

Question 3: Do you call on the South African government to prohibit this trade by banning live animal exports by sea?

DearSouthAfrica.co.za is an online platform designed to facilitate government and encourage the public to participate in unbiased decision-making processes or policy formation at SOE, municipal, provincial and national levels.

	2025-07-29 12:12:17	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As human beings on this planet the ownership is upon us to take responsibility for what happens to the animals. Animals have been reduced to commodities for cash, instead of being treated as the sentient beings they are, who feel and experience fear and pain. We are doing a piss-poor job of protecting these animals. If these countries need these animals they should then farm them themselves. All we are doing as a country is aiding perpetual cruelty. Time to permanently stop this barbaric practice.	Allison	Eastern Cape	unemployed individual
	2025-07-29 12:17:58	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Past incidents and scientific evidence have shown that animal suffering is inherent to their live exportation. Live exportation is unnecessary and cruel and should be prohibited.	Danielle	Western Cape	student
	2025-07-29 12:22:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	2 weeks on the ship of suffering & only the "healthy" ones will be slaughtered because Islamic laws dictate what is clean & lawful. Cruelty to animals is not tolerated in most countries of the world regardless of one's religion, even Islam	Marcelle	Western Cape	unemployed individual
	2025-07-29 12:23:54	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	All animals feel hunger, thirst, fear and pain. Time to eliminate this barbaric practice.	Judy	Eastern Cape	retired
	2025-07-29 12:24:05	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	All animals feel hunger, thirst, fear and pain. Time to eliminate this barbaric practice.	Judy	Eastern Cape	retired
	2025-07-29 12:30:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Livestock that are exported by ship suffer horrific injuries and trauma. It’s absolutely wicked.	Loretta		retired
	2025-07-29 12:31:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Monica	Western Cape	employed individual
	2025-07-29 12:32:23	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Charlottete	Gauteng	retired
	2025-07-29 12:45:19	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Thor		
	2025-07-29 12:46:58	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Cynthia	Mpumalanga	retired
	2025-07-29 13:07:36	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Helen	Eastern Cape	retired
	2025-07-29 13:09:50	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals by sea is cruel, presents health concerns for humans, and should be banned. Realistically there is no humane way to do it, and no reason to justify the suffering of these animals.	Katherine	Gauteng	
	2025-07-29 13:12:22	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Ingrid

	2025-07-29 14:02:21	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Mr. Minister, you can do better!! Do not make me think you are a sell out like so many already do. Lead by example with your conscience not your pocket!	Cheryl	Western Cape	
	2025-07-29 14:05:33	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Please don’t let our beautiful country be remembered for barbarism under this government.	Val	Western Cape	self-employed
	2025-07-29 14:15:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Once again, this government proves beyond a shadow of a doubt that they're not working for the people but rather to get what they can for themselves. This sick and twisted world in which we live, and this government are shameful!	Gena		
	2025-07-29 14:27:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is an abhorrent practice. Stop it immediately.	Karen	Gauteng	employed individual
	2025-07-29 14:32:33	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals suffer on these sea vessels and I believe this is animal abuse and cruel and inhumane. This practice should be banned completely.	Marilyn	Gauteng	employed individual
	2025-07-29 15:00:28	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	severe animal abuse. It is inhumane!!!	karen	Western Cape	employed individual
	2025-07-29 15:20:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The way these farmers/mporters/exporters is inhumane, to say the least & we need to stand for the defenceless & voiceless. Long been outlawed in Australia, for the same obvious reasons, why is ?? still in the dsrk ages, being taken for muppets in the name of money & the innocent suffer. ???✝️?	Megan	Gauteng	retired
	2025-07-29 15:25:30	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	For livestock to be crampled together on a cargo ship for weeks at sea only to be slaughtered is very cruel.	Desiree	Western Cape	retired
	2025-07-29 15:31:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Yvonne	Western Cape	self-employed
	2025-07-29 15:33:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Allowing live transportation of animals is disgusting, to say the least.	Carol	Western Cape	retired
	2025-07-29 15:42:48	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		CHARLES	Western Cape	business owner
	2025-07-29 15:43:08	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Sandy	KwaZulu-Natal	self-employed
	2025-07-29 15:44:32	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Colin	Western Cape	business owner
	2025-07-29 15:47:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not think the live export of animals is humane. As seen with other countries that have tried to do it, many animals die and there is gross negligence when it comes to their welfare and the standards for animals. It should never be allowed.	Barbara	Gauteng	self-employed
	2025-07-29 15:49:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live export is unethical and cruel. Set up infrastructure in SA and fly the carcasses to wherever. There is need for dignity and transparency	Kathy	Eastern Cape	retired
	2025-07-29 15:51:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Eileen	Western Cape	retired
	2025-07-29 16:00:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Sharon	Western Cape	retired
	2025-07-29 16:05:18	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Eloise	Western Cape	self-employed
	2025-07-29 16:12:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa has to adhere to export policies of fruits. It is absolutely inhumane to export live animals under such harsh conditions. It's an abomination.. and total animal abuse and cruelty. Please ban the export of live animals in its totality.	Beverley	Western Cape	self-employed
	2025-07-29 16:12:56	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa has to adhere to export policies of fruits. It is absolutely inhumane to export live animals under such harsh conditions. It's an abomination.. and total animal abuse and cruelty. Please ban the export of live animals in its totality.	Beverley	Western Cape	self-employed

	2025-07-29 16:16:15	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Desire	Western Cape	employed individual
	2025-07-29 16:18:33	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	It would be much more humane and practical to export carcasses.	Linda		
	2025-07-29 16:21:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Beryl	Western Cape	retired
	2025-07-29 16:25:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Zelda	KwaZulu-Natal	retired
	2025-07-29 16:29:11	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Mich	Gauteng	business owner
	2025-07-29 16:58:04	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Samanta	Gauteng	employed individual
	2025-07-29 16:58:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is animal cruelty. It is more humane to transport carcasses	Avril	North West	self-employed
	2025-07-29 17:05:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We not only need to stop the horrific practice, we also need to look into better ways for end of life for these animals. The whole situation needs to be addressed. There are good farmers out there who care for their animals and then there is terribly distressing situations .... Also within the pet trade ... we can and should be doing better	Donna	Eastern Cape	
	2025-07-29 17:06:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It has been proven over and over again that transporting large numbers of animals by sea often ends in a tragedy. If the animals are to be slaughtered, why put them through this agony? If for breeding purposes (which I doubt) they usually stress too much and need months to recuperate. No, this is too cruel	Annelie	Limpopo	retired
	2025-07-29 17:11:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Ursula	Gauteng	employed individual
	2025-07-29 17:24:02	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Any fool would realize that animals transported in such a way are ferocious and beyond words. Most animals are mistreated before boarding. They cram those animals into holds that are worse than imaginable. Rather, slaughter them humanely beforehand, it is not the Muslim way, but perhaps that way of thinking needs reform.	Shelley	Gauteng	unemployed individual
	2025-07-29 17:25:47	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Judy	Limpopo	employed individual
	2025-07-29 17:28:52	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	The act of live export is barbaric and savage. I challenge Mr Steenhuisen to accompany those poor sentient beings on a death journey. That's the only way he'll understand how disgusting it is, how much suffering is involved and how barbaric it is. How ANYONE can put greed above sentient beings, is mindblowingly disgusting. Rather slaughter here, thrn they can go. NO LIVE EXPORT, FILLED AITH DREAD, DISEASE, INJURY AND TOTAL DISGRACE	Anna-Marie	Gauteng	employed individual
	2025-07-29 17:31:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Michele		
	2025-07-29 17:33:45	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Anne-Gret		employed individual
	2025-07-29 17:35:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animal can be prosessed in RSA adequately with all the religious guides Live transport is cruel !	Erna	Gauteng	employed individual
	2025-07-29 17:53:03	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is barbaric, these animals deserve better. Man and his greed over animal welfare always!	Penny		
	2025-07-29 17:58:16	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Melvona	Gauteng	retired
	2025-07-29 17:59:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	John, stop this barbaric trade method!! Stop showing us the public that you are just a puppet to GNU how would you like to be enslaved on a ship for weeks on end and live in your own shit?? We the people have had enough of you and your ANC buddies next election the people will triumph and believe me you will be jobless like so many thousands of our countries citizens as even the true DA supporters has lost all respect for you as a so called leader! Shame on you you are a uneducated puppet	Francois	Gauteng	self-employed
	2025-07-29 18:01:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea inflicts inevitable suffering—heat stress, extreme overcrowding, injuries, and prolonged deprivation of basic needs. Ships can never provide the welfare standards animals require, and unavoidable risks—rough seas, delays, and toxic waste buildup—lead to severe illness and death. No amount of regulation can make this practice humane. I strongly oppose these regulations .	Michelle		
	2025-07-29 18:11:41	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Calyn		retired
	2025-07-29 18:22:19	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	There has to be better and more humane methods given technology and insight these days. The stress and agony animals experience is unimaginable and shameful	Anil	Gauteng	unemployed individual
	2025-07-29 18:30:40	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Live export of animals is horrific cruelty	Desire	Gauteng	retired
	2025-07-29 18:35:54	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not		Carol	Eastern Cape	retired
	2025-07-29 18:38:52	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Only export packaged meat. What a horrific way to end the life of an animal after weeks at seda.	Neville	Gauteng	retired

	2025-07-30 08:49:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Mr. Steenhuizen, government's job is to implement legislation and practices that will lead to the well-being of that country's citizens as well as their animals. Live export of animals is always cruel as it goes against the five domains of animal welfare - it is unlawful and improper. If we want God's blessing on our country, we need to make decisions that will uphold justice and righteousness. We acknowledge your position of influence and authority, so we urge you to consider well every decision that you are making, because this will also leave a legacy for generations to come. I urge you to ban all live export of animals in all its forms as a proper and righteous decision. But beyond that - please make an intentional commitment as minister to advance and implement compassionate farming practices as a new way of doing things. This will bring many blessings to agriculture in this country, food security and its citizens as a whole. If you are able to leave compassionate farming as the legacy of the position you have been chosen for, you will be remembered as a minister who truly upheld justice and righteousness for this country. Please visit https://www.ciwf.org/za/ for more info and work with animal welfare organisations to bring true change - this is the change we want to see.	Mariette	Western Cape	employed individual
	2025-07-30 08:51:51	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Dit is n ongelooflike wrede manier om diere te vervoer. Daar is geen oorsig oor die toestande waarin die diere vervoer word nie. So baie diere word saam ingedruk dat hulle nie kan le nie (hoe sou jy voel as jy vir dae lank net mag staan) en word vertrap as hulle inmekaar sak. As gevokg van die aantal diere saam, kan hulle nie almal by die kos en water uitkom nie, indien daar genoeg kos en water verskaf word. Die temperature op die skepe agv die baie diere bymekaar is onuithoudbaar en lei tot vinniger dehidrasie wat verder vererger word deur die diere wat nie vrylik toegang het tot water nie. Sit jouself in hulle posisie.	Larize	Gauteng	employed individual

	2025-08-01 21:49:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Regulations cannot be enforced, instead this will act as a terrible false sense of welfare, when the welfare cannot be enforced. The only way to prevent the atrocities of live animal export, is to BAN live animal export entirely. South Africa BAN live animal export now. Our ports and harbours should be places of progress and pride, not gateways to cruelty and the inhumane suffering of thousands of animals for long periods of time, to only be met with slaughter. This is not only a concern of animal welfare, this is an ethical and moral imperative that we say stop the export of live animals. The trauma is to the animals, but us as the citizens feel the trauma by proxy by seeing it happening, knowing it is happening. It haunts those of us that think of the suffering of these animals. It is a disgrace to our nation. I will take my vote to the parties that show animal welfare and environmental issues are of concern to them. As we the people want to see an end to suffering. There is export of meat products, but no export of live animals.	Ashleigh	Western Cape	self-employed
	2025-08-01 21:51:16	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa is wonderfully progressive in many ways. This barbaric practice reflects poorly on us as a nation and as caring, compassionate people.	Samantha	Gauteng

	2025-08-03 09:11:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transportation of animals by sea or any other method of transportation is barbaric and should be banned.	Jean		
	2025-08-03 09:18:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Sirs I am aware that the Department of Agriculture, Land Reform and Rural Development has released a draft amendment of the law on the live exportation of animals by sea and have asked the public to comment on it. I understand that these comments are taken into account when deciding whether or not to go forward with the law. I strongly believe that if the law was to go forward it would lead to the increase in the live export industry that has proven to be inherently cruel to the animals on the ships. I am against the proposed amendment and I beg the Department to ban the live exportation of animals. Animal suffering is inherent to the live exportation of animals by sea and the amendments will not provide sufficient protection for the animals on board these vessels. DALRRD has historically failed to fulfil its animal welfare mandate generally, and specifically regarding the live exportation of animals. The inspections done before the boarding of animals, the veterinary assistance provided on board, and the reporting of animal welfare have all been inadequate. Yours faithfully Mrs Glenys Joy Finnegan	Glenys	Gauteng	retired

	2025-08-04 16:35:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Job creation is the answer, not exporting our wealth to foreigners! Our people are been taxed to their ears, our people must pay high prices for food every day, STATS SA are not providing real figures for our CPI and inflation, they are deliberately ignoring certain indices, like labour and doing it purposely! It is time for a competent government who respect human rights and not oppressing qualified people! Charity begins at home, our home South Africa, Maleagi chapter 3! There Shepherd's, Moses, David and Yeshua, same Spirit but different bodies, John chapter 3, John chapter 10, Mathew chapter 25! Why all the plagues, Revelation chapter 22, the Word of God!!	Derek	Gauteng	business owner
	2025-08-04 16:36:22	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	I can only imagine how inhumane this is for animals to be at sea. We know we're getting on a boat but they have no idea! Knowing you're at sea and still being seasick can only be much worse for these animals! But heck man has become so inhumane that doesn't surprise me that they will do it anyway.	Hendrina	Gauteng	retired
	2025-08-04 16:36:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This practice perpetuates long term and harmful damaging effects on animals and is a barbaric practice that must be banned by all right-thinking countries. There are ways to transport animals that are advanced and humane, use those!	Jane	Gauteng	employed individual
	2025-08-04 16:36:36	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Exporting live animals by sea is both cruel and unnecessary. Animals endure long, stressful journeys in overcrowded and poorly ventilated conditions, often lasting weeks. They are exposed to extreme heat, rough seas, noise, and disease, with limited access to food, water, and veterinary care. Thousands die during transit every year, and those that survive often arrive sick, injured, or traumatized. The suffering doesn't end when they reach their destination. Many are sent to countries with little or no animal welfare regulation, where they may face brutal handling and inhumane slaughter without proper stunning. This treatment would be illegal in their country of origin, making the entire process deeply unethical. Live export is also unnecessary. With modern refrigeration and cold-chain logistics, it's entirely feasible to export chilled or frozen meat instead. This not only eliminates animal suffering but also boosts local processing jobs and ensures better control over food quality and safety. The environmental impact is also significant, with live export ships contributing to pollution and greenhouse gas emissions. Countries like New Zealand have already banned the practice, and public pressure is growing worldwide. It's time to end this outdated industry and adopt humane, sustainable alternatives.	Mark	Gauteng	employed individual

	2025-08-04 18:23:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I think that it sounds like a shocking practice. I am assuming that these animals are going to provide meat for the receiving country. The animals could be humanely slaughtered in South Africa and shipped in cold storage	Veronica	Gauteng	self-employed
	2025-08-04 18:23:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is puzzling why the Agriculture Department is so keen to continue the practice of shipping animals for slaughter overseas. Shipping dead, dying or desperately suffering cattle cannot possibly be a better method of export than shipping the meat of animals slaughtered here. Perhaps the countries buying the cattle factor in the possibility that a percentage of the animals will have to be discarded and thus offer less money for the shipment; or perhaps want to slaughter animals in any conditionl, even dying, to be sure they are dispatched in a proper Halaal manner - as if there are no Halaal butchers in South Africa.	Barbara	Gauteng	employed individual
	2025-08-04 18:24:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Sam	Gauteng	self-employed
	2025-08-04 18:25:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I cannot believe that as South Africans we can even contemplate exposing live animals to transportation over large distances by sea. What are we becoming??	Nick	Eastern Cape	retired
	2025-08-04 18:25:12	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Unbearably cruel and unjust abhorrent the suffering and prolonged agony and fear.9	Jackie	Western Cape	retired
	2025-08-04 18:25:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries – such as Kuwait, Saudi Arabia, the UAE, and Mauritius – have animal welfare standards that fall well below those of South Africa. Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death.	Brent	Gauteng	employed individual
	2025-08-04 18:25:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Please stop this, the animals, thirsty, hungry, injured and not sufficient care. Standing in their own feces, urine, this is heartless .	Wilna	Eastern Cape	employed individual
	2025-08-04 18:25:36	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Overwhelming evidence for decades proves that the exhortation of li animals is barbaric. Thousands die en route	Dell	KwaZulu-Natal

	2025-08-04 19:19:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not support the proposed regulations, because they attempt to sanitise a practice that is inherently inhumane. Live animal export by sea causes immense suffering — overcrowding, heat stress, injury, and death are not exceptions, they’re the norm. No regulation can make this trade humane. South Africa should be exporting meat, not misery. This is a moral issue, not just a logistical one. Over 50 animal welfare organisations agree: the time has come to end live animal exports entirely — not to dress them up in new regulations. I urge the Minister to ban this cruel trade, once and for all.	Cean	KwaZulu-Natal	self-employed

	2025-08-04 19:20:39	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	There is no need to export live animals in this day and age. Society has moved on. It will be more economic to add value to the exports by shipping packaged meat, slaughtered to the required religious or cultural needs, than shipping live animals and then slaughtering them. There is no need to do this and SA can benefit from the added value of containerised shipping of frozen meat	patrick	Western Cape	retired
	2025-08-04 19:21:45	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals should be slaughtered humanely in SA and then the meat should be frozen and shipped to the export markets.	Jeremy	Western Cape	business owner

	2025-08-04 19:40:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn’t end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply.	Mauritz	Western Cape	retired

	2025-08-04 19:53:32	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export is inherently cruel and regardless of the regulations or guidelines in place, as a practice, it is incapable of achieving a suitable standard of animal welfare. That has been recognised recently by New Zealand which has banned live export of animals. The only reason to export live animals is an economic one, and the countries importing live animals also import carcasses so they already demonstrate that they can support this humane alternative. I hope that enough pressure builds around this dreadful policy of live animal export by sea that the government is forced to take a more serious approach and outright ban this barbaric practice.	Max	Gauteng	employed individual

	2025-08-04 20:18:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	My question is why transport live animals at all..I would think having a better business model would be much better. We have abattoirs, we can build more with bigger capacities, we can actually help creating jobs..the livestock that was suppose to go on a ship can actually be slaughtered and processed as per other countries rules and regulations, exceptional health and safety codes and standards to uphold. Trucks fitted with cold storage and ships fitted with cold storage to keep to cold chain. Safety officers can be trained and employed to keep standards high and make sure that supply chains and commands is kept. I see a whole new business model needs to be brought to the table to see what works well and create jobs and train people to get skilled. It is time that we become forward thinkers instead of doing the same old thing and it does not work. Is there more to be done, absolutely, but it is possible.	Marijke	Gauteng	unemployed individual

	2025-08-04 21:27:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not support the live export of animals by sea. This practice is inherently cruel and cannot be made humane, regardless of the regulations proposed. Animals endure long, stressful journeys marked by overcrowding, injury, illness, motion sickness, and even death. Once they leave South African waters, they are beyond our legal protections and often face slaughter in countries with far lower animal welfare standards. The appointment of monitors by the Department of Agriculture creates a clear conflict of interest and does not inspire confidence in proper oversight. Regulation in this context only serves to legitimise a practice that should be ended entirely. I therefore call on the South African government to ban the live export of animals by sea and focus instead on more humane, sustainable, and ethical trade alternatives. 	2025-08-04 21:35:17	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable.	Jean	Western Cape	
	2025-08-04 21:35:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Export of live animals by sea should not be allowed. It is our duty to minimise the suffering of animals and this is inherently cruel and unnecessary	Coral	Gauteng	employed individual

	2025-08-04 22:44:52	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Good Day I really can't support export of live animals by sea, our humans are not responsible in looking after the animals in our care. It is not natural for those animals to be on a ship on sea, they are kept in the most horrible conditions, and not looked after. It must be absolutely banned, it is horribly inhumane. I came from a farm and the meat of animals under such stressful conditions is almost indelibly tough. And besides, at least a quarter of those animals are either dead or in such a sickly condition that their meat cannot be used and must therefore be put down to put them out of their misery. If the government wants to export meat then the animals can be slaughtered here on land at abattoirs (which creates jobs) and then the meat can be processed and frozen and transported overseas in containers. Please do the right thing towards the animals but also for humanity, God is going to punish us for destroying and abusing His creation. Regards in Jesus Name	Ans	Western Cape	retired

	2025-08-04 22:53:35	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	This is a cruel and inhumane practice. Government should place animal welfare before profits. The ANC government is only concerned with lining their own pockets regardless of the cost to SA citizens and/or animals.	Sean	Gauteng	self-employed
	2025-08-04 22:55:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I would like to express my deep concern regarding the transport of live animals by sea. While I understand the complexities around trade and food production, I believe the welfare of animals should be a non-negotiable priority in any process. I am particularly troubled by the conditions in which these animals are often transported. Reports and footage have shown animals being shipped in overcrowded, poorly ventilated, and dark containers where they suffer from extreme stress, dehydration and injuries. In many cases, journeys take several days or even weeks, during which animals have limited access to food, water and rest, and are exposed to noise, heat and rough seas. These are sentient beings, and the suffering they endure in transit is deeply inhumane. I believe there are more ethical and humane alternatives that should be considered. At the very least, strict and transparent regulations should be enforced to ensure that animals are treated with dignity throughout their journey. For these reasons, I do not support the transport of live animals by sea and urge the government to prioritise animal welfare in policy decisions on this matter.	Louise	Eastern Cape	Non-profit
	2025-08-04 22:55:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I would like to express my deep concern regarding the transport of live animals by sea. 	2025-08-04 22:55:46	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly oppose the continued export of live animals and believe South Africa must implement a full ban on live animal transport. The proposed bill falls short. Live export is inherently cruel, and no amount of regulation can prevent the suffering animals endure during long journeys by sea or road. There is clear and disturbing evidence—particularly involving shipments to the Middle East—of profound animal abuse at sea and at the destination. South African animals have arrived injured, dehydrated, and dying, only to face brutal, unregulated slaughter practices far below humane standards. These are not isolated events—they reflect systemic, unavoidable cruelty. Live export is not just an animal welfare issue. It damages South Africa's international reputation and ignores the moral responsibility we have toward the animals in our care. If countries wish to import South African meat, let it be processed ethically and locally, under strict welfare regulations—supporting jobs and food safety at home. We should not be complicit in cruelty. Ban live animal export completely.	Richard	Western Cape	self-employed

	2025-08-04 23:01:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Exporting live animals by sea is inhumane. Luxembourg, Germany, New Zealand and the UK recognise this, and have banned live exports. Australia will soon be banning these as well. Why are we considering regulating live exports when we should also be banning this harmful practice? Everyone in Cape Town was subject to the stench of the livestock carrier that docked in our port last year. For the city to have stunk like that, imagine the state those animals were in, and for how long. Whatever could be done for those animals at the time, was done by our relevant law enforcement officers, but we had no oversight when the ship left our waters and we can only guess what horrific state those animals were in, upon arrival at their final destination. Ship the meat if you must, but not the live animals. These animals are living creatures, and we have a moral obligation to them. It was Mahatma Gandhi who said that the more helpless a creature, the more entitled it is to protection by man, from the cruelty of man.	Monica	Western Cape

	2025-08-05 01:48:45	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The common practice of breeding other thinking animals (we should remember that we too are animals) for slaughter has made us uncaring for their plight. This practice is made all the more barbaric by extending the time to which they are exposed to fear and discomfort prior to being executed. Presumably this is done to keep the meat fresh for longer without incurring the costs to refrigerate it in transit but this callous or unthinking decision exponentially increases the suffering of such animals. I would suggest that every meat eating human place more respect for the animal that has lost its life for their next meal. In addition, I find it strange that a government that appeals to the ICJ because of genocide in Gaza would even contemplate the worse treatment of other conscient animals for financial gain. It is hypocritical and they should seriously interrogate their motives.	Stuart	Gauteng	retired

	2025-08-05 04:57:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly oppose the practice and policy of live animal export by sea. Transporting large numbers of animals—primarily cattle to Mauritius and sheep to the Middle East—under often cruel and despicable conditions is inhumane. Once the ship departs South African waters, there are no enforceable regulations to ensure their welfare. Regardless of the animals' ultimate fate, ethical and moral obligations must be upheld while they are still alive. Their health and wellbeing must take precedence. This practice is unacceptable, and it reflects poorly on us as a nation that values animal welfare.	Kate	KwaZulu-Natal	employed individual

	2025-08-05 05:37:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live export by sea is fundamentally incompatible with animal welfare. Live export, as evidenced by this situation, exposes animals to perilous conditions such as dangerous levels of ammonia, rough seas, extreme heat stress, injuries, dirty environments, exhaustion and even death. Slaughter animals locally, under South Africa's existing welfare laws, and export the chilled or frozen meat instead. They are stripping the country of livestock, which is good for some farmers but depleting the local market. Prices for meat are rising and local people who depend on meat processing are going to lose their jobs. New Zealand and UK banned live exports. Why can't we? We demand a full ban of live exports. Are we willing to accept that thousands of animals will suffer so a few exporters can make a profit?	Sophia	KwaZulu-Natal	retired

	2025-08-05 06:12:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We have had a vessel in Cape Town harbour where live cattle was transported to Iraq and animals suffered and some have died. The below insert is from the NSPCA website. "The NSPCA, with the assistance of its member Society – the Cape of Good Hope SPCA, conducted an inspection of the vessel from Sunday, 18 February 2024 to Tuesday, 20 February 2024. The scenes on the vessel were abhorrent, with an extreme build-up of faeces and urine, and animals having no option but to rest in dams of their own excrement. Compromised animals were discovered, including diseased and injured animals. The NSPCA humanely euthanised eight cows aboard the ship and others were found dead. NSPCA Veterinary Consultant, Dr Bryce Marock, ensured veterinary treatment of other animals. This incident serves as a stark reminder that the live export of animals by sea is a gruesome and outdated practice that inflicts unnecessary suffering on sentient beings. It underscores the urgent need for legislative reform and heightened global awareness to end this cruelty once and for all. This method of trade causes pain, suffering and distress to many animals, including high mortality rates occurring during the voyage."	Elmarie	Western Cape	employed individual
	2025-08-05 06:12:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	That's cruewelity and babaric how can someone allowed to keep doing that it should have been stop longtime ago this animals would suffer too much .	Jerry Agrib	Gauteng	business owner
	2025-08-05 06:13:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is no justifiable reason for this outdated barbaric and cruel trade. 	2025-08-05 08:19:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Long journeys in confined spaces can cause extreme physical and psychological stress for animals. Loud noises, unfamiliar handling, motion sickness, and lack of proper rest increase suffering. Injuries and Illness: Animals often get injured in overcrowded pens or due to rough seas. Outbreaks of disease spread quickly due to close confinement and poor ventilation. Death in Transit: It's not uncommon for animals to die during the voyage from dehydration, heat stress, or exhaustion. Mortality rates are often higher in warmer climates and longer trips. Inadequate Food and Water: Mechanical failures, rough seas, or poor planning can lead to inconsistent feeding or watering, resulting in dehydration or starvation.	Robert

	2025-08-05 08:23:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The congregation of a large number of domestic land animals in a completely foreign environment is highly stressful, and irrespective of the facilities on board such a vessel, those animals will not be able to feed and act naturally. Stress levels will be very high, some animals will be aggressive, while others will just want to lie down and be trampled. To avoid this animals are often "packed" in such a way to stop them from lying down. When down every effort is made to get the animal up using prodders etc, but often this is unsuccessful. In the case where animals are subject to rough seas and the rolling motion of a ship this tendancy is going to be far worse, to the extent that the animal will not eat or drink. The efficiency of the veterinarian on board is of concern as it is a person who can be appointed by the ship owners or the asignee. There is no guarantee that the person would have the necessary knowledge and experience to handle such a task. Working under those circumstances is completely different to running a practice or performing the functions of a State vet, even in rural circumstances. It takes a special person with a specific knowledge and experience base to work under those circumstances. There is no independent monitoring that I could see in the regulations. One needs impartial representation to ensure the practices carried out on board are up to the standard described by the regulations. It would be my suggestion that instead of animals being shipped live that they are slaughtered humanely under the required conditions, frozen and exported frozen. This would increase work opportunities in RSA and avoid the stressful and doubtful practice of live shipping.	Errol	Limpopo	self-employed
	2025-08-05 08:23:33	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal exports are cruel and totally unnecessary. South Africa is quite capable to slaughter the animals in a humane manner and to then export the meat.	David	Western Cape	retired

	2025-08-05 08:29:00	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Why live animals.? When they reached destination to be blunt the quality of the product is not of the standard it left our shores. Rather export the processed meat frozen, but suspect this is too expensive to greedy mongers.	Frith	Mpumalanga	self-employed
	2025-08-05 08:29:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live export by ship causes extreme stress, injury, and suffering to animals due to overcrowding, heat stress, poor ventilation, and long journey durations. Export chilled or frozen meat instead, which supports local slaughter under regulated conditions and eliminates animal welfare risks during transport.	San	North West	employed individual
	2025-08-05 08:29:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	What is the over-riding benefit or necessity of exporting live animals? Very expensive and complicated to fully adhere to regulations which are introduced for an ideal world. Ultimately these regulations are side stepped and huge cruelty to these animals is inevitable.	Ilda	Gauteng	business owner
	2025-08-05 08:29:19	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	At Last something is being done about this cruel practice. I have for a along time believed the only way to export meat is frozen. Clean carcasses or cut to customer preferences frozen and packed in boxes in refrigerated containers. In this way we can ensure that all live stock exported is kept and handled humanly before slaughter. That they are slaughtered humanly. I have not done the numbers, but I believe this would be far more cost effective, in that space utilization in refrigerated containers can be maximized, superior quality product delivered to the end user and a cost effective rate per kilogram. This benefication would create much needed jobs in our South Africa. Today in our own country there are advancements in air flow technology to ensure produce arrives at it final destination in cost effective way and a better quakity	Colin

	2025-08-05 08:33:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is a highly abusive and inhumane practise and should be completely banned. Livestock must be kept in local markets for local benefits. Any economic export benefit cannot justify the cruel treatment and suffering that these animals endure. This minister must personally travel with a livestock shipment and record his findings for all to see. Absolutely shocking to see that this DA member is prepared to allow the abusive cruelty and suffering of animals. Another nail in the DA coffin.	Marco		business owner

	2025-08-05 08:37:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals are living, breathing and feeling beings and should be treated as such. They would need to be transported where their footing is secure, where there is light and air - non of which would be possible in a 'hold' at sea - and sufficient food and water. This practice is totally inhumane, will animals falling, breaking legs, and not being given medical treatment. The question of whether I support the proposed regulations is misleading. I DO NOT support a legislation that continue to allow transportation of livestock where they are not cared for. I WOULD SUPPORT legislation which prohibits this inhumane practice. 	2025-08-05 08:39:50	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The deficiencies of livestock vessels worldwide are so high that they are a threat to animal welfare, health and safety. The average livestock carrier is almost 43 years old, 94% have been converted after around 30 years at sea, and they are routinely reported for major incidents related to engine failure, fire, collision, and oil spills. High morbidity levels among animals being transported are clear indicators of the risks of sea transport. The picture is grim when one sees evidence of the brutal handling of animals, the transport of injured animals, loading density, dead and injured animals thrown overboard, lack of food and water, and poor ventilation. These vessels are not legally required have a veterinarian on board to treat or humanely euthanize sick or injured animals, so I don't even want to imagine what happens to them. These livestock vessels also have problems not directly related to animal welfare: serious risks for animal and public health because of the spread of diseases; vessels used to conceal illegal activities (human and drug trafficking) and environmental concerns for marine life. The entire process is an inhumane mess: ban it.	Lesley	Western Cape	self-employed

	2025-08-05 08:54:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I write to oppose the proposed regulations for the exportation of live animals by sea. While I acknowledge the intention to improve conditions for animals during transport, I believe the very nature of this trade is inherently inhumane and cannot be regulated into acceptability. The extended confinement, extreme heat, overcrowding, deprivation, and distress that animals endure during live sea transport are well-documented, and no set of guidelines can eliminate these core welfare issues. It is deeply concerning that, despite strong public sentiment and the appeal of over 50 animal welfare organisations to ban live exports, government is choosing to entrench this harmful practice through regulation, rather than phase it out. South Africa has an opportunity to demonstrate leadership by transitioning to humane, ethical, and economically viable alternatives, such as the export of processed meat products under strict animal welfare standards. These alternatives not only prevent suffering but uphold the integrity of our agricultural and trade sectors. I urge you to reconsider this course and instead commit to a complete ban on the exportation of live animals by sea. Animal welfare must take precedence over outdated practices and short-term economic interests.	Carol	Western Cape	business owner

	2025-08-05 08:54:40	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Animals often endure long, stressful journeys in overcrowded and unsanitary conditions, leading to suffering, injury and sometimes death before arrival. Beyond the cruelty, live export also poses biosecurity risks and contributes significantly to greenhouse gas emissions. By investing in local slaughterhouses and cold chain logistics, South Africa can retain more value domestically through job creation and processing, while importing countries receive high-quality, safe products. This method no only reduces animal suffering but can also prove most cost-effective in the long run due to reduced transport costs, better quality control, and minimized losses from animal fatalities or weight loss during transit. Please consider to ban live animal exportation.	Maxie	Gauteng	unemployed individual
	2025-08-05 08:54:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am totally against the inhumane transport of any animal particularly on a vessel at sea. I do mot believe that these animals will receive the necessary care required to disembark at the port of destination in a state of good physical and mental health. Sea travel can be rough and animals could be injured. No animal which has been raised to graze freely should be heeded into a confined space like the hold of a ship for any length of time. They need fresh air, light and access to movement, grazing and water. There is a great risk of injury during times when the ship is buffeted in bad weather. I don't believe that these injured animals will receive the necessary care they require and that there will be suffering. I question whether these animals will be cared for in a manner which is humane once under the jurisdiction of a country with different values as South Africa. Meat should be exported after humane slaughtering in SA and transported in a frozen condition if by sea, or unfrozen by air to country of destination. South Africa has imported fresh meat in this manner Eg fro Australia so this method is possible. I strongly oppose export of live animals on the scale described.	Roberts	Western Cape	retired

	2025-08-05 09:14:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is a cruel and inhumane practice . There is no need for this . Halal practices for slaughter an be done in country of origin . It's disgusting , barbaric and archaic practice(although obviously it was not an original practice). Let those people run their own herds and slaughter them in their own countries if they want " fresh meat ". Many animals die. The stress is enormous and animals die of shock , overcrowding - they climb over one another , no hygiene - animals are crowded in their own faeces (where is the health that these backward and depraved unfeeling people people demand from having live animals delivered to them . These are tribes that only in the last few decades started moving into the 19th century - they were nomadic herders . Let them return to that . Do not allow them to exploit animals and encourage greedy stupid African nations who are also blind and lacking in humane treatment of animals , to provide live animals . SA is not a country known for its kind treatment of animals . It's all about money for the few here . And now they're trying to impress and kow tow to their Middle Eastern masters. Animal diseases are carried from country to country , instead of being contained : Foot and mouth ,bovine diseases etc are very prevalent and transported when live animals are moved in this way . Food and water are short . There are no shepherds and nor are there officials from humane societies . It is cruel , barbaric , short sighted and immoral on so many levels . Only send pre packed meat slaughtered at places origin . At what price are we prepared to send defenceless animals to barbarians? It is time the world stopped allowing any trade in any type of live animals for any reason . Stop pandering to the uncivilized world just because they have money and SA is greedy and in the thrall of these backward people . Believe me France and England are most unlikely to be sending live animals to Mauritius . All food is prepackaged .	Sally

	2025-08-05 10:06:56	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live export causes immense and unnecessary suffering. Animals are transported in overcrowded, unsanitary conditions for days or weeks, often without proper food, water or care. Many arrive injured, traumatised or dead. Sea voyages are especially cruel, subjecting animals to harsh weather, confinement and distress. South Africa cannot guarantee humane treatment once animals reach foreign shores. Exporting meat, processed humanely, within our own borders is a more ethical, sustainable and economically beneficial alternative. It creates local jobs, improves quality control and reduces greenhouse gas emissions. We urge government to protect animal welfare, uphold ethical standards, and prioritise domestic value by banning live animal exports and supporting local meat processing and cold chain logistics. End the cruelty. Export meat, not suffering.	Ailsa

	2025-08-05 10:47:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Humans are not superior to other creatures—we share this earth with them, and that means respecting their right to live free from cruelty. The live export trade treats animals as cargo, forcing them into unbearable conditions that no amount of regulations can fix. This mindset echoes the darkest days of the slave trade, where beings were dehumanized to justify exploitation. We must reject this practice outright, not hide behind rules that only serve to legitimize ongoing suffering. It's time to choose compassion and recognize animals as fellow life forms, not objects for profit. Ending live exports is the responsible, humane choice for our planet and our conscience.	Rick	Western Cape	retired
	2025-08-05 10:48:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is incomprehensible that any living thing should be subjected to prolonged stress and agony purely for human consumption. If we are going to consume animals, we should ensure that the breeding to slaughter process is as humane as possible and provides as little stress as possible with proper regulations and protections being adhered to. Once these animals leave our shores, they are not protected by our internal regulations and things fall outside of our control.	Lauryn	Gauteng	employed individual
	2025-08-05 10:48:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Attempting to regulate live animal export does not stop the pain & suffering these farm animals are forced to endure. No amount of regulation can make live animal export humane.I STRONGLY oppose these regulations & urge the Minister to END live animal exports by sea	Mary	Western Cape	retired

	2025-08-05 11:16:45	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I believe that animals suffer on livestock sea vessels and that animal cruelty is inherent in the live animal export process. I do not believe that these regulations are capable of ensuring animal welfare. I call on the South African government to prohibit this trade by banning live animal exports by sea. I do not support the proposed regulations for the Exportation of Live Animals by Sea. It is inhumane to transport live animals on such a long journey and not be attended to for their basic needs. Either transport them by air or let the countries purchase carcasses. I cannot stand by and condone these barbaric practises. It is disconcerting that our minister is not putting a stop to this, has he seen the videos and the suffering of these animals? If he has and still proceeds, he is heartless and not someone I would like to see in our government overseeing the fate of these animals. Do we not have a conscience? Do we not have a duty to say "NO! IT IS UNACCEPTABLE! STOP IT AT ONCE! This is more than animal abuse, it is detracting from us as humans when we practice this cruelty. We should be grateful that these animals are giving up their lives to feed us, the least we can do is to ensure they get treated with the basic requirements they deserve. God will judge us, they are His creation.....remember that!	Cecilia	Eastern Cape	employed individual

	2025-08-05 11:17:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn't end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply	Lynn	Western Cape	self-employed

	2025-08-05 11:47:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals in this manner is inhumane and barbaric. It is nothing more than cruelty to animals and the SPCA has for years been trying to put a stop to this. It is well documented that the animals suffer terribly when being herded onto ships, then in the hold of the ship they are terrified, squashed together, suffer terribly slipping on their own excrement, falling often dying in pain. Often ships have then to wait out at sea for a berth in the dock and more of them die. If they survive the journey they are then herded to a butcher where they are slaughtered for their fresh meat. This is barbaric and our Government should do something right for once and STOP this cruelty to animals.	WM	Western Cape	retired

	2025-08-05 11:47:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is literally NO humane way to transport livestock over vast distances, even domestically. Ocean going craft are basically like floating concentration camps for livestock being transported. The animals are sentient beings and suffer tremendously. They endure huge stress as they are unable to understand, and even less control, their circumstances. Physically they are pushed and pulled and fall and are easily injured and can even be trampled to death. Feeding them and keeping them hydrated is logistically complicated. A stressed animal will not eat, and may even not want to drink anything either. This "export practice" only serves to enrich human beings. The animals suffer unbearably!! Just unacceptable!!	Diana	Western Cape	self-employed

	2025-08-05 11:51:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This practice should be banned. South Africa should supply products not live stock. Government should ensure animal welfare as priority so that ensure that abusive practices don't prevail. Animals are citizens of this country and should be treated that way. They have a right to live in dignified manner, they are not our tools but our partners. It sad that South Africa would even consider this. Soon the lion will just be a circus instead of the king. Modern scientific studies are showing that animal have feelings and emotions including memory. Modern science is also showing that unless an animal is raised correctly it's products will be less nutritionist and potentially harmful to health of human consumption. These practices will pave way for abusive agricultural practices where profits over dignity, it is so prevalent already.	Seelan		
	2025-08-05 11:52:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		GLYNN	Western Cape	retired
	2025-08-05 11:53:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is no way to turn this abhorrent practice into something "humane". Exportation of animals by sea is simply adding torture to the miserable lives these animals already lead. The economic justification is flimsy and does not hold up - canned lion hunting also brings in money, but South Africa has rejected that cruel and disgusting trade as well. Rhino poaching also brings in a lot of money for certain individuals, but we fight against this with all the resources we can. This issue is no different. Animals who are already doomed to be slaughtered shouldn't have to face the added agony of transport in their own filth, in sweltering containers where they are treated as already dead. Shame on this so-called industry for having the practice in the first place and shame on Steenhuysen for trying to pander to the rich who benefit from it.	Gareth	Mpumalanga	self-employed

	2025-08-05 12:03:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animals should not be exported by sea is the severe and often prolonged suffering the animals endure due to overcrowding, heat stress, dehydration, and poor sanitation—all of which are virtually unavoidable on long sea voyages. Sea voyages often take weeks during which time, animals are confined in cramped spaces, standing in their own waste, exposed to fluctuating temperatures and humidity levels, and frequently denied proper veterinary care. These conditions lead to high rates of illness, injury, and death, with some ships reporting mortality rates exceeding acceptable welfare standards. Furthermore, in the event of mechanical failure, rough seas, or port delays, animals can be stranded without access to food, water, or proper ventilation. Documented incidents of mass deaths—such as thousands of sheep dying from heat exhaustion—highlight the inherent risks of live export by sea. In short, the practice poses unacceptable animal welfare risks that cannot be sufficiently mitigated, and therefore should not be permitted in any ethical or humane livestock trade system.	Dawn	Gauteng	employed individual

	2025-08-05 12:03:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Daar is GEEN manier dat ENIGE wetgewing en/of regulasies en/of reels of WATOOKAL die 'wetgewers' daar wil stel wat die wreedheid teenoor enige lewende dier sal kan beskerm nie. Ek stel voor hulle kry hul eie 'broei- of teelprogramme' in werking indien hulle dan 'lewende' diere wil he waarookal hulle is. STOMME diere het net ons wat omgee wat moontlik namens hulle kan optree. om hulle te beskerm teen uitbuiting en brutale misbruik en/of wreedheid. Ek is TOTAAL en al GEKANT teen ENIGE uitvoer van ENIGE lewende spesies.	Deoni	Western Cape	self-employed
	2025-08-05 12:03:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Whether you believe it or not, animals, cattle included, do have feelings. The horror of slaughterhouses can be seen on their faces as they wait in confined lines, instinctively aware that something traumatic is about to happen. Loading cattle onto ships bound for the Middle East is dreadful, as they are packed tightly and prodded with electric goads. The long journeys by sea create fear of the unknown, compounded by the unfamiliar experience of a rolling ship in all weather conditions. The conditions on these vessels are appalling, and with little oversight regarding how the animals are treated, only minimal care is provided. Bad weather often causes delays, so weeks of sailing can pass before disembarkation. At the port of entry, the cattle are forced down wooden walkways, where in their rush, they frequently slip and fall, breaking legs after having endured weeks on a swaying ship. The handlers in the receiving country often show little respect for the animals, and the misery continues until a slicing knife cuts their throats. They linger in pain, conscious to the end as their blood drains away. We can, and must, do better than treating cattle as if they were the walking dead, devoid of feelings.	Andrew	Western Cape	retired

	2025-08-05 12:18:56	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The live transport of any animals by sea in quantity should be banned completely. Even if they are physically healthy during transport, the prolonged journey in that situation is no more than an unnecessary prolonging of their terror and suffering. With modern refrigeration techniques available, there is no reason for livestock not to be slaughtered at source in any manner that may be required religiously or culturally. There is simply no excuse or reason for this barbaric trade to be continued.	Cathy	Western Cape	retired
	2025-08-05 12:19:04	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am writing to formally oppose the proposed regulations for the Exportation of Live Animals by Sea and to call for an immediate and comprehensive ban on this practice. Animal Suffering Is Inherent to the Process Evidence consistently highlights the systemic suffering endured by animals on livestock vessels—heat stress, overcrowding, injury, and prolonged confinement are not anomalies but intrinsic realities. The arrival of the Al Kuwait in Cape Town (Feb 2024) tragically underscored this: animals standing in knee-deep faeces, some requiring euthanasia on site. Regulatory Measures Cannot Ensure Welfare While the draft regulations introduce monitoring and thresholds, these measures fall short of addressing the cruelty inherent in the practice. Once animals leave South African shores, oversight and accountability dissipate. No amount of regulation can make live sea export humane. Call for a Full Ban I strongly urge the South African government to follow the example of New Zealand and Germany by banning live animal exports by sea. This would reflect our nation's moral responsibility and protect its international standing as a champion of humane progress. Constructive Alternatives To ensure a responsible and economically sound transition, I propose the following: - Shift to carcass export models that support local processing and eliminate in-transit suffering. - Offer targeted support and incentives to small-scale farmers impacted by this shift. - Establish an independent third-party monitoring body—if any form of export persists—to ensure transparency. - Implement a phased ban with retraining and market diversification support. - Mandate public disclosure of voyage conditions and animal welfare metrics. This is a defining moment for South Africa. I respectfully urge you to reject the proposed regulations and instead enact a full ban on live animal exports by sea.	Marika	Gauteng	retired

	2025-08-05 13:06:35	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Imagine being on a ship like this yourself. Stop. Think. Actually picture what it would be like. The blood, the cries, the stench, the terror. Do you think it's okay for us to allow animals to endure this cruelty? Fundamentally, I know that many of us here call ourselves animal lovers, but an animal lover wouldn't stand and watch an animal suffer, right? So - stop it. We find it so much convenient to ignore all this, to purposefully shove these questions and thoughts out of our minds, and continue living as usual. But the truth is: we can't. We cannot be bystanders to what we see happening around us. It doesn't take bad people for bad things to happen, but rather good people who do nothing about the bad things that are happening. Please. Do your bit. You've been given power, use it for the better of every living creature, not for the worse.	Phoebe		student

	2025-08-05 13:09:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa used to be one of the best countries in the world leading by exemplary values no it is exactly the other way around due to mismanagement and enrichment of only a certain portion of the nation. It is time that these poor values such as cruelty to animals by exporting them by sea and other such cruel and ruthless methods be stopped and corrected. WE NEED HEALTH INSPECTORS AND INSPECTORS IN ALL AREAS AGAIN THAT IS NOT CORRUPTABLE AND TRAINED PROPERLY TO MONITOR AND INSTILL THE CORRECT VALUES AGAIN. With our new primative and uneducated ways we cannot advance and become better again unless such despicable practises are stopped. It is primative and place our country as a poor, uneducated encouraging primative practises. WE CAN BECOME THE GREAT COUNTRY WE USED TO BE WHERE NEARLY ALL HAD A HOME AND A JOB, AGAIN IF WE GET LAW AND ORDER BACK AGAIN. These poor practises pulls through and relates to our current poor education and overall poor condition of the country. Somewhere our designated leaders need to rise up and take up responsibility again and act with integrity and in the interest of the people and the country not their own interetsts, this is the reason our people are in the condition it is and the hiding behind apartheid after so many years while worse practises are covered by hiding like cowards under the mantle of apartheid to justify crueler and dispicable practises. 	2025-08-05 13:12:36	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals are suffering needlessly. There was a ship that docked in Cape Town some time back that was a point in case - the stench from that ship could be smelled for Kilometers ! Can you imagine the suffering of the animals on that ship ! To be locked up in such cramp and filthy conditions for weeks on end. How can that be considered humane and acceptable ? Then to make matters worse, those animals who arrive in at their destination alive, face inhumane and cruel deaths by people who have little or no concern for those animals. Rather create jobs for South Africans at local abattoirs where there are at least minimum standards and oversight, and then ship the packaged meat to the end users. This will create jobs, boost the local economy and stop this cruel practice of shipping live animals. Are we as a society so greedy and desensitised that we will continue to turn a blind eye to this cruelty?	Vanessa	Western Cape

	2025-08-05 13:20:42	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The true measure of a civilization is not in its infrastructure, its economy, or its military might—but in how it treats the most vulnerable among us: our elderly, our children, and yes, our animals. The moment we turn a blind eye to the silent suffering of creatures who cannot speak for themselves is the moment we abandon our claim to moral progress. The proposal to allow the export of live animals by sea is not just a policy decision. It is a moral failing. It is a stain on our humanity. These animals endure unthinkable suffering: weeks at sea in cramped, faeces-littered cages, exposed to heat, stress, injuries, disease, dehydration, and death. They are treated not as living beings, but as units of trade—commodities without souls. We are not merely stewards of commerce; we are stewards of life. To subject animals to such cruelty, in the name of economics, is to regress as a people. History will remember us not for what we built, but for what we protected. Let us be the kind of nation that chooses decency. Let us be the kind of government that upholds dignity—not just for its citizens, but for all sentient beings in its care. Stop the export of live animals by sea. It is not who we are. And it must not be what we become.	Kobus	Gauteng	business owner

	2025-08-05 13:28:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I firmly stand against the ongoing practice of live animal export via ocean vessels from South Africa to foreign countries. This method of transport is outrageous, unethical, and inherently unsafe. It subjects living creatures—sentient beings capable of feeling pain, fear, and stress—to inhumane conditions for prolonged periods. These animals are confined in cramped, unsanitary environments, often with limited access to fresh air, clean water, or veterinary care. Many suffer unnecessarily and, tragically, some do not survive the journey. As South Africans, we cannot continue to turn a blind eye to this cruel and outdated trade practice that contradicts the values of dignity, compassion, and responsible stewardship. The economic justification for this industry does not outweigh the moral cost. I call on the South African Government, the Department of Agriculture, Land Reform and Rural Development, and relevant authorities to: Immediately review and ban the export of live animals by sea, Enforce humane, local slaughter practices within South Africa's borders, and Promote ethical, sustainable agricultural exports that do not compromise animal welfare. We believe that South Africa can—and must—lead by example in protecting animal welfare while building a modern, ethical agricultural economy. It is time to put an end to the suffering. This petition is our collective voice. The animals have none.	Annelize	Gauteng	employed individual

	2025-08-05 15:05:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	These new regulations are too vague. If animals must be exported live then the regulations need to be very specific regarding feed, cleaning, space and temperature. There must be independent monitors to ensure that these regulations are implemented. We cannot have people from the department of agriculture being the monitors. We cannot allow animals to suffer in this way. Let the department focus on training rural farmers and see that their produce is distributed in our own country. Let the roads department fix the roads so that produce grown in rural parts of south africa can be moved to viable domestic markets. Another alternative is to slaughter animals in South Africa and send carcasses in freezer ships to other countries.	Mallorie

	2025-08-05 15:35:51	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The proposal lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. Many importing countries have animal welfare standards that fall well below those of South Africa. Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death.	Robyn

Animals suffer from fear and anxiety. They do not get fed or watered, and they are in cramped conditions. Many die on these long journeys. In this day and age, we should not practice live deportation.	Jeannette	KwaZulu-Natal	retired

	2025-08-05 15:57:52	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Has the stinking cattle ship debacle in Cape Town's harbour taught us nothing? What a deplorable event. It's outrageous that we're even having this conversation in 2025. Exporting live animals by sea is cruel, inhumane, despicable. These are sentient creatures. Anyone okaying this practice should experience traveling on a ship with these animals to see what horrific conditions they endure, how they suffer and/or die. Do the right thing - the intelligent and humane thing - ban this cruel trade!	Lauren	Western Cape	self-employed

	2025-08-05 16:03:32	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The export of life animals for slaughter is absolutely inhumane and has no place in any country that calls itself civilised. Animals such as sheep and cattle are intelligent, sentient beings who suffer enormous distress on these voyages. It is unnecessary to export live animals when facilities exist for exporting frozen carcasses. It is furthermore ridiculous to put the oversight for the welfare in the hands of an organisation which has a vested interest in not carrying out that oversight properly. That is corruption. This cruel practice should be stopped immediately.	Linda	Western Cape	employed individual

	2025-08-05 16:41:43	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This cruel practice should be banned. If animals were humanely processed here in South Africa, the meat could be exported frozen and also many more butchery and processing jobs would be created.	Jurgen	Western Cape	employed individual
	2025-08-05 16:41:51	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is a pity there are not enough options to give a full reply. I would have listed several concerns. If the new laws ensured future care and transport of live animals as shown in the video where Australia exports live animals under carefully controlled legislation and practise - then it could be considered. Anything short of that is unacceptable. The animals are live beings and every consideration must be given to their welfare. It must not under circumstance be allowed that they suffer torture, starvation, dehydration, illness or any other negative result due to individuals concerned about making money while not caring about the horrendous conditions during transport.	S N	Western Cape	retired

	2025-08-05 17:28:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The National SPCA has provided evidence of the stress these animals undergo at sea. It's unacceptable, the level of cruelty, the weeks at sea, only to be killed at their destination - then the people who eat the animals ingest the consciousness of that animal (their extreme fear following a torturous journey) when they get there. They're sentient beings and are aware, yet, they're treated like objects without feeling. I'm completely opposed to this ignorant practice. I've seen the photographic evidence of the animals living in their own feaces for weeks on board - the South African government shoud simply put a full stop to it. It's not OK at all. All life has value, all lives must be respected. We must treat animals as we wish to be treated. This is unkind, please end it and South Africa's association with the practice.	Jeanne-Ann	Gauteng	unemployed individual
	2025-08-05 17:29:34	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is absolutely no way whatsoever that live animals could be humanely transported by ship. The animals come off farms and feedlots and are subjected to transport to harbours and then loaded into confined spaces in the holds of ships. Animals that are used to living on firm surfaces with room to move are now confined and subject to the movement of the ship as it navigates hopefully calm sees, which is bad enough. The trauma they must go in a storm is too terrible to imagine. No regulations can change any of that and once ships leave our harbours the regulations are ineffective in any event. The countries that want our beef and lamb etc should set up proper slaughtering facilities here in South Africa. They can slaughter in accordance with their required rights and properly chilled carcases can then be sent to the required destination countries. My answer as to the desirability or ethics of transporting live animals by sea is not no, it is hell no. No debate.	Johan	Gauteng	retired
	2025-08-05 17:29:56	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We need to treat our animals as best we can. Having the animals caged for days on a rolling ship is just not human behavior. It just is not fair.	Clive	Western Cape	retired

	2025-08-05 19:28:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is a cruel and inhumane practice and should be condemned and ended with immediate effect. The suffering and pain and fear these animals have to endure on these ships of death are indescribable and the owners of these animals should be ashamed, knowing very well what lies ahead for them.	Rose-Marie Storm	Western Cape	retired
	2025-08-05 19:29:43	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Already the practice of ordinary, orthodox or halaal slaughter carries high suspiscion of animal suffering , the prospect of this being preceded by a long journey in the dark stinking hull of a ship and possibility of unmonitored abuse at sea, increased when there are delays on the seas or in port, is ridiculous in this day and age. I do buy and eat meat from a butchery- of animals who have been shot in their natural environment. I already think abattoirs must be hell on earth for sentient beings. But spending weeks at sea and then followed up with slaughter by bleeding to death on the other side, is not humane in my view.	Linda	Western Cape	retired

	2025-08-05 20:41:25	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	- The conditionsare inherently inhumane and result in disease, injury, suffocation, death and abhorrent conditions condemned by the SPCA. - It cannot be effectively regulated and regulations cannot guarantee welfare once animals are beyond national jurisdiction. - The Animal Protection Act, 1962 explicitly prohibits causing unnecessary suffering through neglect or cruel conditions. Live exports inherently breach this standard - Regulations lose legal effect once the animals cross borders. Enforcement is impossible, condemning animals to extreme cruelty and suffering. - New Zealand, the UK, and soon Australia, have legislated bans on live exports due to the moral and welfare failings exposed by the trade. South Africa must lead, not lag, in compassionate trade. - The draft regulations will not eliminate the suffering, deaths, or ethical failings inherent in live export. There is no humane way to transport sentient animals by sea for slaughter. The only acceptable policy is a complete and immediate ban.	Claire	Western Cape	employed individual

	2025-08-05 21:15:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is inhumane. Once animals are loaded onto vessels, they are subjected to prolonged journeys, enduring severe stress, motion sickness, physical injury, dehydration, and are housed in filthy conditions, living in excrement for an extended period of time. The unhygienic, dirty conditions contribute to infections and even death or animals reaching the destination needing to be euthanised. If humans are subjected to the same treatment on board a vessel, travelling jam-packed in the hold, with no facilities or ablutions, with minimal food and restricted water or no water after leaving port, standing in their excrement whilst thoroughly enjoying every second of their trip, then perhaps this manner of animal transport could be reviewed. Anything unfit for humans is definitely not fit for animals. Ban this cruel trade.	Natalie	Western Cape	self-employed
	2025-08-05 21:16:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal transportation by sea is clearly and widely known to cause immense suffering to the animals transported. 	2025-08-05 21:24:58	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The reality of live animal exports is a nightmare that too many choose to ignore. Countless animals are crammed into overcrowded, unsanitary conditions for long, grueling journeys, enduring extreme temperatures, hunger, dehydration, and injury. Many never survive the journey, suffering silently in their final moments. This inhumane practice treats sentient beings as mere cargo, with their well-being disregarded in favor of profit. The suffering endured by these animals is not just an isolated incident – it is a systemic cruelty that demands our immediate attention and action. We must stand against the exploitation of these vulnerable creatures and push for an end to live exports once and for all.	Glenda	North West	business owner

	2025-08-06 07:07:42	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Any form of trasporting live animals by sea is 'inherently cruel and inhumane.' This is not necessary. The Muslim Council of South Africa has already said an alternative could be found by implementing halal slaughter in SA and transporting frozen meat by sea. The animals are not going to the wilds of the Gobi Desert. They are going to sophisticated Arab countries that have airconditioning and refrigeration. Bowing to so-called archaic tradition is nonsense and should not be contemplated in a modern world. This is animal cruelty sanctioned by an immoral and cruel ANC government only interested in appeasing Muslim countries with no animal welfare laws.	Fiona	Gauteng	self-employed
	2025-08-06 07:08:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Stop inhumane practices that are still being carried out just for the sake of commerce.	Linda	KwaZulu-Natal	retired

	2025-08-06 07:08:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. I can buy previously frozen meat from Brazil at my supermarket. We can do the same - export frozen meat to other countries instead of exporting the live animal and subjecting it to cruel situations on sea. Please remember - "The greatness of a nation and its moral progress can be judged by the way its animals are treated." And please don't try to fix this unjust and unnecessary industry through regulation. I support a complete and permanent BAN!	Corrie	KwaZulu-Natal	retired
	2025-08-06 07:09:36	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	My concern is that once they are out of SA, we can't ensure their welfare. The suffering is immense and it's not right.	Louise	Western Cape	self-employed

	2025-08-06 07:17:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Mr Minister Steenhuisen, I am writing to express my deep concern and strong opposition to the exportation of live animals by sea from South Africa. This practice, in my view, is inhumane, outdated, and unnecessary, and it stands in stark contrast to the values of compassion, responsibility, and ethical treatment of animals that we as a nation should uphold. There is overwhelming evidence that animals transported by sea endure extreme physical and psychological suffering. They are often subjected to overcrowding, extreme temperatures, injuries, prolonged deprivation, illness, and in many heartbreaking cases, death. These sentient beings are not merely cargo — they experience fear, pain, and distress. The suffering they endure is simply unjustifiable. As human beings, and as South Africans, we have a moral obligation to protect the voiceless. We must hold ourselves to a higher standard and act in accordance with the principles of animal welfare and ethical farming. If we truly care about our country's global image, animal rights, and sustainable agriculture, we cannot allow this cruelty to continue. I respectfully urge your office to: Implement a national ban on the export of live animals by sea, following the example of countries like New Zealand. Promote and invest in the export of chilled and frozen meat products instead, which preserves economic value while eliminating unnecessary suffering. Support and incentivize local farmers to transition to more humane, sustainable practices, with government-backed assistance and training. Enforce stricter animal welfare laws and monitoring systems for any remaining transport practices. I, along with many concerned citizens, believe South Africa can be a leader in ethical agricultural practices. Ending live animal exports is a powerful and necessary step in that direction. Thank you for your time and consideration. I urge you to act decisively and compassionately.	Mandy	Western Cape	self-employed
	2025-08-06 07:17:48	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals are also sentient beings with a wide range of emotions …. How this practice can be tolerated by a civilised society is unbelievable. People are just choosing to turn their heads away and count the financial side not emotional. It's awful. Perhaps footage of the animals suffering should be put out on all media!	Fiona	Western Cape	retired

	2025-08-06 07:41:19	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Minister, Live Animal Export is an abhorrent practice which subjects hundreds to thousands of sentient beings to horrid torture. Those animals suffer from injuries and illnesses due to cramped and unhygienic conditions that cannot (or is never) adequately controlled and if those animals have not yet died from injuries and ailments before arrival, they are likely to die from overheating in the poorly ventilated holding space. These ships are no Noah's Arc, coming to save the human race one meat-based meal at a time. They torture and then send those victims off for an undignified death, either to be thrown off into the ocean for the sharks or killed after arrival. The people that do manage to consume those animals are no better off for it. The rich do not need to be richer at the expense of all others. NO TO LIVE ANIMAL EXPORT!	Nina

	2025-08-06 07:41:58	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The export of live animals is abhorrent in many ways. I think the government should rather work with the countries to which they export to ensure that animals can be slaughtered humanely in South Africa and frozen carcasses exported. This will increase job opportunities by the building and running of more abattoirs, better animal husbandry in South Africa. Animals suffer needlessly in ships, they die on route and the overall economic gain would be better if we could send frozen carcasses to the coutries. Many other countries are no longer exporting live animals and those that still do so, are starting to review these practices. South Africa needs opportunities for growth and this is a golden opportunity,	Lisa

	2025-08-06 07:43:15	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal exports by sea pose significant concerns, including: 1. Animal welfare concerns: Prolonged journeys cause stress, injury, dehydration, and death, making the practice inherently inhumane. 2. Lack of accountability and oversight: Insufficient monitoring and regulation enable animal suffering, and importing countries often have inadequate welfare standards. 3. Public health and biosecurity risks: Live exports increase the risk of disease transmission and spread, threatening animal and human health. 4. Moral and ethical implications: The practice raises questions about animal treatment, dignity, and rights, sparking debates about its morality. 5. Flawed economic justifications: Economic benefits are often overstated, while environmental and social costs are overlooked. 6. Regulatory limitations: Existing regulations are often inadequate, and enforcement is challenging, particularly once animals leave the exporting country's jurisdiction. Given these concerns, it's essential to reconsider live animal exports by sea and prioritize animal welfare, public health, and ethical considerations.	J M	Gauteng	self-employed

	2025-08-06 08:32:03	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals by sea subjects them to prolonged stress, overcrowding, and often inadequate food, water, and ventilation. The long journeys can expose them to extreme weather, injuries from rough seas, and the spread of disease, while limited space prevents natural movement or rest. In many cases, animals arrive severely weakened or even dead, raising serious animal welfare concerns. These risks make the practice inhumane and unnecessary when safer, more humane alternatives exist.	Nicolene	Gauteng	business owner

	2025-08-06 09:16:48	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am absolutely against these proposed regulations for the exportation of live animals by sea. This is not reform; it's an attempt to legitimise a practice that is inherently cruel and inhumane. Here's why the government must not pass these regulations: • Animal suffering is inevitable. No matter the conditions promised, transporting animals by sea for days or weeks causes extreme stress, injury, illness, and often death. These are sentient beings, not cargo. • Once exported, animals fall outside South Africa's legal protection. The welfare standards in many destination countries are far lower than our own, and South African authorities have no power to intervene once animals leave our waters. • Oversight is compromised. The Department of Agriculture proposing to appoint its own welfare monitors is a clear conflict of interest. Independent, credible oversight is absent. • Public trust is being undermined. Over 50 animal welfare organisations have already called for a full ban. Ignoring expert voices and public concern is a betrayal of the animals and the values South Africans hold. • This is a trade in suffering, not necessity. The government should be investing in humane, sustainable alternatives that support farmers and exporters without sacrificing animal welfare. No amount of regulation can make this practice acceptable. The only responsible action is to ban the live export of animals by sea completely.	Georgina	Western Cape	self-employed
	2025-08-06 09:17:33	No I do not	Yes I do	Yes I do	Animal Welfare	No I do not	The lack of respect and cruelty towards animals is UNBELIEVABLE !!!!!!!!!! It's bad enough that these gentle animals give their lives for us to eat but it absolutely unacceptable that they are treated badly within this process !!!! - and is a massive scar on the souls of humanity that animals in factory farming and in the ANY ANIMAL INDUSTRY are treated with this level of lack of rights, respect and general cruelty. The animals should be humanely and respectfully slaughtered in South Africa and then exported as frozen meat - otherwise the Arabs should raise their own livestock for consumption - but the transport of live animals via sea should be COMPLETELY BANNED !!!!!!! Aside from animal creulty - ALL the other concerns listed above apply - – accountability and insight – public health and bio security – moral and ethical AS ANY PET OWNER WILL KNOW - AND THIS APPLIES TO ALL SPECIES - ANIMALS HAVE FEELINGS & PERSONALITIES AND DESERVE OUR UTMOST RESPECT AND CARE - EVEN IF WE STILL CHOOSE TO EAT THEM !!!	Debra	Western Cape	self-employed

	2025-08-06 09:26:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is a very cruel act to allow these animals to suffer on long sea journeys only to be slaughtered on the other end. Surely it will make more economical sense to slaughter the animals in South Africa and send over the frozen meat. You would then ensure 100% of the animals are usable - no unnecessary lives lost or suffering endured; it would take less space to transport the meat - therefore cost less on export duties; less cleaning up on the ship afterwards - no animal excrement or carcasses to dispose of; and it would be more job creation in South Africa for the abattoirs.	Lynda	Gauteng	employed individual

	2025-08-06 11:21:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There should be no live export of animals. It is inherently cruel and causes great suffering to those animals. Many die on board before reaching their destinations, and those that do make it out 'alive' are hardly alive at all, having suffered terribly, with broken limbs, no water, no exercise, and too weak or stressed to eat and/or drink. Animals are living beings that should not be forced to suffer such journeys. Please immediately stop the shipping of live animals, you have the power to do the Right thing. Please stop the cruelty. Thank you.	Marlei	Western Cape	self-employed
	2025-08-06 11:22:07	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	It is understandable that the Meat is sold, however animals must be processed in South Africa and exported frozen. This way the extra trauma these animals are exposed to is kept to a minimum. If sales are lost to a cultural / blood thirsty issue so, be it. We live in the 21st century and these barbaric slaughter practices should be outlawed. Culture or religious reasons are not grounds for animal cruelty, humanely slaughter and transport must be adhered to.	Neil	Western Cape	retired

	2025-08-06 11:22:20	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Legislation will not help a practice that is inherently cruel. It needs to be outright banned. I don't think that legislation can make this better as our country does not have the resources to govern them. I also feel that where there is money to be made, people will find a loophole to make extra income. If you need to export meat, export carcasses or packed products not live animals that die in absolute misery. There are no words strong enough to condemn this barbaric practice. In Genesis 1:29, God states, "I give you every seed-bearing plant on the face of the whole earth and every tree that has fruit with seed in it. They will be yours for food.". This passage describes the initial diet God provided for humans, consisting of plants and fruits. The ten commandments also says, 5 You shall not kill.	Jesica	Western Cape	retired

	2025-08-06 11:42:08	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The people involved with the transport ships have made it very clear that they won't even pay lip service to the regulations and it would be naïve to think that they will adhere to anything they've agreed to once they're out at sea. They have no interest in the welfare of the animals they transport. I also think that the Muslim community of South Africa should be deeply offended by the justification for the transport of live animals. Their reasoning is that the animals must be slaughtered according to strict Halaal procedures when they arrive in the UAE. These procedures are already very strictly adhered to in South Africa. Not being prepared to purchase processed carcasses from South Africa calls into question the adherence of the South African Muslim community to a strict precept of their faith. 	2025-08-06 11:50:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The live export of animals by sea is cruel and stressful and sometimes fatal and as these trips take weeks the animals suffer for a long time. Animals can be slaughtered and the meat can be exported more easily and does not entail suffering of live animals. The goal of exports is meat at the end of the day so by exporting meat and not live animals the food is still going to where it is needed with no suffering and stress and cruelty of a long voyage for a live animal which is going to be killed on the other side anyway. Ghandi said "The greatness of a nation and its moral progress can by judged by the way its animals are treated" Please ban the live export of animals and focus on growing our meat export market instead!	Patricia	Eastern Cape	self-employed
	2025-08-06 11:51:24	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Unfortunately I have to say no even though I know that it would be beneficial from an economic point of view. Barbaric cruelty doesn't justify the income however. These days we know that animals suffer and understand more than we used to give them credit for. Definite no!	Helen	Western Cape	retired

	2025-08-06 11:51:26	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	The animals transported on these ships suffer immensely. Many are trampled to death, while others are forced to stand for days in their own feces without access to clean food or water. The conditions are neither hygienic nor free of disease. In some cases, pregnant animals give birth during the voyage, only for their newborns to die shortly after. There is no humanity in this process. It is driven purely by profit, with no regard for the welfare of the animals involved	Cheryle	Mpumalanga	retired

	2025-08-06 12:03:26	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live export is totally unacceptable in any form. Humans cannot deny the evident suffering the animals experience. To deliberately allow such suffering is ethically and morally indefensible, regardless of the reason, but more particularly if for the purpose of financial gain. It is against the law to allow an animal in your care into a situation which may cause it to be harmed or to harm itself. The animals on these export ships cannot due to logistics be properly accommodated or receive appropriate care. Once out of S.A. there is no monitoring of their health or welfare, AND WE KNOW THAT. The only alternative is to slaughter in S.A under properly monitored conditions and then do whatever with the meat. BUT to make the animals suffer this terribly , in order to save the money of this process a disgusting indictment of the level to which we as a nation and country have sunk. LIVE EXPORT OF ANY KIND MUST BE BANNED, IT IS THE ONLY CIVILIZED OPTION.	Sylvia	KwaZulu-Natal	retired
	2025-08-06 12:04:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Humanity has moved on from the Cave Man era . Shipping live animals around the world can no longer be justified on any grounds. Shipping live animals across the sea has the same moral and ethical issues as putting humans in concentration camps before gassing them to death in gas chambers. Animals are sentient beings and they have feelings like us humans do. The world has for a long time been moving frozen carcasses agross oceans. All the technology and infrastructure is in place to do this. Moving live animals by sea is primitive and inhumane and must be stopped forthwith.	Nigel	Western Cape	retired

	2025-08-06 12:25:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I have been following live export for a couple of years now and I honestly can't see how we would ever justify such a terrible ordeal for animals. It is not just the cruelty endured on the ships, but the inhumane treatment of animals in the destination countries. How can we close our eyes to what happens to them when they arrive in a destination with no animal rights protection. Being subjected to inhumane local transport and slaughter after surviving the horrors of the ship? I don't understand why we cannot slaughter them here under Halaal conditions, package the meat and ship that.	Jenny	Gauteng	business owner
	2025-08-06 12:27:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The animals are subjected to cramped conditions and have no access to food & water. They have to endure motion sickness and have to stand in their own excretement for the length of the journey. As previously experienced, a vessel that docked in one of our harbours created such a stench. Regulations might help, if enforced properly, but it will not solve the problem. Export of live animals should be banned totally.	Thys	Gauteng	retired

	2025-08-06 12:29:50	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I'm signing this petition because the transport of live animals by sea is cruel and unacceptable. These animals endure overcrowding, stress, extreme temperatures, and often die before reaching their destination. No living being should suffer like this for profit. There are more humane alternatives, and it's time we choose compassion over convenience. Watching footage of these journeys is heartbreaking—this is not the kind of world I want to support. I'm adding my voice to call for a complete ban on live animal exports by sea.	Natalie	Western Cape	self-employed
	2025-08-06 12:29:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I'm signing this petition because the transport of live animals by sea is cruel and unacceptable. 	2025-08-06 12:33:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals feel pain and suffering as much as any human would: to treat them different shows human lack critical intelligence or perhaps it's easier to turn a blind eye to this horrific cruelty for profit. END LIVE ANIMAL EXPORTS	Daniel	KwaZulu-Natal	unemployed individual
	2025-08-06 12:33:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Having worked in animal welfare for so long, it is not difficult to see that animals are sentient beings capable of fear, pain, suffering, separation from family, most animals form strong bonds with their own kind. No (live) animal should be placed on a ship, suffering a horrendous arduous trips to be slaughtered in foreign countries who have little to no animal welfare nor rules considered humane. Let us keep South African livestock on South African soil. Stop the perpetual cruelty to animals, livestock suffer enough emotional turmoil without being placed on such a terrible journey to 3rd world countries and dreadful slaughter practices. Let South Africa and South Africans stand proud and BAN THIS HORRENDOUS BARBARIC PRACTICE and encourage other countries to join us. PLEASE LET US MAKE SOUTH AFRICA PROUD TO STAND ABOVE THE CROWD AND SAY THIS IS OUR MORAL STANCE FOR OUR ANIMALS. NO MORE LIVESTOCK EXPORTS.	Wendy	Western Cape	retired

	2025-08-06 13:16:17	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not believe that any living creature should be subjected to such cruelty. No matter how many regulations get put in place to "protect" the animals wellbeing, there will ALWAYS be untold cruelty involved. Animals farmed for meat production are ONLY seen as commodities and not as living, feeling, breathing beings to be used, abused and exploited by man. Why deliberately put theses beautiful creatures through so much MORE pain and torture after already enduring a life of hell - it's barbaric! I am against eating meat because of the cruelty involved but I know the meat trade (sadly) will never end. But if they have to be slaughtered then we as humans do have the choice to do it as humanely as possible. Just like our pets at home, farm animals too need to be protected and have rights. It is way, way overdue!	Lana	Western Cape	employed individual

	2025-08-06 13:47:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not believe in the export by sea of any animals who are going to end up on a plate somewhere. It is shocking to say the least. Their legs get broken, being trampled by each other. packed like sardines on these ships. And they are at sea for days in this condition. It is horrific and should be outlawed. It sickens me how people treat animals in general but this is beyond sick. The fear those animals must be experiencing. The people doing this should be subjected to the same treatment and lets see how they like it. They wouldn't support it then.....	Val	Western Cape	employed individual

	2025-08-06 13:48:38	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. This cruel practice must be stopped and a more humane way must be found to transport these animals.	Karlie	Western Cape	business owner

	2025-08-06 14:21:44	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	I strongly oppose the live export of animals by sea. This practice causes extreme stress, suffering, and sometimes death for the animals involved. Instead of protecting animals, the proposed regulations appear to legitimise and extend a cruel trade that should have ended long ago. I support the call by animal welfare organisations to ban live exports completely. South Africa should lead with compassion and adopt more humane, ethical trade practices that do not involve sending live animals on long, traumatic journeys. The well-being of animals must come before profit. Would you do this to your loved pet at home? Animals should be treated with care and dignity — they all have a beating heart, and a brain that feels pain, fear, and suffering just like any of us.	Tammy	Western Cape	employed individual

	2025-08-06 15:22:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	In any society (so called civilised or not), cruelty towards any creature cannot be condoned and certainly not tolerated. The only humane solution would be to slaughter the animals before shipping and then ship the carcasses in refrigerated holds. Not only would this have cost saving benefits due to the considerable economic loss of animals dying in transit, but also a space saving, and thus cost saving, benefit due to efficient packing of carcasses and the elimination of feed and water. The quality of the meat on arrival would ipso facto be of a much higher standard and therefore presumably could demand a higher selling price. Of course new costs will be involved, slaughter, halal standards, cold storage etc., but the above savings should go a long way to offsetting them. It is the humane and ethical route to take.	Margaret	Western Cape	retired

	2025-08-06 15:22:52	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	The animal suffering is abhorrent. Those who have selected yes and I'm not sure should be transported instead. Many will die horrible cruel deaths just like the animals they do not care about.	Nikki	Limpopo	retired

	2025-08-06 16:34:15	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The sea freight of live animals for commercial purposes is profit driven and consequently overcrowding and lack of care will take preference over the welfare of the animals in transit.	Graham		
	2025-08-06 16:35:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries—such as Kuwait, Saudi Arabia, the UAE, and Mauritius—have animal welfare standards that fall well below those of South Africa Live export by sea also poses serious risks to public health. The mass movement of animals across borders significantly heightens the risk of zoonotic disease transmission.	Virginia		self-employed

	2025-08-06 20:00:14	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Please join me in submitting your views ... John Steenhuisen has called on the public to comment on I believe that animal suffering on livestock sea vessels is cruel and outdated, just like slave ships. The debate regarding animal rights is no longer considered marginal or eccentric. If we argue that it's culturally 'normal' to cause animal suffering, we are simply reverting to 'dark ages' thinking - in which our lives, and that of our fellow animals (yes, we humans are scientifically part of Kingdom Animalia), is cheap. Surely we can aspire to something better?	Gillian	Gauteng	self-employed

	2025-08-07 07:39:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	In South Africa we already changed from transporting live animals to abattoirs to building abattoirs in the animal production areas to eliminate the transporting of live animals over long distances. It is better to transport refrigerated carcasses over long distances in stead of live animals. Even from an economic point of view, transporting refrigerated end products is more efficient, as the trucks do not have to stop at regular intervals to let the animals drink water, as per Government regulations.	Petrus	Gauteng	retired

	2025-08-07 08:04:08	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn't end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply.	Olga	Western Cape	business owner

	2025-08-07 08:49:33	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Exporting live animals by sea for human consumption is cruel and unnecessary. They should be slaughtered at a South African abbatoir and the carcasses exported frozen. They can be slaughtered in accordance with any religious ritual if necessary, and duly certified. It is inhumane to export live animals on ships where they live in a confined unhygienic pen from loading in port of origin to off-loading at the destination. Add bad weather to that, and it is beyond inhumane.	Barbara	Western Cape	employed individual
	2025-08-07 08:49:57	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Last year I woke up to a vile stench hanging over Woodstock. It had even seeped into my car. It was the cattle ship that had docked in Cape Town harbour. It alerted me to the dire conditions for animals being exported alive. There is another way to export meat. I support a ban on live export of animals. We cannot be complicit in the horrific practice. Please let's be the change we want to see in the world.	Joelien	Western Cape	employed individual
	2025-08-07 08:50:34	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is cruel and totally unnecessary to export live animals by sea. I don't believe that humans are capable enough to take care of those animals welfare property. The government should not allow it.	Lisa

	2025-08-07 08:56:36	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This trade should be completely stopped. And immediately. I was not even aware of this practice and it's very troubling. If it is truly necessary to export live animals, then the best regulations need to be in place. Animals, like people, can suffer, feel pain, fear, hunger and thirst. Who knows what happens to the poor animals. This is so wrong in every way. The Bible, in the wisdoms of Solomon, speaks about the wise man and the treatment of animals. Why do we need to sell our livestock anyway? When meat prices are already so high? Someone's getting rich somewhere at the cost of our own people, country and animals. Everything about his is just wrong.	Irene	Gauteng	employed individual
	2025-08-07 08:56:57	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animals should not be transported by sea, they should be slaughtered locally and the fresh carcasses be exported. The quality of the meat would in any case be far superior. Alternatively frozen meat can be exported.	Adi	Western Cape	business owner
	2025-08-07 08:57:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Its barbaric, shocking and upsetting to know that they go through such a terrible "end of life" process. This should be banned completely.	Deborah	Western Cape	self-employed

	2025-08-07 09:40:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This has for many years been an animal welfare issue and the South African government should stand up for the animals that are sentient beings. The South African government should prove themselves to be bigger and better than any other lowly country that exploits animals for profit - prove that you have it in you to be bold, be strong, be compassionate. Prove to the world that we can be a first world country and care for all living creatures - humans and animals alike.	Helen	Gauteng	employed individual
	2025-08-07 09:41:36	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	No animals should ever have to go through this ghastly trauma. No animals should ever be transported like this. Please stop this abhorrent practice	Janine	Gauteng	retired
	2025-08-07 09:42:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The sea is not live animals natural habitat and will obviously cause a lot of anxiety.	Gideon	Gauteng	retired

	2025-08-07 09:45:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	While the rest of the world is going forwards, South Africa is going backwards. Catch up or get out of trying to rule a country. The people have had enough of this barbaric, greedy and manipulative mindset. Our country could be thriving with the right government. What we voted for so many years ago, was not this!!! We voted for equality, fairness and we have been stabbed in the back. The Western Cape needs to become independent now, the longer we drag this out the worse the situation is going to get. People follow the money and if we are successful in the WC, we are going to have a huge influx if undesirables. The borders need to be shut!!	Jennifer	Western Cape	retired
	2025-08-07 09:45:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Why must these animals go through such a terrible life ending journey (even if they are fed, watered and not over crowded on these ships) and then be slaughtered in another country? And how are they slaughtered? Humanely? Why are they not slaughtered here and the meat exported in freezer containers? Simple! This is just all for themlove of money!	Marianne	Gauteng	retired

	2025-08-07 09:58:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is inhumane. The very nature of the practice ensures that suffering will happen. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration and dirty living areas for their time on the ship. The environment on board, in pictures I have seen, is horrific. Animals standing / lying in the own waste. The smell must be horrific. The live export trade is a moral failure on the human side. It prioritises profit over the wellbeing of animals, turning a blind eye to their suffering for the sake of economic gain. We need to look at why other countries have banned this kind of trade. They seem to have a clear moral and scientific precedent that South Africa should follow.	ANNABEL	Eastern Cape	employed individual

	2025-08-07 10:03:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We have seen and, worse, smelt the death and inhumane treatment of livestock on these vessels. They are not sufficient nor capable of transporting livestock in a safe, humane and healthy way. Beyond the animal welfare, ethical or moral issue, there is an issue on health and environment. The risk of disease and the awful smell of ammonia was a huge risk to South African, its people and industries, as well as a blight on tourism in our port cities! The counter argument of the need for live animals for religious slaughter is mute. These animals could be slaughtered per religious guidelines in their home country. Even then, these practices are illegal in many non-Muslim and non-Jewish countries because of the cruelty involved. Nonetheless, the importing countries have options in the global free market. Ubuntu and Indalo ithobekile, kodwa iyohlwayeza xa ingahlonitshwa are not being upheld if this is the way South Africa moves forward....	Dylan	Outside SA	employed individual

	2025-08-07 11:18:32	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	We have become an unfeeling, insensitive and cruel race. It is always about us and screw the wildlife who dares to share the planet with us! What has happened to our humanity? Anyone who sees the conditions that these animals have face from the length of the journey, to no natural light (I mean 6 decks!), to dead carcasses that aren't removed, to urine and faeces that they have to live in fror weeks at a time. It's about time we banned this barbaric and archiac behaviour! I mean honestly I wouldn't want to eat that meat with all the antibiotics, etc., that they have had to be injected 'to be (appear) healthy'! Could we please grow a spine and outlaw this cruel and unnecessary shipping of animals by sea. If the Middle East wants to eat cattle, etc., raise them yourself instead of relying on other countries to supply them!	Helga	Gauteng	unemployed individual
	2025-08-07 11:18:47	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I have been involved with the transport of animals by Air and even then where the trip is normally not more than 7 Hours , animals die to crowding , handling stress , I do believe that this is really not a good idea and urge the authorities to do away with this very inhumane method of transport it would be much better to have t he animals slaughtered in the country of origin then the frozen meat be exported through the relevant mode of transport Totally against transporting animals by sea	Paul	Gauteng	business owner
	2025-08-07 11:19:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Anschke	Gauteng	self-employed
	2025-08-07 11:20:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Minister Steenhuisen, it is a crime to subject livestock to such inhumane treatment. A vehemently NO to life transport.	Ulrike	Gauteng	retired
	2025-08-07 11:21:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	No life should be treated as general gargo and be put into a ship. The middle east use these animals for religious slaughter and although it maybe profitable for the farmers its not ethical to traumatize animals period.	Derasen	Gauteng	business owner
	2025-08-07 11:21:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This a disgusting and heartbreaking practice. Many call it "inhumane" (defined as "without compassion for misery or suffering; cruel"), which of course contains the word "human". A society that condones the treatment of vulnerable animals that way likely does the same to vulnerable humans, including women, children and the elderly. There is absolutely NO reason why this practice should continue. Why would you send live animals (which supposedly need to be fed, watered and cared for) when it's much cheaper, easier and much less of a logistical nightmare to transport the meat? When all else fails to make reasonable sense, look to our corrupt government for answers, and their continued relationship with countries, organisations and individuals that have no desire to put the "humane" in "human rights", much less the rights of animals.	Jay	Gauteng	self-employed

	2025-08-07 11:29:26	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	What I don't understand is that halal meat is supposed to be 'clean' and 'humanely slaughtered.' In essence, halal meat is not just about the method of slaughter; it also involves the ethical and humane treatment of the animal throughout its life, ensuring that the meat is prepared according to Islamic dietary laws. How does the transportation of live animals align with this requirement? It seems that this practice is primarily driven by economic gain.	Caryn		self-employed
	2025-08-07 11:31:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly oppose the live export of animals by sea. Scientific evidence and global precedents consistently show that this trade results in extreme animal suffering, including overcrowding, heat stress, injury, and prolonged deprivation of food, water, and veterinary care. South Africa should be aligning with progressive global standards by banning this practice outright, not attempting to legitimise it through regressive regulatory reform.	Rebecca	Western Cape	employed individual

	2025-08-07 11:36:50	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	While I understand the need for South Africa to expand import markets in the face of US tariffs, this should not be at the expense of animal welfare. Until such time as the SA government is able to propose regulations which are fully approved by animal welfare organisations and which are able to be fully enforced to ensure the wellbeing of transported livestock, this presently barbaric practice needs to be prohibited.	Barbara	KwaZulu-Natal	retired

	2025-08-07 11:38:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The reasons for live animal transport are mainly economic - costs less than being slaughtered, prepared, frozen, packaged in SA prior to being exported, then religious belief & fresh meat taste. SA subjects humans to abuse & so much more it's animals. If this procedure can be stopped it is a small step in achieving a humane treatment of our animals. By slaughtering in SA there will be some job creation, which in turn will benefit our unemployed people. There will be no economic loss, as the meat would still be in demand. Please consider the harm sea voyages cause to the animals themselves & refrain from this practice. In SA live animals are supposed to be transported to the nearest abattoir from their farm/ feed lot situation, by law. This practice is to ensure less discomfort, injury & stress to every individual animal.	Gillian	KwaZulu-Natal	retired
	2025-08-07 11:39:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This practice should be banned. PERIOD!	David	Western Cape	retired

	2025-08-07 13:53:55	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Surely, as a nation that has been very vocal about ill-treatment, oppression and rights of the living, we are better than this. All living things feel and fear, and can therefore be abused. Transporting live animals by ships is nothing less than large scale abuse, inhumane, and is a reflection of a lack of compassion for another life. I accept that some countries do not have enough meat or the desired meat to satisfy their needs, but if this is the case, then slaughter the animals humanely in South Africa, in line with any religious requirements, and then export the frozen meat. That is what a humane society would do.	Corinne	KwaZulu-Natal	self-employed

	2025-08-07 14:06:35	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The South African government must prohibit this trade by banning the exportation of life animals at sea due to the following reasons: 1. Severe Animal Welfare Concerns Live animals transported by sea often endure extreme suffering due to overcrowding, inadequate ventilation, extreme temperatures, poor hygiene, and lack of proper veterinary care. These conditions frequently lead to injuries, disease, and even death before arrival. 2. Incompatibility with South Africa's Animal Welfare Commitments South Africa has national laws and international obligations that promote humane treatment of animals. Live export by sea contradicts the Five Freedoms of animal welfare, particularly freedom from distress, discomfort, and pain. 3. Environmental and Public Health Risks Live export ships generate large volumes of waste and can pollute harbours and marine ecosystems. In addition, the spread of zoonotic diseases (from animals to humans) poses risks to public health and agricultural biosecurity. 4. Reputational Damage to the Agricultural Sector Graphic footage and reports of suffering during live exports harm South Africa's international reputation and can lead to consumer backlash and reduced demand for South African animal products. 5. Viable Alternatives Already Exist South Africa can support its agricultural economy through the export of processed meat under strict humane slaughter standards. This creates more local jobs, adds value to the economy, and eliminates the need for live animal transport.	Carien	Western Cape	self-employed
	2025-08-07 14:09:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is no place for the inhumane and archaic transfer of animals by sea. What may be a beneficial solution for South Africa and the destination countries would be to set up the required abattoir facilities here, overseen by the foreign bodies and our own NSPCA (as is the case at all places for slaughter in SA). Benefits are myriad - no need for weeks at sea and the horrors that go with it - economic boost for the local economy - destination countries still receive halaal meat - it can be frozen at source and shipped frozen - local job employment - value add within SA adding to greater economic returns	Michelle	Western Cape	self-employed

	2025-08-07 15:50:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am writing to formally submit my comment regarding the proposed regulations for the exportation of live animals by sea. It is my considered view that this practice is both unethical and cruel, subjecting animals to immense stress, suffering, and trauma over extended periods. The conditions on board live export vessels often fail to meet even the most basic standards of animal welfare, resulting in significant physical and psychological harm to the animals involved. While I acknowledge the effort to introduce regulatory controls, the proposed regulations appear to legitimise and entrench a system that inherently causes harm. True progress in animal welfare would be to ban the export of live animals by sea entirely, as urged by numerous animal welfare organisations in recent years. South Africa has the opportunity to demonstrate leadership in ethical and humane treatment of animals. I respectfully urge the Department to reconsider its approach and prioritise a complete ban on this practice rather than attempting to regulate it. Thank you for the opportunity to provide input on this critical issue. I trust that the voices of concerned citizens and animal welfare advocates will be meaningfully considered. 	2025-08-07 15:51:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As an animal scientist myself, I can understand the value of live exports. However, the current practice does not take animal welfare and animal ethics seriously. There are several factors that can be considered to improve the welfare of the animals used as live exports. These factors should be incorporated and become standard practice before live exports continue. There is an opportunity here to pioneer. Currently, we export live animals because the countries we export to have regulations surrounding slaughter that needs to be adhered to, but we can ensure that the slaughter is humane and up to their code of conduct, allowing export of fresh meat rather than live animals. The live export of livestock is a long and stressful process for the animals, compromising the quality of life and the product we are exporting (occurrence of DFD and PSE meat) due to high stress levels.	Lize	Gauteng	employed individual
	2025-08-07 15:54:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Long periods of confinement on the voyages can last days to weeks, during which animals are confined in cramped conditions. There is often insufficient ventilation and overcrowding which can lead to heat stress, respiratory issues, and even death. The build-up of urine and faeces leads to unsanitary conditions, increasing the risk of infection, injury, and the spread of disease. Many ships lack onboard veterinarians or sufficient medical supplies, leaving sick or injured animals untreated. My research shows it is not uncommon for voyages to have significant animal losses, with carcasses sometimes being thrown overboard. It all seems cruel and inhumane.	Tandy	Gauteng	business owner

	2025-08-07 15:59:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	In this day and age, to treat animals in such a disgraceful manner is nothing short of despicable. There can be absolutely no doubt about the suffering that these animals are forced to endure during these extended and unstable voyages during the course of which many are trampled to death. It stands to reason that transportation of animals by road is extremely stressful in itself and then to be followed by an extended sea voyage no doubt increases those stress levels off the charts. For this reason alone, if a country is to be judged by the degree of humanity with which it treats and protects both its domestic and wild animals, then this cruel practice ought to cease without delay because it is both immoral and unethical.	Charles	Gauteng	retired

	2025-08-07 17:38:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I urge the Minister of Agriculture and the Government of South Africa to ban live animal export by sea. This practice is one of the most inhumane practices that we as humans have ever made ourselves guilty of. The export of live human beings or Slave Trade was abolished in South Africa in 1838. As a country that upholds freedom, we cannot now transport living beings such as domestic or wild animals, by sea under the cruelest conditions I have ever witnessed. Domestic animals die to provide us with nutrients, but they should not be made to suffer pain, deprivation of food and water, mortal terror and unbearable temperatures before they make this sacrifice. They die to feed us, do not torture them before they die.	Ingrid	Gauteng	self-employed

No other means of transport is acceptable as the animals suffer unnecessary pain and fear. Transporting live animals is cruel and torturous.	Anna		retired
	2025-08-07 17:58:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	If there's one thing in life that I can't agree on and make me angry and sad, it's the abuse of animals. God put the human on earth to look after animals of all species. To let the animals be transported by sea is cruel and against God's commandment, therefore it must be stopped by all governments and especially South Africa who have wonderful wild and cosmetic animals. Please Mr Ramaphosa change the law to protect all animals	Janna	North West	retired
	2025-08-07 18:00:20	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	By continuing to allow the live export of animals, the South African government is responsible for subjecting animals to extremely cruel and inhumane conditions just like those which were faced by slaves on their journeys to the colonies. Although animals are of lower intelligence than humans, it is scientifically proven that they are sentient and have the capacity to feel joy, pain, sadness and grief. Some species even experience a condition comparable to PTSD in response to trauma, such as the physical and emotional trauma which live animal exportation inevitably incurs upon them. As a nation that is meant to stand for equality and justice, the archaic, slavery-like practice of live animal exportation is clearly not in alignment with our values as South Africans. I strongly urge the South African government to step up and ban this atrocious practice, in order to protect the wellbeing of all sentient beings, human and animal alike, and prove its commitment to the values of justice, compassion and humanity.	River	Western Cape	student

	2025-08-08 09:32:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals face overcrowded, unsanitary and stressful environments: high levels of ammonia, inadequate ventilation and the inability to rest or access feed/water. Trauma: heat stress, motion sickness, illness and injury are common, with many animals suffering before death. Most livestock ships are converted vessels(old cargo or car vessels), not designed for live animals, increasing risks of structural failure, accidents and welfare violations. These ships generate high levels of sewage and untreated animal waste contributing to marine pollution. NB: Incidents like the "Al Kuweit" vessel docking in Cape Town exposed extreme suffering - animals were found standing in waste with several animals euthanized due to injuries or illness.	Dawie	KwaZulu-Natal	self-employed
	2025-08-08 09:37:08	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. 	2025-08-08 09:44:46	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	LOOK INTO THE STUDIES UNDERTAKEN WRT STRESS. THE MEAT THAT IS HARVESTED AT THE END OF THE PASSAGE BY SEA IS NOT OF THE BEST QUALITY. BUT FIRST AND FOREMOST THE SUFFERING OF THE ANIMALS IS DREADFUL. EXPORT MEAT ALREADY SLAUGHTERED - SURE LESS PHYSICAL SPACE WILL BE TAKEN UP AND THEREFORE MORE CAN BE CRAMMED INTO THE SHIPS HOLDS FOR THE SEA PASSAGE. IF CORRECTLY SLAUGHTERED THE MEAT WILL BE OF A MUCH HIGHER QUALITY - YOU DO THE MATH! TRANSPORTATION CONDITIONS WILL NEVER NEVER NEVER TAKE INTO ACCOUNT ANIMAL WELFARE!!!!!	Jeni	Gauteng	employed individual
	2025-08-08 09:46:43	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I can suggest that the South African government must try to hear from those countries what are the reason for not farming and decided to import live stock. If those countries cannot farm because of weather conditions like Saudi Arabia as I know it's very hot on that side, then government again must try to know those countries they want to farm only or they want to farm because they want to produce fresh food like diary prod meat and so on. Then the government can come with a decision that they can export those products directly to them by opening directly vessel that will travel between those countries and SA if there is no existing one. I thank you.	Khayalethu	Western Cape	employed individual

	2025-08-08 13:04:52	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Mr Steenhuisen, No regulation can ensure the wellbeing of animals exported live on any vessel. For this reason, live export of any animal, for whatever reason should be completely banned. Any form of transport is traumatic for animals, even more so on a ship, sailing for days and even weeks. In addition, can you imagine the panic these animals experience during the boarding and off loading, and that is not even where their journey starts or ends. They are transported over long distances on land before reaching a harbour and again at the destination. There is just no justification for this cruelty to innocent animals. Please let this stop.	Ida	Western Cape	retired
	2025-08-08 13:15:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Responding 'no, I do not' to 'supporting the proposed regulations' is based on their being an attempt to white-wash the reality and inevitability of continued suffering at sea and onwards. It is not because I oppose the principle of regulation Animal welfare has to be the main concern: it is not only obvious, but it has been documented and therefore evidenced to date with mere regulation unfit for the purpose of ever making this practice acceptable. This is utterly predictable and should not be allowed to run its course simply to benefit a few. Operating a closed shop for monitoring the export of live bovine and ovine stock by sea only indicates intention of moral corruption, irrespective of narrative Over and above biohazard and human safety during these voyages is national pride. South Africa cannot afford to rate so low on the scale of sentience protection. It flouts acceptable human conduct (good governance and production practice), violates generic animal law, is unethical and now - based on truth, fact and knowledge - inescapably immoral, and opposes social license - to which, after all, any government is answerable	Sarah	Western Cape

	2025-08-08 14:25:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting livestock by sea is widely considered unsafe for the animals, the crew, and the environment due to the use dangerously old vessels. Most livestock carriers are converted from general cargo or car carrier ships, not built for live animal transport, leading to significant welfare and safety risks. The conditions on these ships are detrimental to animal welfare. Inadequate ventilation leads to high ammonia levels, causing eye irritation and sometimes blindness in cattle. Poor ventilation and high temperatures, especially in summer, result in heat stress, with hundreds of animals dying on poorly ventilated vessels. Animals are often forced to stand on hard, concrete or metal decks for days or weeks without adequate space, food, or water, leading to injuries, fatigue, and disease. There are no official time limits for sea journeys, and delays due to port refusals or other issues can trap animals on ships for months. There is often lack of veterinary care for the animals during these trips and overall, the current system of sea transport for livestock is not safe and poses severe threats to animal welfare, crew safety, and the marine environment. 	2025-08-08 16:05:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Most recent memory is of a livestock vessel from Brazil en route to Kuwait and the Middle East docked in Cape Town harbour. There were significant deaths and injuries to livestock on board. This also made the whole city smell like an abattoir for the duration of the vessels stay in Cape Town. Whilst I am sympathetic and understanding of cultural and religious practice of some nations and communities requiring live animals prior to slaughter, I do believe there should be an alternative to shipping livestock by sea. The trauma caused by livestock travelling by sea is far greater than it needs to be. I think for the welfare of our animals this practice should be banned and SA can be a nation that doesn't contribute to the unnecessary suffering of livestock to satisfy a small commercial benefit. There are surely enough other methods to satisfy the commercial gains for farmers exporting livestock.	Garron	Western Cape	employed individual

	2025-08-09 12:25:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is no logical reason why the animals need to be exported alive - we have systems in place by the relevant religious parties to ensure they are slaughtered according to their religious requirements. There is no reason the animals cannot be slaughtered in South Africa & exported frozen to the relevant countries.	Amanda	Gauteng	retired
	2025-08-09 12:50:09	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Humans are inherently cruel, especially towards animals, in that they do not care for the wellbeing of live animals if it costs money or is too much trouble. Why is it important for live beasts to be transported if they can be humanely butchered and frozen thus saving them weeks of discomfort. Economically it is better to transport frozen beasts whereby more can be shipped at one time!	Nicholas	Eastern Cape	retired
	2025-08-09 12:53:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Stop the Cruelty – Ban Live Animal Exports by Sea Every year, thousands of South African animals, mostly cattle to Mauritius and sheep to the Middle East, are crammed onto ships for long, terrifying journeys across the ocean. Once they leave our shores, they leave behind every protection our laws can offer. On board, they face: • Weeks of extreme heat and suffocating conditions • Overcrowding and filthy pens • Limited access to clean water • Seasickness, injury, and death Animals do suffer on livestock sea vessels. Cruelty is built into the very nature of live animal export. The extended confinement, harsh environmental conditions, overcrowding, and lack of adequate veterinary intervention make such suffering inevitable. The proposed regulations cannot ensure animal welfare. Allowing the Department to appoint its own “monitors” compromises the process, removes independence, and destroys transparency. True oversight demands impartial, qualified, and independent inspectors — not individuals with a vested interest in keeping the trade alive. I call on the South African government to ban live animal exports by sea entirely. Once animals leave our shores, they are beyond the protection of our laws and often end up in countries with far lower welfare standards. I do not support the proposed regulations. They serve only to legitimise an inherently inhumane practice that should be abolished, not regulated. Every day on board is sheer terror and suffering until they arrive at their fate — often in places with weaker welfare protections than ours. Last year, 52 animal welfare organisations pleaded with government to end this cruel trade. Instead, new rules are being pushed forward with “monitors” chosen by the very department that wants exports to continue. This is not independent oversight — it is a conflict of interest. This can end, but only if we speak for those who cannot speak for themselves. Because no amount of regulation can make cruelty kind.	mathanzima joseph	Western Cape	employed individual
	2025-08-09 12:53:18	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The exportationof live animals by sea, aslong been a horrific practice, and called "The ships of hell". Unspeakable cruelties happen to these dumb creatures, on these ships. They are treated like any ordinary cargo would be treated, they way they are handled, fed or watered, jammed together, and even put onto the ship, not including the journey there, where its much the same. They are going many times to be slaughtered inhumanely anyway here in South Africa. This only involves finance, and what is convenient for people, who (if they treat animals like this) will not hold much value for human life. This does not bring profit. Rather let these creatures (raised to be slaughtered inhumanely in South Africa too), at least be taken from a place of rest. This profits no-one. NO! NO! NO! Speak up Animals organizations. Speak up South Africans!	Glenys	Gauteng	employed individual

	2025-08-10 15:19:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Veterinary experts have confirmed that the new regulations, far from securing greater animal welfare standards, actually all leave animals much more vulnerable to abuse. The conditions under which animals travel have repeatedly and conclusively been found to be inadequate. It is almost guaranteed that animals will suffer enormously on the ships. And finally, as a Capetonian living in the city bowl I experienced the overwhelming stench from the delayed animal transport ship that docked in Cape Town harbour in 2024 and I followed up and read the reports following that incident. I am horrified that for the sake of commerce, my country allows such cruelty.	Bonita	Western Cape	self-employed
	2025-08-10 16:07:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The transporting of live animals by sea is totally cruel and inhumane. They have to endure horiffic conditions for weeks or even months on end. An end to this cruelty must be implemented.	Gillian	Gauteng	retired

	2025-08-10 18:27:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I lived in Kuwait for 10 years. Their government does not take kindly to criticism. Foreigners' reasoning with them don't get very far. Generally, they are not greatly concerned about animal welfare (with some exceptions). Animals are kept in terrible conditions at the "Friday Market." I had a slow loris saved and kept in the lounge in a large aviary. My daughter rescued a rabbit. I continue to pray for a missile or bomb to destroy that market and relieve the animals from their dreadful lives. Some expats keep pets, often rescued from there. When Ramadan is near, a sheep is kept on a rope with a peg in the ground outside the villa, pending slaughter, which is done openly. A few months ago, I saw the newsreel of sheep being loaded on board a ship bound for Kuwait. It turned my stomach and broke my heart, I emailed the SPCA head office but received no reply. I have no confidence in John Steenhuisen and think the government will just brush him off. He's like an old lady with wet pants. Sad to say, Hendrik Schoeman was a better man for the job (not his party, just the man.)	Garth	Gauteng	retired
	2025-08-10 19:02:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The conflict of interest renders the proposed legislation suspect and insufficient in terms of protecting animals from cruelty.	Brian	Eastern Cape	employed individual
	2025-08-10 19:28:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The fact that this cruel practice has continued for so long is indicative of leaders who don't care about the plight of these defenseless and vulnerable animals. Their priority is money. Live export is a disgusting practice and should be banned outright.	Colleen	Western Cape	retired

	2025-08-11 08:40:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	These new regulations are a way to continue the harmful practice rather than address the animal welfare concerns. The inherent cruelty of long sea voyages, issues like heat stress, overcrowding, and inadequate access to food, water, and veterinary care will mean additional costs for these transport companies and reduce their profit margin. Transport companies will therefore not comply with or agree to these "new regulations", nor will there be regulation of the implementation of these regulations by the SA government. This will only create another opportunity for fraud for the SA government and the SAPS. Furthermore, the animals often face inhumane slaughter methods upon arrival at their destination. Rather slaughter these animals humanely in SA and export the carcasses.	Carina	North West	employed individual

	2025-08-11 16:07:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not support the export of live animals by sea. This practice is inhumane and subjects sentient beings to prolonged suffering for the sake of profit. Transporting animals over long sea voyages—sometimes lasting several weeks—exposes them to extreme and unnatural conditions that compromise their health and welfare. During these journeys, animals are confined in overcrowded pens with little space to move, lie down, or escape from aggressive interactions. Ventilation on live export ships is often inadequate, leading to heat stress, particularly when sailing through warm climates. In severe cases, animals can collapse and die from overheating—a slow and distressing death. The constant motion of the ship and lack of stable footing contribute to injury, lameness, and exhaustion. Hygiene is also a major concern: animals stand and lie in their own waste for days or weeks, which increases the risk of skin infections, respiratory illness, and eye disease. Food and water supply may be limited or contaminated, and sick or injured animals often receive delayed or no veterinary care. Scientific studies and investigations—such as those by the World Organisation for Animal Health (OIE) and RSPCA Australia—have documented high mortality rates, as well as chronic suffering, during live export voyages. Mortality is only the tip of the iceberg: for every animal that dies at sea, many more endure prolonged distress, pain, and fear. Transporting chilled or frozen meat is a humane alternative that eliminates this cruelty. In an age where technology allows us to ship products without subjecting animals to weeks of hardship, live export by sea is simply unnecessary and ethically indefensible.	D	Gauteng	employed individual

	2025-08-11 16:33:42	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Conditions of these live animal transport ships, be it to the middle east, Mauritius or wherever, have been often reported as being cramped, cruel and unhygienic. If these country's want our livestock transported alive they would have to subscribe to the most stringent animal welfare standards, but because SA has shown itself of being incapable of passing such legislation and moreover, of enforcing it, I believe the animals should be humanely slaughtered in SA (Halal fashion or otherwise) and the meat transported in refrigerated containers abroad. There's no other way.	Nick	Western Cape	self-employed
	2025-08-11 16:38:32	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Put yourself in the place of these animals. How would you feel in a completely strange and volatile situation that you have no control over and don't understand? These animals rely on human beings for their wellbeing and we have a responsibility to treat all animals humanely. An alternative and humane means of exporting these animals must be found.	Beverley	Gauteng	self-employed

	2025-08-11 19:20:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As stated in the Animal Welfare document: "Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn’t end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply." This statement basically sums up my concern and main reason for my objection.	Damian	Gauteng	employed individual

	2025-08-12 11:36:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa exports thousands of live animals by sea each year, mainly cattle to Mauritius and sheep to the Middle East. Last year 52 animal welfare organisations urged government to ban this cruel trade. Instead, they’ve proposed new regulations in an attempt to legitimize and perpetuate this harmful practice ANIMALS HAVE NO VOICE , Hence people exploit them for money - the cruel conditions they are subjected to at sea are unacceptable. all the animal right organisations have registered objections. Poor cruel unhygienic, overcrowding, starvation, confined enclosures - there are heartbreaking videos attesting to this. there is NO need to transport live animals this slaughtering should be done in SA and then exported This cruel practice must stop -	Wendy	Gauteng	business owner

	2025-08-12 14:37:58	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Subjecting live, conscious beings (animals) to this very cruel experience causes them extreme and unnecessary suffering. This was evidenced in February 2024, when Cape Town was overwhelmed by a nauseating stench that blanketed the city, traced to a livestock carrier ship named Al Kuwait docked in the harbour. The vessel was transporting approximately 19,000 live cattle from Brazil to Iraq, and had been at sea for over two weeks before making an emergency stop in Cape Town to refuel and restock supplies. The stench was the result of animals being held in small spaces and defecating where they stood. It is disgusting that any civilized human being would allow such callous and inhumane treatment of animals. South Africa has a moral duty to ensure that such barbaric practices are not allowed. The country is widely praised today for its stance on human rights issues such as the Gaza genocide, but its position on animal cruelty does not match the standards it sets for itself in this instance.	Michael	Western Cape	employed individual

	2025-08-12 16:02:21	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It makes no sense for live animals to be exported by sea to other countries only to be slaughtered in that country upon arrival. Surely increasing humane slaughter houses and slaughtering in South Africa for frozen export to these countries would not only ensure better animal welfare standards but also create more jobs domestically. It is evident that the current laws and regulations as they stand do not take into consideration the conditions, health and welfare of the animals, but that to the Department only economic considerations are important. One could consider options of increased welfare onboard and having external monitors, but this would barely meet welfare standards as not all aspects of the impact and trauma of live export can be mitigated through such measures. Furthermore, it would result in yet another implementation and monitoring challenge. A complete ban is the only plausible solution.	Anandi	Limpopo	unemployed individual

	2025-08-12 17:31:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The welfare of these animals is very poor to bad, considering the following: Livestock are transported in CROWDED AND CONFINED CONDITIONS in densely packed ships, limiting their movement, increasing stress levels, and raising the risk of injury or illness. During long sea journeys, animals are badly neglected and not provided enough food, water, or ventilation, leading to dehydration, hunger, and respiratory problems. Animals, especially land animals, are vulnerable to exposure to harsh environmental conditions such as rough seas, extreme temperatures, and humidity, which can cause suffering and health issues. The processes of loading and unloading can be traumatic, involving rough handling, which can cause injuries and distress. Oversight or veterinary care during transit makes it difficult to promptly address health emergencies or injuries.	Rina	Gauteng	retired

	2025-08-12 17:41:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I believe the export of any livestock overseas is cruel/inhumane as there are no guarantees to the welfare of the livestock which should be a top priority and there is no policing in this regard. Our own country's standards are sometimes questionable, never mind countries where we have no control or say and I shudder to think what really goes on. Unfortunately in this world, there are people who have absolutely no regard or conscience for the welfare of animals and I urge the government to ban this practice	Crystal	Eastern Cape	retired

	2025-08-12 18:19:27	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Submission: I Do Not Support the Proposed Regulations for the Exportation of Live Animals by Sea I do not support the proposed regulations for the Exportation of Live Animals by Sea. The practice of live animal export is inherently inhumane and cannot be made humane through regulatory adjustments. The suffering of animals during these long voyages — including extreme stress, dehydration, injury, and death — is unavoidable. Furthermore: • Once animals leave South African waters, they are beyond our legal protections and subject to welfare standards that are often far lower than ours. • The current proposal introduces a conflict of interest by allowing the Department of Agriculture to appoint its own monitors. This undermines transparency and credibility. • Attempting to "regulate" live export legitimises and prolongs a cruel practice instead of ending it. I call on the South African government to ban the live export of animals by sea entirely, rather than trying to manage an industry that is inherently harmful and cannot meet acceptable animal welfare standards.	Samantha	Western Cape	business owner

	2025-08-12 18:57:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animal Welfare is a big concern The conditions during the sea transport are inhumane and horrific I really prohibit this trade The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries—such as Kuwait, Saudi Arabia, the UAE, and Mauritius—have animal welfare standards that fall well below those of South Africa. The live export trade represents a moral failure. It prioritizes profit over the wellbeing of sentient beings, turning a blind eye to their suffering for the sake of economic gain.	Nicki	Mpumalanga	business owner

	2025-08-12 19:23:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am fully against the traveling by sea for these animals. They are not safe, and get injured. Many die on the vessel I suggest these people that allow the transportation of the animals, should put themselves in the livestock's position. Do they deserve to be treated like this. These are heartless people that just think of money Put a stop to this cruelty to animals.	Lorraine	Gauteng	retired
	2025-08-12 19:23:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As soon as a life has a monetary value, it becomes a commodity that can be exploited. I realise that livestock farming has been in practise for centuries, but so often the welfare of the animals is ignored through greed, ignorance or just plain cruelty. To allow animals to be transported in this manner will mean they are open to abuse as the workers tasked with their welfare will be just that, paid workers. The voyages will be lengthy, and conditions untenable. The fact that we slaughter animals is one thing, but to prolong their suffering is totally unacceptable.	Jean	KwaZulu-Natal	retired

	2025-08-13 08:09:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am strongly opposed to the practice of live animal exports. There is no way the safety, hygiene, and mental well-being of the animals can be protected on these journeys. They are inhumane in the greatest extreme. I believe that as individuals, we must prioritize compassion over economic considerations. If anyone is against a dog or a child being locked in a hot car on a summer's day, or is against human and animal trafficking, they cannot possibly support the practice of live animal exports, because it is the worst form of abuse that we can bestow on a living being. 	2025-08-13 08:13:01	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Comment Against the Proposed Regulations for Live Animal Export by Sea I strongly oppose the proposed regulations for the exportation of live animals by sea. While these regulations may appear to provide oversight, they do not address the core issue — the inherent cruelty of the live export trade. As South Africans, we have a moral and ethical responsibility to ensure that our animals are treated with compassion and dignity. The moment these animals are loaded onto ships, they are subjected to inhumane conditions — prolonged confinement, stress, injury, illness, and even death. No amount of regulation can truly mitigate the suffering they endure on these journeys. Worse still, once animals leave our shores, they are no longer protected by South African law and may be subjected to practices in importing countries that fall far below our own animal welfare standards. This creates a serious risk of abuse and cruelty, and we should not be complicit in that. Instead of legitimising this trade through regulation, the government should be working towards banning the live export of animals by sea altogether. Our focus should be on building humane, sustainable alternatives — such as the export of meat products processed locally under controlled and ethical conditions. We must show leadership and compassion. Please do not proceed with these regulations. Ban live animal exports by sea entirely.	Bianca	Gauteng	self-employed

	2025-08-13 08:25:20	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	No animal should be subjected to this form of abuse. If meat is to be exported it should be processed on land in a humane way and then packaged and sent to it final destination. This will be more beneficial to the local economy and hopefully in turn create jobs. Transporting live animals only to be processed at its end destination makes no sense. Government should not allow this. If any ship with live animals were to dock in our waters the animals should seized and handed over to animal welfare.	Bernard	Western Cape	business owner

	2025-08-13 08:49:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The reason why I do not support the proposed regulations is that I don't believe it will be enforced. Going around the issue with legislation isn't going to change the fact that these animals will suffer. I don't see how every person handling these animals will be watched to ensure they don't terrorise the animals. Apart from that, we have all seen footage of the conditions these animals are held in and I don't believe that will change with new regulations. Overall my view is that the live export of animals is barbaric and should be banned completely.	Hazel	Gauteng	self-employed
	2025-08-13 08:49:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly oppose the exportation of any livestock or animals by sea. This practice is absolutely cruel, torture to animals, especially on rough seas and it subjects live animals to the worst conditions imaginable. Any reasonable person can imagine the horrible conditions that the animals are forced to endure, during these trips by ship. Livestock is loaded in the hull of ships that is usually not well ventilated and extremely uncomfortable for animals that aren't used to to travel, especially by ship/sea. I have personally experienced motion sickness on a ship so I can not even imagine how animals/livestock react to these condition!! These trips by sea, is pure torture to animals and it can not be permitted to continue. My question, why can't the animals rather be processed here and the meat, only, exported? This cruel practice MUST be stopped!	Martyn	Free State	employed individual

	2025-08-13 09:09:38	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn’t end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply.	Giscard	Gauteng	employed individual
	2025-08-13 09:09:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is cruel to transport these animals on ships, it must be stopped. The animals dont deserve to suffer. Its high time we took care of our earth and animals and stopped desrtoying everything for profit	Margaret	Western Cape	employed individual
	2025-08-13 09:11:20	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is just another despicable example of animal cruelty justified in the name of profits and human need. How on earth can monitoring jamming animals into ship's holds for long voyages on the high seas where our laws cannot be applied, help in any way to prevent this cruelty. It must be banned!	Graham	Western Cape	business owner

	2025-08-13 09:19:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is clear from the evidence given than animals are subjected to inhumane treatment. Allowing animals to be transported under such conditions and then to be transported to countries where they're subjected to even further mistreatment is unacceptable. Being transported in inhumane condition for profit is inhumane and breaking SA's own law of Animal's safety and rights. If SA knows the animals are going to a country where they won't be treated humanely, then SA is violating it's own policy / laws of protecting animals, knowing they're going to worse inhumane conditions. No animal needs to be transported alive for any duration on a vessel. There is no real need at all. Animals can be slaughtered in SA under the correct humane conditions, following religious humane laws, and transport as carcasses to the respective countries.	Amanda	Gauteng	employed individual

	2025-08-13 09:38:23	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	The transportation of live animals by sea is a deeply concerning practice. Regardless of the final destination, the welfare of these creatures is consistently compromised by long voyages in cramped, poorly ventilated holds. The risks are significant and well-documented. Dehydration, starvation, disease, and injury are common outcomes, including the immense psychological stress of being confined in a noisy, unfamiliar environment for weeks. Furthermore, the risk of mass casualties due to extreme weather, mechanical failures, or a lack of adequate care is a constant and horrifying reality that I find unacceptable. For me, this is not merely an issue of operational logistics but a fundamental matter of animal welfare and ethical responsibility. Given the severe and unavoidable risks, I believe a moral and humane society must question the very existence of this trade and seek more compassionate alternatives.	Samantha	Gauteng	employed individual

	2025-08-13 11:07:52	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Regardless of the nature of the journey, animals are not adapted to travelling by sea and thus will necessarily experience suffering as a result. Further to this there are significant questions about the ethics and accountability of handing animals over into unknown/ambiguous conditions with standards of welfare, cleanliness and accountability that may be below those in South Africa. There is a simple solution to this problem - local slaughter at accredited facilities and export of preserved or frozen meat rather than exporting live animals.	Luke	Outside SA	employed individual

	2025-08-13 11:58:08	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Instead of exporting animals to foreign countries, how about NOT EXPORTING and retaining the animals in South Africa so that the South African people and the millions of foreigners in South Africa, can be fed on a daily basis first. Keeping livestock in South Africa can and should lower the daily price of meat products for those who are carnivorous eaters. I personally, am a vegetarian. Instead of the South African Government retaining monies in their coffers that eventually spills copiously into the pockets of the Gov. ministers, decreased prices for the consumer (the inhabitants of South Africa) would mean that the consumer would have some extra money in their pockets to pay towards their water and electricity usage that so many receive for free via illegal means. Blessed would be the day that EVERYONE paid for services instead of just those who are also struggling to make ends meet on a monthly basis..... Those citizens who are honest enough to pay for services, they too would have extra cash flow available for necessities should there be a significant lowering of prices for all food goods across the board.	Deidre	Gauteng	self-employed
	2025-08-13 11:59:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is absolutely cruel holding animals for days / weeks / months at sea. This is totally inhumane!! The sea is not always smooth sailing. Seas get rough. Disposal of faeces and urine....in the sea? Our seas are polluted enough. A big NO!	Rute

	2025-08-13 12:08:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	No animal should suffer from stress and fear. They can get sick on board and die. Its inhumane to take them away from a healthy environment and there comfort zone	Ray	Western Cape	retired
	2025-08-13 12:09:28	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is the 21st century. Why are live animals being transported by sea? The practice is outdated and indefensible. Transporting live animals by sea leads to serious ethical, logistical, and animal welfare concerns that should be unnecessary in this era. The guidelines may look good on paper, but they will be insufficient and unenforceable once the animals are in the open seas. No set of guidelines can truly mitigate once they are at sea. The animals' welfare cannot be guaranteed in transit, and the risks are too great.	Loraine	Gauteng	retired
	2025-08-13 12:11:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	IT IS CRUEL TO DO THIS AS THE ANIMALS ARE ALREADY STRESSED AND CONDITIONS AT SEA ARE UNSTABLE AND WILL STRESS THE ANIMALS EVEN MORE	MARIA	Gauteng	employed individual

	2025-08-13 13:26:15	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I consider it to be cruelty to animals and this should not even be considered. It is a sick practice.	Daphne	KwaZulu-Natal	self-employed
	2025-08-13 13:27:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	They can breed their own animals. We must strengthen our internal economy and stop relying on others, including handouts from the likes of the IMF. These exports, while they may seem favourable to some large scale farmers, actually harm our own economy in the long term and drives higher prices for our own food. To make it worse, the cruelty these animals endure simply for the profit of a few is sickening. It must be put to a stop entirely. No more exports of live animals should be allowed.	Chris	Western Cape	business owner
	2025-08-13 13:27:35	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Bloody inhumane and cruel!!!

	2025-08-13 14:00:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transport of live animals is inherently cruel and causes horrific suffering to be endured over many weeks. The countries of destination have terrible animal welfare rules and records. The welfare of animals transported at sea cannot be effectively monitored and therefore cannot be guaranteed. In contrast it is a certainty that the animals will suffer horrendously. There are alternatives, in particular export of meat not of live animals. it is morally and ethically unacceptable to export live animals and must be banned.	Louise		
	2025-08-13 14:01:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is insane animal cruelty and needs to banned immediately!!	Andrew	Western Cape	self-employed

	2025-08-13 15:58:31	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals by sea has been shown on a number of occasions to be dangerous, leading to animals being washed overboard and in turn washed up on beaches around South Africa, in particular around Cape Town. Further, the conditions on the transport ships are no better than those of the slavers in the 17th and 18th century and are completely inhumane. They have open decks, they stink due to the animal excrement, the animals do not have easy access to food or water, and injuries due to rough sea conditions cannot be ruled out or prevented, leading to additional stress, pain and suffering for the animals. I do not believe that there is any justification for exporting live animals as South Africa has a very well-established meat industry, and is more than capable of producing quality meat products that are easy to refrigerate and transport. They may be animals, but that does not mean that we need to treat them inhumanely. Immanuel Kant said, "He who is cruel to animals becomes hard also in his dealings with men. We can judge the heart of a man by his treatment of animals." I think that there is enough nastiness in this world without us contributing more through exporting live animals by sea. I hope that this legislation is not passed.	Michael

	2025-08-13 17:54:14	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	The core logical flaw in attempting to regulate and legitimize the live animal export trade by sea is that the practice is, by its very nature, fundamentally incompatible with humane animal welfare. No amount of regulation can truly mitigate the inherent suffering and risks involved in these long-distance voyages. Here are the key points of that logical reasoning: 1. Inherent and Unavoidable Suffering Extreme Conditions: The journeys are long (often several weeks) and expose animals to extreme and fluctuating environmental conditions, including high heat and humidity, which are particularly stressful when crossing the equator. Confinement and Overcrowding: Animals are confined to cramped pens for the entire duration of the journey, with high stocking densities. This leads to stress, injuries, and the inability to lie down, rest, or move naturally. Poor Sanitation and Air Quality: The buildup of waste, urine, and ammonia on board creates a toxic environment that can cause respiratory illnesses and distress. The animals are often forced to stand in their own waste for the duration of the trip, leading to "faecal jackets" which can mask injuries and impede their ability to recover. Lack of Proper Care: On-board veterinary care is often inadequate or nonexistent, and it is nearly impossible to provide meaningful treatment for sick or injured animals in a crowded, moving ship. 2. Disasters and High Mortality Rates Despite regulations, catastrophic events at sea—such as fires, mechanical failures, or disease outbreaks—can lead to mass deaths. The history of the trade is filled with documented tragedies where thousands of animals perished. Even without a catastrophic event, mortality rates on these voyages are often significant due to heat stress, dehydration, suffocation, and disease. 3. Enforceability and Lack of Control Once the vessels leave South African territorial waters, there is a lack of effective legal and practical oversight.	Andrew	Western Cape	
	2025-08-13 17:55:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animal products should be ethically and hygienically processed locally before being exported. Where there are religious or procedural requirements for the processing of these products (eg. Halal), these should be carried out in accordance with requirements under approved supervision locally, to ensure the necessary compliance. Shipment of the products must be controlled to ensure preservation of the quality of the product, i.e. in cold containers.	Mervyn	Gauteng	retired

Michael	KwaZulu-Natal	employed individual
	2025-08-13 18:33:40	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	I do not support the live transport of animals by sea due to the inherent cruelty, suffering, and high mortality risks involved. Prolonged sea journeys subject animals to extreme temperatures, overcrowding, inadequate ventilation, limited access to food and water, and exposure to disease. Numerous incidents have demonstrated that even with current regulations, animals often endure severe stress, injury, or death before reaching their destination. The South Australian Government is unable to effectively implement the newly proposed laws because live export by sea is primarily regulated at the federal level under Commonwealth legislation. State-level authorities have limited jurisdiction over international shipping routes, port operations for export purposes, and vessel standards, making it impossible to enforce comprehensive protections locally. Without national alignment and enforceable federal measures, any state law would be undermined by legal and operational limitations, leaving animals vulnerable to the same risks.	Li-Juan	KwaZulu-Natal	employed individual

	2025-08-13 22:14:51	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	This practice is cruel, unnecessary, and fundamentally inhumane. As human beings, it is our moral responsibility to protect all creatures, not condemn them to suffering in foreign markets where welfare standards fall far below those of South Africa. Once loaded onto vessels, these animals endure prolonged journeys filled with severe stress, motion sickness, physical injuries, dehydration, and a constant risk of death. Exporting them for profit not only disregards their wellbeing but it goes against the most basic principles of compassion and respect for life. We call on decision-makers to reject this regulation and stand against a trade that causes immense and needless suffering.	Bee	KwaZulu-Natal	business owner

	2025-08-14 06:30:32	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	After weighing the economic benefits against the welfare risks, I believe the cons outweigh the pros. Long sea journeys expose animals to unavoidable suffering through stress, injury, dehydration, and death, with no protection once they leave our waters. The proposed regulations do not solve these issues, and appointing internal monitors is a conflict of interest. I do not support the current regulations and call for a full ban on live animal exports by sea. If trade continues, it must be under independent oversight, with shorter transport times, and a focus on exporting meat rather than live animals.	Wendy	Gauteng	unemployed individual
	2025-08-14 06:33:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Sunil	KwaZulu-Natal	employed individual
	2025-08-14 06:35:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	If people in other countries need animals for meat consumption they must raise their own. 	2025-08-14 06:35:25	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The transportation, of livestock by sea is simply barbaric. In this day and age, why is this practice still continued? Slaughter of meat can be overseen, if it is cultural, and transported frozen. Do any civilized countries still even do this.? It is an unnatural and extremely cruel situation for any live animal to be in, and it should be stopped at source...it's pointless to have pages and pages of regulations that are worthless once a ship leaves our waters. The people who allow this barbaric practice do not care once that boat has sailed. Please stop this terrible thing.	Ivy	Gauteng

	2025-08-14 06:53:42	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Most times there is so much of talking, ideas, plans, etc. that look good on paper. Somehow an old method, tried and tested is forgotten. I'm clueless as as to how these animals are packed and transported long distance, but this I do know; there's a SAVIOUR that calls HIMSELF THE GOOD SHEPHERD. Would HE pack up animals like the what is done currently? HE took me to HIS WORD, to NOAH, the ARK, THE ANIMALS, The flood . The very ARCHITECTURE of the STRUCTURE of the ARK was made plain to NOAH by The LORD GOD ALMIGHTY. Noah, who had to HOUSE the ANIMALS GOD commanded him to, followed every detail and this SHIP, called the ARK was safe and sound for the ANIMALS and only 8 human beings; for them to be transported over very stormy waters for 40 days! On landing on dry ground after that flood that wiped out an entire Creation except for those in the ARK, the ANIMALS were let out , still safe and sound. The blueprint for the ships that carry ANIMALS remain the same. The Master ARCHITECT is the same TODAY as back then- it's just no one consults HIM. HE has no problem animals being sold, that's TRADE. HE has a huge problem with the GREED involved in the negotiations etc. The waters are controlled by HIM and HE'S SHOUTING FOR THE ATTENTION OF THE TRADERS. A New proverb:- Money is as money does. AS JESUS SAID, "THE LOVE OF MONEY IS THE ROOT OF ALL EVIL."	Arlene		retired

They, even cows and sheep, do have the mental ability to recognize whether they are being treated with care or with cruelty. So often animals are transported, even by road in our country, they are scrammed onto trucks, no water, no consideration for their well being.	Rene'	Gauteng	retired
	2025-08-14 07:37:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is bad enough that we slaughter and eat animals. Making them suffer in mass deportation is unjustifiably cruel. And unnecessary.	Marijke	Western Cape	self-employed
	2025-08-14 07:37:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is bad enough that we slaughter and eat animals. Making them suffer in mass deportation is unjustifiably cruel. And unnecessary.	Marijke	Western Cape	self-employed
	2025-08-14 07:37:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We as South Africa had took time to make sure we follow tight and regulated programs to produce quality livestock. Our animals are kept in natural and favorable environment by our farm industry expect. We should own this practice till slaughter of the animals. SA will not only lose revenue on mass growth of this animals while they travel on sea. Will also not be able to nurture them as it could have been the case if they were in SA. I therefore suggest that we only export caucus that is in line with our own regulations.	Harold		
	2025-08-14 07:39:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am an advocate for animal welfare and I would never promote such a cruel practice.	Nothando	Gauteng	employed individual

	2025-08-14 07:40:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals are sentient creatures, to differing degrees. They are all capable of feeling and exhibiting fear. Even terror as scientifically proven in the case of abattoirs, smelling blood when lining up to received the bolt through the brain. They feel motion sickness just as a human does. Who would knowingly subject another warm-blooded, living creature to the extreme levels of discomfort experienced by livestock being shipped by sea? The inability to feel empathy is a major descriptor of a sociopath. The way we treat animals often dictates our behaviour to humans . This proposal is ethically and morally repugnant.	Angus		self-employed

	2025-08-14 09:23:51	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Livestock transportation is nearly always inhumane. When animals are transported within South Africa the journey although inhumane and traumatic is relatively "short " and some laws to reduce the suffering are in place. Transporting animals by sea lengthens this traumatic event and there are few laws that can be enforced to reduce the suffering of the animals. Livestock should not be transported and definitley not on long jouirneys by sea.	Annette	Western Cape	self-employed
	2025-08-14 09:24:46	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Dear Sir, as someone who has personal experience seeing cattle loaded onto a vessel bound for Mauritius - I wish to state on the record that it is inhumane, cruel and unbearable for these animals. The noise levels, cramped dark and foul smelling conditions alone are unacceptable. No country with any kind of conscience for the welfare of animals should allow this. Further biosecurity should also be considered. Exporting carcasses that have been legally slaughtered and checked is a much more sensible approach. These animals are put through literal hell only to end up being slaughtered who knows how. I personally dealth with a cattle truck that broke down on route to Durban. The animals on thar truck were exhausted there were 5 already dead and a number that had to be slaughtered. These animals were off loaded only to be picked up a few days later to continue the harrowing journey. It is heart breaking. I appeal to you - as a country proud of our agriculture this should simply not be allowed. Exporting meat makes far more sense and should be the only way. Let us take the opportunity to be an example and put the welfare of our livestock first.	Winnie	Western Cape	self-employed
	2025-08-14 09:25:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly reject the export of live animals by sea for its cruelty. It is immoral, unethical and vile. I am so disappointed in the leadership of the DA for not supporting calls to ban this cruel practice. I am strongly considering never voting for the DA ever again over this issue. I have voted DA every election since 1994 but this appalls me.	Catherine	Western Cape	business owner

	2025-08-14 09:42:14	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is an inhumane, crual and barbaric way to treat animals. Animals are part of the food chain that feeds humans, but this practice of shipping live animals on mass, in such unnatural conditions is unacceptable. For live animals to travel by sea for days on end will be very traumatic and stressful. It is just a barbaric way of treating animals. No animal should suffer through the hands of humans, they should be treated with just as much respect as humans. There are obviously better ways to manage this matter. Animals should rather be slaughtered here and carcasses can then be transported overseas. Local, sustainable food production solutions, that priorities welfare of animals, needs to be made all over the world.	Ilse	Western Cape	retired

	2025-08-14 09:55:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is an inhumane practice that puts animals under terrible stress and may even cause death. I cannot support this practice.	Diane		self-employed
	2025-08-14 09:56:08	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is completely unnecessary to transport live animals by sea and subject them to the inhumane conditions reported by respected organisations like the NSPCA and others. Humane conditions are not being enforced once at sea. If meat is to be exported to other countries, then the animals should be humanely slaughtered in South Africa first. Furthermore, the Department of Agriculture is not the appropriate competent authority for animal welfare as they are far more concerned with increasing exports than on the well-being of the animals.	Catherine		employed individual
	2025-08-14 09:57:00	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly reject the practice of exporting live animals as it is cruel.	Catherine		
	2025-08-14 09:58:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	In the 1960's & 70's I worked for Imperial Cold Storage, We were exporting mega tons of meat without causing any suffering to animals. The process was to slaughter in our abattoir's, cut the meat into measured portions, packed into +/- 80kg cartons and export these cartons on ships to all over the World . why can't we keep this going? absolutely stress-free to the animals, and the meat arrives at it's destination in mint condition. Exporting live livestock is excessively cruel and stressful to the animals, THIS PRACTICE SHOULD BE TOTALLY BANNED! The meat packaging industry creates MANY MORE JOBS!!	Marthinus Hendrik	Gauteng	retired
	2025-08-14 09:58:54	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	If meat is to be exported to other countries, then the animals should be humanely slaughtered in South Africa first. 	2025-08-14 10:42:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals across oceans is not simply a logistical choice—it is prolonged cruelty disguised as commerce. These animals are confined in cramped crates for weeks at a time, often without proper bedding, enrichment, or the ability to move freely. They endure relentless noise, extreme temperatures, and constant motion, leading to exhaustion, injury, and sometimes death long before reaching their destination. Oversight is minimal once ships leave port, meaning suffering goes unseen and unaddressed. This is not just about the animals; it is a reflection of a society's values. When profit outweighs compassion, and living beings are reduced to cargo codes, it speaks volumes about a nation's moral compass. The practice also carries hidden costs—disease outbreaks that can spread globally, environmental harm from waste runoff into oceans, and the needless carbon footprint of shipping live creatures instead of processed goods. We live in a time when safer, more humane alternatives exist. Continuing to ship live animals is not a necessity—it is a choice. And it is one that tells the world far more about who we are than any policy statement or national slogan ever could.	Jacobus	Gauteng	self-employed

	2025-08-14 11:33:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	While I respect the attempt to get on top of this and the impact a ban could have on the producers selling their livestock, working with animal welfare experts I have come to understand that even the most stringent protocols currently in place do not come close to good enough. Even within the proposed regulations there are far to many 'mays' rather than 'shalls' providing numerous loopholes and gaps. Also, the reason behind this export is not enough justification for the activity and its associated abuses and welfare concerns. Another massive issue is that our government has a long track history of not being able to enforce regulations and laws on even basic and fundamental issues meaning that their envisioned oversight provides no comfort. A lack of enforcement coupled with severe corruption does not make good grounds to regulate an abusive practice.	Bronwyn	Eastern Cape	employed individual

	2025-08-14 12:13:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	When are we going to realise that animals are sentient beings like us. We are no better than them, just different. We have no right to do this to them. Just killing them to eat - in their natural environment after they had a decent life - is okay, but not our current practices that are totally disrespectful to our fellow sentient beings. Just because we can doesn't mean we should. It is unethical. We do so much harm for the sake of money. When are we going to stop and live in harmony with each other on this beautiful planet that we are a part of?	Karen	KwaZulu-Natal	self-employed
	2025-08-14 12:15:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animals should not be exported by sea .It is beyond cruel and inhumane and not healthy .There are other ways . I strongly disagree with transporting live animals	victoria	Western Cape	self-employed
	2025-08-14 12:15:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There are multiple reasons why I do not agree with live animal export by sea. The main concern is the animals' welfare, which is often overlooked. The pens these animals are kept in for months while at sea are too small for the number of animals being held. They are not cleaned properly, never mind that many of these animals are ruminants and require access to pasture to process and digest properly, to live a happy and healthy life. Then there is the accountability and oversight - BIG PROBLEM. It is very easy to overlook issues/concerns when you do not feel like dealing with them, and hey, it's not like the animals can speak up and tell you they are uncomfortable. This is not a nice situation for any animal, regardless of the breed, and it should not be allowed. These situations contribute to hoof rot, diarrhea, and multiple other issues. I stand firmly against this being allowed, and judging by previous footage animal welfare organisations have retrieved from such events, it is horrific and the animals' needs are not being taken into account at all. 	2025-08-14 12:47:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The export of live animals on gruelling ocean journeys involving horrific suffering is an absolute disgrace and a crime against all sentient beings. All of the latest scientific studies on animal intelligence and sentience indicate that animals - including those we classify so callously as "livestock" and which we trade and treat as if they are mere inanimate objects - have complex inner worlds and the capacity to experience emotions that are close in complexity to our own human experiences of pain, longing, pleasure, grief, hope and other emotions. The exporting of live animals across oceans, in which these individuals suffer incomprehensible horrors, is a disgusting practice that any advanced nation should ban permanently at once. Future generations will look back at our use and abuse of animals as a shameful disgrace and nobody with even a shred of compassion or moral fibre should support it.	Jonathan	KwaZulu-Natal	self-employed

	2025-08-14 13:22:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The inhuman practice and lack of empathy with those working on the vessels can lead to untold suffering and pain for the animals being transported. I do not stand by this legislation....	Sandy	Northern Cape	self-employed
	2025-08-14 13:24:18	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal sea transport has been notorious for animal cruelty. No matter what measures are put in place, the animals often suffer terrible deaths. If any country has the need to slaughter their meat in a certain way, they may breed them locally. Some faiths even demonstrate no regard whatsoever for human life, how do we expect them to treat animals. No, absolutely no.	Michael	Gauteng	business owner
	2025-08-14 13:25:17	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I just fail to understand how animals can be transported in the conditions they are subjected to. Their stress must be past their insurance. Even on the old way of walking them to auctions was a stress factor that even the old farmers realized and subsequently took things in manageable stages . Care is the essence. But I fail to see any gain by legislation as I believe the value chain has it's own interests at heart and care is not one of them.	Piet cloete		retired

	2025-08-14 15:08:22	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do not support live animal exhortation by sea. It is cruel and inhumane with overcrowding and lack of sanitation. If it was a regulated industry committed to following safe, healthy, and humane conditions for the animals. With enough space per animal being adhered to, it would be a different story	Mick		

	2025-08-14 15:08:42	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting animals overseas is a fully fledged No No! as each land has their own dedicated animals feeding off the specific land to keep the balance of nature. Weather conditions, grazing conditions/vegetation, sickness, vaccines and the like are all custom to the area in which the animal originates. It is cruel to move animals to different destinations in the world as the loss of animal life is so extremely cruel and mostly don't make it, even if they are successfully transported . Despite the conditions they are exposed to, those that make it will eventually die due to the origin and habitat not being that of which they were destined to be in. It grates me to hear that intelligent Humans could even consider this!	Linda	Eastern Cape	self-employed

	2025-08-14 15:59:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn’t end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply	Graham	Western Cape	retired

	2025-08-14 16:15:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I do believe that forcing animals to travel in horrific conditions as it has been the case in the past is animal abuse.	Patricia	Western Cape	
	2025-08-14 16:16:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Stop the exporting of live animsls by sea immediately! Stop this inhumane practice !!	Linda	Western Cape	retired
	2025-08-14 16:17:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Stop the exporting of live animsls by sea immediately! Stop this inhumane practice !!	Linda	Western Cape	retired
	2025-08-14 16:17:05	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I think it should be very obvious that animals cannot be care well for over vey long distances; even by aeroplane it can actually be cruel, animals being abandoned, dying, having to live in uncared for fecies. Why cannot the animals be slaugthered here, and their meat be transported? Those countries that want live animals should breed and raise them themselves.	Hannatjie	Eastern Cape	self-employed

	2025-08-14 16:20:31	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Not only is animal welfare a serious concern but also Minister Steenhuizen's Business Sense. Exporting live animals is a tremendous economic waste - processed meat takes up way less space than live animals. Processed meat doesn't require food and water for the entire journey. Processed meat also has a higher price tag. If Steenhuizen couldn't come up with this he should resign.	Anette	Gauteng	business owner
	2025-08-14 16:20:59	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Well now. To everyone who will hopefully read this, let me be as clear as rain. We have enough barbarians who do barbaric things. We will not sit by and watch how such a barbaric act of exporting live animals. Rather export all the barbarians out of this country than animals.	Berlina	Gauteng	unemployed individual
	2025-08-14 16:21:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	You can judge a nation(person) by the way it treats its animals. Sending them off to sea in what will become horrific conditions does not mean you relinquish responsibility for their welfare. How do you want to be judged, Mr Steenhuisen? Consider this carefully.	H		
	2025-08-14 16:22:55	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This has to be completely STOPPED. Live animals being transported is always cruel. Even the trucks going to abbattoirs is shocking	Susan	Western Cape	retired
	2025-08-14 16:26:24	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Extremely cruel with no concern for God's creatures	Brian	Western Cape	retired
	2025-08-14 16:27:15	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	One can tell alot about the values of a country by the way they treat animals. And that extends to the care of the most vunerable. Human and animal. Would I put my trust in a government that does not do their best to eliminate suffering and cruelty to any human or animal. NO I WOULD NOT.	Juliette	Western Cape	self-employed

	2025-08-14 18:06:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly condemn the export of live animals to distant countries via the sea. This poses great stress and fatigue to the animals. Due to the close packing of animals in vessels, disease transfer is mostly rampant. Animals may also be exposed to too much heat stress, which can lead to mortality. Hygiene is also a big concern, as animals are always in contact with their waste, such as faeces and urine. Appetite is normally reduced as animals are exposed to these inhumane practices. I urge the government of South Africa to stop this malpractice forthwith.	Edmore	Eastern Cape	employed individual
	2025-08-14 18:07:59	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	This is unspeakable cruelty for the sake of not having to carry the cost of refrigeration or the practice of bleeding an animal to death.	Judy	Gauteng	retired

	2025-08-15 00:13:41	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We need to protect our wildlife animals . Moving livestock to foreign countries by sea causes plenty stress to them. They need to remain in their natural habitat in SA. Also can cause loss of jobs for farm workers needed to look after livestock.	Sylvia	Gauteng	retired
	2025-08-15 00:20:38	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	NSPCA South Africa Globally millions of farmed animals are transported over long distances every year. And even if there are no accidents, these journeys are still tragic. Animals exported may face extreme dehydration, exhaustion, hunger and death. Some collapse onto floors that are covered in faeces and urine and risk being trampled by their companions. Those that survive may then face unimaginably horrific slaughter.	Rupert	Western Cape	retired

	2025-08-15 00:22:23	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa cannot claim to stand for “rights for all” while allowing the export of live animals —a trade marked by cruelty, suffering, and barbaric conditions. Cramped, filthy ships subject animals to days or weeks of heat, hunger and distress. This is not the mark of a humane nation. Ending live animal exports is not just an act of compassion—it’s a moral imperative for a country that values dignity, justice, and life.	Michaela	Gauteng	employed individual

	2025-08-15 08:01:43	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	We were appointed the guardians over God's animals. Genesis 9:5 clearly indicates God will demand a reckoning from the hand of the human for the spilling of lifeblood, animals included. If the animals suffer at sea as is stated, humans have a Godly inspired duty to ensure sanctity of life is not mal- or mistreated.	C		self-employed

	2025-08-15 08:01:51	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As International Trade partners South Africa cannot condone or encourage unethical practices such as long distance transport of live animals. This will negatively affect the countries' International status in terms of both Animal Rights and Export Meat Standards. It is scientifically documented in peer reviewed publications that meat quality and market value is decreased by the chemical changes that take place in muscles of live animals due to stress and bruising of animals during long distance transport pre slaughter. Export of frozen meat of animals slaughtered under best practise in terms of shortest transportation and humane slaughter methods in RSA will be optimal for export meat quality South Africa and will add value to the countrie's standing in the International Meat Trade. South Africa will confirm and prove the Government's commitment to ethical practices in terms of Animal Safety and Welfare as laid out in the Animal Protection Act by banning long distance transport of commercial trade animals by sea. Reference example : Hultgren J. et al. Preslaughter stress and beef quality in relation to slaughter transport of cattle. in: Livestock Science Vol 264 October 2022.	K

	2025-08-15 09:55:09	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	The true test of the morals and ethics of a person is how they treat those that they have power over. Over the course of history humans have developed technologies and social structures that have given us as a society ultimate power over animals. This also means that we have an incredible responsibility to them. They can't advocate for themselves, they can't choose where, or many times how, they live and that means that we need to ensure that our decisions are made with the most empathy that we can muster. Ask yourself if the conditions you are willing to see these creatures live and travel in would be acceptable for you or your loved ones, and if it isn't then you know that it is evil.	Sara

	2025-08-15 11:15:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live transport to slaughter is completely unnecessary. It is driven by religious practices that originated in a world very far removed from the globalised economy we have now. Those practices need to adapt and we should be encouraging them to by banning live export for slaughter. Banning this practice will result in less cruelty, better animal welfare, better human health, and better quality meat. Don't forget, these animals are given high doses of antibiotics to survive the squalid conditions on board these ships. Even outside the cruelty, all we're doing is delivering lower quality meat with more antibiotic-resistant bacteria. It's a net loss all around. Let's stop this.	Johan	Western Cape	employed individual

	2025-08-15 11:31:31	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	This poor and cruel practice of transporting live animals is shocking. The anaimals will be under continuous stress from overcrowding and the strange environment they are exposed to during the transport. In addition to the cruelty the animals are exposed to, weight and meat quality will decline. Instead of transporting the live animals, they should be slaughtered in South Africa before the meat is exported. However, in South Africa, sheep and cattle are often transported in trucks under overcrowded conditions over long distances. Truckloads of cattle can be seen being transported through Botswana, presumably from Namibia. This practice should be stopped, at least in SA, or prevented from entering the country. Once again, transported/imported as meat after slaughter would be far better. If people do not believe that these animals are stressed, it is possible to conduct research to prove this. Stress hormones can be measured non-invasively in faecal samples and this can be done longitudinally during the course of transport. If required, the University of Pretoria is able to conduct such research. TIME FOR CHANGE	Henk	Gauteng	retired

	2025-08-15 13:26:45	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Supporting Statement – Opposition to Live Animal Export by Sea I strongly oppose the exportation of live animals by sea and urge the Minister to reconsider this harmful practice entirely, rather than attempting to regulate it. Transporting animals over long distances by sea subjects them to prolonged periods of confinement, extreme temperatures, insufficient ventilation, limited space to move, and high levels of stress. These journeys can last days or even weeks, during which animals often suffer dehydration, disease, and injury. No matter how strict the proposed regulations may be, they cannot eliminate the inherent cruelty and welfare risks involved in shipping live animals across oceans. Humane alternatives exist — including the export of processed meat — which meet market demands without inflicting prolonged suffering on living creatures. South Africa should be a leader in ethical trade practices by prioritising animal welfare and phasing out live exports by sea altogether. I therefore call on the Minister to withdraw these regulations and instead implement a complete ban on the export of live animals by sea.	Marilu	Western Cape	employed individual

	2025-08-15 13:31:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This cruel practice should not be allowed, particularly not for the food trade. Cape Town was stunk out for 3 days when a vessel carrying livestock to the Middle East made an emergency stop recently, reminding us all of how cruel, unhygienic and disgusting this is. Secondly, allowing livestock transfer in the food industry potentially robs South Africans of jobs in the secondary/value added food processing businesses. Our hapless, pathetic government needs to stop selling our resources out of hand and start focusing on developing value added, processing industries to help provide jobs and rebuild our economy.	Lois

	2025-08-15 13:39:50	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	The global crisis is clearly at a peak at this time. Weather patterns are out of synch, temperatures are reaching undocumented extremes and animals are going extinct by the minute. It is each and every one of our responsibilities to contribute towards a world, an economy, an ecosystem and communities that, once again, live in harmony with nature, with the environment and with one another. It is imperative at this time that we move back to a local market... where each community cares for its own. Working with the plants and animals that are indigenous to its land and where we support one another within community. It's time to let go of this "global" economy where we ship animals in extremely cruel conditions to foreign lands, injecting them with hormones that negatively affect our health only to gain a little extra money for governments that seek only to enrich their own lives - no longer concerned with the lives of their people. The time to change our ways is now. The time to care for our own land and people is now. The time to protect and care for our animals and the way they are treated is now. If we do not listen to the warnings we are seeing all around us, lines and chaos will determine our next steps and this is unnecessary at this time. We all have the power to choose wisely. Listen to the whispers of the ancestors and choose wisely.	Tatjana	Western Cape	self-employed

	2025-08-15 14:09:39	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The barbaric practice of transporting live animals by sea should be stopped immediately. These proposed regulations are guided by profit not humanity and attempt to legitimise and perpetuate this harmful practice. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections and at the mercy of importing countries – many of whom have animal welfare standards that fall well below internationally accepted standards. Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Animals are subjected to prolonged journeys that cause severe stress, motion sickness, physical injury, dehydration and an ever-present threat of death. STOP THIS NOW	Elizabeth	Western Cape	retired

	2025-08-15 15:58:43	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Apart from the moral and animal welfare aspects of this industry there are technical issues, involving the vessels, their crews and operation, which exacerbate the cruelty of mass livestock transportation by sea. In addition, there are sound economic reasons why this trade is inefficient and unnecessary. Third, tweaking the regulations, as now proposed does little, if anything to alleviate the major problems. Fourth, if South Africa were to prohibit this trade totally (facilitating the local slaughtering and export of chilled carcass in its place), it would place our nation among the increasing number of progressive countries worldwide that have chosen to put animal welfare ahead of this frankly inhumane, even barbaric, industry.	Pete	Gauteng	retired
	2025-08-15 16:02:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am against animal cruelty. I don't believe that the animals will be taken care of and the trip will be be harmful for them.	Elaine	Gauteng	self-employed

	2025-08-15 16:30:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Please STOP all South African exports of the thousands of live animals by sea. It is cruel and unneccesary and the animlals suffer cruel deaths. Those who survive are and/or traumatised and/or injured. We can do better than this. Slaughter humanely before if exports are neccessary. Also the inhumane transport of livestock within South Africa needs to be looked at. Animals are transported for days in hot and crammed conditions on trucks . They get no food or water and the tight spaces mean they cannot even turn around. They have to urinated and defecate on top of each other. How is this still allowed? Why not have decentralized slaughterhouses to stop this or better yet, have this function transferred to the farms where they are. And have strict inspections to ensure humane deaths and clean conditions.	Tracy	Western Cape

	2025-08-16 04:09:25	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Animals that are transported for slaughter or other purposes often endure harsh conditions during their journey. These can include overcrowding, extreme temperatures, lack of food or water, and insufficient space to move, which can lead to stress, injury, and even death. The conditions on many of these vessels are not monitored adequately, and there are reports of animals suffering from poor ventilation, high stocking densities, and unsanitary conditions. The journey can sometimes last for days or even weeks, which increases the risk of harm. The issue has sparked a lot of debate over animal welfare and the ethics of live animal transport. Many animal rights groups argue that the practice should be banned or severely restricted, advocating for alternatives like local slaughtering or improved conditions. I think the best route is to ban transportation of living animals on vessels. Sorry it maybe just a sheep for example en yes I do eat meat. But I believe you should treat animals with kindness and not torture them. I will love to put some people in the vessel under that treatment and see if they will like it. There is ways to humanely kill that animal and transport them. So stop thinking about yourself and start thinking about earth and all the animals on it that we are destroying	Cantal	Western Cape	unemployed individual

	2025-08-16 09:36:26	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The current practice of live animal exportation from South Africa is deeply concerning from an animal welfare perspective. Transporting animals over long distances by sea often subjects them to inhumane conditions, including extreme heat, inadequate ventilation, poor sanitation, limited access to food and clean water, and high levels of stress. Many animals suffer injuries or even die during these journeys. The lack of clear and consistently enforced procedures for live export compounds these issues, leading to further cruelty and suffering. This situation not only raises ethical concerns but also risks damaging South Africa’s international reputation in terms of animal welfare standards. It is imperative that immediate action is taken to address the deficiencies in the current system and to explore more humane and sustainable alternatives. Suggestions for Alternative Approaches to Live Animal Export: Export Processed Animal Products: Instead of exporting live animals, South Africa could invest in local slaughterhouses and meat processing facilities. This allows for humane slaughter under regulated conditions and the export of refrigerated meat, which reduces animal suffering and adds value to the local economy. Develop Regional Trade Agreements: Encourage trade relationships with nearby countries where overland transport is shorter and more manageable under strict welfare conditions, minimizing time and stress for the animals. Invest in High-Welfare Transport Standards: If live export must continue, it should only be allowed under rigorous standards—monitored independently—with enforceable penalties for non-compliance. This includes animal tracking, temperature controls, and onboard veterinarians. Support for Local Farmers and Producers: Provide incentives and support for farmers to adapt their business models, focusing on value-added products like dairy, wool, leather, or processed meat rather than relying on live exports. 	2025-08-16 10:44:53	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals by sea is totally cruel and inhumane. The animals are not able to speak for themselves and have to suffer in silence in an environment that is totally unknown to them. The number of animals who die at sea or have to put down because of their suffering is proof on its own that no live animal should be put through the trauma of a sea voyage, however long or short it is. The animals are destined for human consumption once they reach their destination - why can't they be slaughtered humanely here and the carcasses transported by sea - no cruelty to the animals and a much cleaner and more hygienic way of exporting animals for human consumption - export the frozen carcass and not the live animal. I think transporting live animals by sea is the worst form of cruelty possible. Mr Steenhuysen - please rethink the regulations and follow the example of Australia and New Zealand..	Trunell	Western Cape	retired

	2025-08-16 13:13:30	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I AM TOTALLY AGAINST THIS!! Having spent 32years in international freight (cargo) I am well aware of most matters concerning the transport of animals. Air transport is the only way to go, and that is in extreme cases & with the many regulations that are currently applicable. OCEANFRIEGHT IS NOT AN OPTION. The reasons detailed in the ANIMAL WELFARE CONCERNS are 100% correct and I am appalled that Minister Steenhuizen can even contemplate this proposal. * Ocean transport for animals has an inherent Lack of Accountability & Oversight. * Ocean transport of animals impacts negatively on Public Health. * Ocean transport of animals has Bio-Security Risks. * Ocean transport for animals has very serious Moral & Ethical Implications. * There are FLAWED Economic Justifications given in the argument supporting Ocean Transport for animals and finally * There are many Regulatory Limitations apparent in this argument, that would negatively affect the wellbeing and the actual life of these animals. THIS PROPOSAL IS A DEFINITE DISGRACE and MUST BE IMMEDIATELY DISBANDED.	Wendy	Gauteng	retired
	2025-08-16 13:17:48	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	From previous reports and experience we know that these animals do not fare well in these condition and that many animals have died because of dehydration and lack of space for each animal. 	2025-08-16 23:17:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	A nation is judged by how they treat their children and animals. South Africa has proved on numerous occassions that we fail on this front in epic proportions. Animals being shipped alive suffer in unmentionable ways. Starvation, thirst, injury and cruelty from handlers. As a nation we should be at the forefront to protect those who cannot speak for themselves. Will these be seen as a loss of income, it should not. Animals can still be humanely slaughtered and meat frozen and shipped to countries with a trade agreement. Decreasing risk to all parties involved. We should do better.	Olivia	Gauteng	employed individual

	2025-08-17 07:17:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Shoving countless poor animals into a confined space where they have to live for weeks while travelling is inhumane. They cannot move freely as God intended and they are probably standing in their own faeces and covered in urine from their fellow travellers. Death also occurs on the journey which further exposes them. I don't think it's a good practice at all and it's always about the money, never about the safety of the animal.	Belinda	Western Cape	employed individual
	2025-08-17 07:24:41	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	I think it is absolutely inhuman and bad morals to allow animals to suffer in that way. Have the animals slaughtered in a human and healthy way as regulated by our laws and export the meat , but not the way it is done at the moment.	LC	Free State	employed individual

	2025-08-17 22:50:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their own waste and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn't end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply. 	2025-08-18 10:10:40	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	The journeys are long and overcrowded. The animals suffer from overheating and often disease. They get sick and die during transport and suffer from immense dehydration and have no where to relief themselves other than were they stand. This is surely a BIG concern for animal and human safety. The animals endure cruelty especially when loaded and offloaded in ports. They get no rest and in the grand scheme of things, all of the above mentioned leads to UNHELATHY MEAT IN ANY CASE, if not with long term detrimental affects. The history of animals sufferings during this kind of export is to GREAT to ignore!! When will the human race stop being so greed filled and display some compassion and sheer good old common sense! It's catching up with us but we will only listen and learn when we feel THE PAIN!!	Sandi	Mpumalanga	business owner
	2025-08-18 10:30:46	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am totally opposed to this as well as all forms of animal cruelty. Animals have souls, for this reason God commands us to "Take care of the souls of your animals", in Proverbs 12:10. It is a righteous man that has regard the life of his beast. Humans have a responsibility given by God to care for His creatures. The unrighteous will stand before God and give an account, that is a certainty.	Cheryl	Western Cape	retired

	2025-08-18 10:31:57	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I see so many animals each day that are not cared for, often used only for people's own enrichment. Too often, it feels like there's little compassion. God entrusted us with a very important role — He made man and said: look after the earth. Yet, instead of protecting it, we often do the opposite. Just look at the statistics of how many animal species have already gone extinct. Even when it comes to pets, the same problem exists. A bearded dragon may seem exciting and "unique" at first, but after six months, when the novelty wears off, who takes responsibility for that animal's well-being? We need to be wise in the decisions we make — especially those that have long-term consequences for animal welfare and the sustainability of creation. Even practices such as exporting animals to other countries carry serious risks, not only for the animals but also for human health. Stress on Animals During Export Long Transport Hours Animals can be confined for many hours or even days with little space to move. This causes exhaustion, dehydration, and injuries. Heat Stress & Overcrowding On ships or trucks, animals often face high temperatures and poor ventilation. Overcrowding increases the risk of suffocation, trampling, and death. High Mortality Rates For example, in live sheep exports, studies show up to 2–3% may die during long sea voyages due to stress, disease, or heat. Cattle also suffer from "shipping fever" (respiratory illness triggered by stress and cramped conditions). Disease Risk Stress weakens the immune system, making animals more likely to catch or spread diseases. Exported animals can introduce new diseases to other countries, endangering both animals and humans (zoonotic risk). Behavioral Distress Signs of stress include restlessness, refusal to eat, aggression, or self-harm. Many species, especially wild-caught or exotic animals, do not adapt well to transport and confinement. Ethical Concerns The World Organisation for Animal Health	Ewalda	Mpumalanga	employed individual

	2025-08-18 11:29:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Of course no regulatory measures can prevent the acute suffering of animals sent by sea. The regulations may ameliorate their conditions to a small extent, but the abnormal conditions, terror and stress for weeks on end will remain. In addition, once the animals have left our shores we have no power to control their conditions and how they are treated (after arrival too), fed, watered, etc. Many of our animals also appear to go to countries which are not known for their humane treatment of animals. They are likely to experience great cruelty in many cases. It is totally unnecessary to export live animals, since they will arrive in a deteriorated condition with the meat adversely affected. Why not insist that the animals are humanely slaughtered and the meat exported, without the animals undergoing stress, harm, dehydration and physical suffering? This is the civilised thing to do.	Dawn	Eastern Cape	retired
	2025-08-18 11:29:35	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	There are no guarantees about the stress, safety and welfare of live animlas being transported by sea. Live transportations should be stopped immediately.	Helena	Gauteng	retired

	2025-08-18 15:04:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I live in Gonubie, East London, Eastern Cape. At least one of the ships used to export live animals to the Middle East regularly calls in at the East London port. It has happened a few times in the past that the ship was not able to dock, and instead anchored off the Gonubie coast. For several days, the air was heavy with the stench emanating from the ship - a foul combination of excrement, blood, filth, distress, and despair. It made headlines. The SPCA inspectors who were allowed aboard (eventually) were horrified by what they found. Their request that their vet be allowed to travel with the animals was denied. South Africa has cosied up to some of the greatest villains on the world stage. We have instituted unjust and discriminatory laws. We have ignored the UNESCO designation of ancient forest and are allowing it to be decimated in favour of an industrial zone. Must we, a country which relies on our animal wealth for tourism, now also contribute to the ongoing torture of animals by allowing live animal exports by ship? I won't be surprised if this happens, but I will say that it does not happen in my name. I categorically DO NOT support live animals exports nor any proposed regulations allowing this barbaric practice to continue.	Graeme	Eastern Cape	self-employed

	2025-08-18 15:56:07	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As Gandhi said, you can judge any society by how it treats its animals. The export of live animals by sea is known to cause incredible distress, disease and deprivation, with many animals suffering or dying in transit. This was illustrated in the 2024 incident where animals on the Al Kuwait ship docked in Cape Town were found under atrocious conditions. Most enlightened countries have moved to ban this inhumane practice. South Africa prides itself as an enlightened democracy and has always taken a fairly enlightened approach to animal rights. I strongly feel that mass live export of farm animals is cruel, inhumane and simply a case of crude profiteering at the expense of innocent animals. South Africa should refuse to support this cruel, outdated and inhumane practice.	Andrew	Western Cape	self-employed

	2025-08-18 18:59:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Prolonged transportation duration by sea, specifically in this instance last several days to weeks, subjecting animals to extended periods of confinement and stress without the opportunity to rest or recover. The welfare of these animals is very poor to bad, considering the following: Livestock are transported in CROWDED AND CONFINED CONDITIONS in densely packed ships, limiting their movement, increasing stress levels, and raising the risk of injury or illness. During long sea journeys, animals are badly neglected and not provided enough food, water, or ventilation, leading to dehydration, hunger, and respiratory problems. Animals, especially land animals, are vulnerable to exposure to harsh environmental conditions such as rough seas, extreme temperatures, and humidity, which can cause suffering and health issues. The processes of loading and unloading can be traumatic, involving rough handling, which can cause injuries and distress. Oversight or veterinary care during transit makes it difficult to promptly address health emergencies or injuries.	Rina	Gauteng	retired

	2025-08-19 09:05:18	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	"But there are other issues of justice—not only for human beings but also for the world's other sentient creatures. The matter of the abuse and cruelty we inflict on other animals has to fight for our attention in what sometimes seems an already overfull moral agenda. It is vital, however, that these instances of injustice not be overlooked. "I have seen firsthand how injustice gets overlooked when the victims are powerless or vulnerable, when they have no one to speak up for them and no means of representing themselves to a higher authority. Animals are in precisely that position. Unless we are mindful of their interests and speak out loudly on their behalf, abuse and cruelty go unchallenged. "It is a kind of theological folly to suppose that God has made the entire world just for human beings, or to suppose that God is interested in only one of the millions of species that inhabit God's good earth." ~ Emeritus Archbishop Desmond Tutu "One day the absurdity of the almost universal human belief in the slavery of other animals will be palpable. We shall then have discovered our souls and become worthier of sharing this planet with them." ~ Martin Luther King, Jr Listen to your souls and then take action.	Estie	Gauteng	employed individual

	2025-08-19 09:28:43	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	I think the case of the Al Kuwait is the perfect reason to bann live animal transport by sea. Nothing more needs to be said. JS is well aware of the consequences of sea travel on livestock. If he ignores their plight and continues in his support of this systemic, large-scale suffering inflicted on animals in favour of trade, I will withdraw my support from DA.	Maggie	Western Cape		
	2025-08-19 09:33:27	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Other ways can be found to export the meat to these countries. If the slaughtering methods are paramount, these countries can send employees to carry out the procedures here in South Africa and then export the carcasses/meat to the destination countries. If so many other countries have stopped live exports, SA can investigate their new methods and copy them here.	Isolde	Western Cape	retired	
	2025-08-19 09:42:20	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	As Animal Welfare Inspector, I am fiercely protective over all animals. I see the way animals suffer daily, in all communities. Just knowing that there are little to no regulations or checks done on these animals Welfare and comfort is disgusting, cruel and inhumane. My wish is that every person who commits this or any other form of abuse be subjected to the same circumstances WE put them into. They should feel the pain and suffering that these animals endure !!! We need to ask ourselves if a top-class competitive horse being exported would suffer the same travel conditions as theses poor animals do - the answer is "Absolutely not" Think on that for a moment !! Thanking you.	Zelda	Western Cape	self-employed	
	2025-08-19 09:49:53	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	Animals is God's creation and should be treated with love and respect.	Marir		retired	
	2025-08-19 09:56:52	Yes I do	Yes I do	Yes I do	Animal Welfare	No I do not	I cannot believe that they would transport live animals in a vessel where they cannot roam. Where do they defecate? Who cleans this? Surely it is not safe for the animals and the meat of these animals in the long run. If meat has to be exported or imported, the animals should be slaughtered and the meat frozen and packed securely.	Wilna	Western Cape

	2025-08-19 12:25:33	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	Transporting live animals, whether by land, sea or air is stressful for them. I cannot begin to image the stress they are under. Some people are bad travelers, but can voice their discomfort. - an animal cannot. If we cannot speak for those that cannot, what does that say about us, as a people? The transport of live animals by sea should cease with immediate effect. The problem with any documentation and laws is that it looks great on paper, but most times cannot be practically implemented. The new draft bill is incredibly comprehensive, but I foresee logistics and costs soaring, which means people will cut corners, offer and take bribes to ensure the animals are transported.	Jenny	Western Cape	business owner

	2025-08-20 11:42:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Why must we as south africans Allow this to happen to our animals? Our own africans can't get rid of the barbarians abusing animals at all. This is ridiculous. We must first sort out our country. Why are we feeding the rest of the world? For what reason?	Rumaana	Gauteng	business owner
	2025-08-20 11:44:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is completely inhumane to allow animals to suffer & be tortured in this way. The cruelty involved in the live exportation of animals by sea is a known fact, just look at the incident of the cattle ship that was docked in the Cape Town harbour during February 2024. To think that it is possible to “regulate this cruelty” by legislation that still allows it, is absolutely absurd. Why not slaughter the animals humanely in South Africa & then export the meat & regulate that process?	Rhona	Gauteng	self-employed
	2025-08-20 11:46:12	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not		Anna	Western Cape	retired
	2025-08-20 11:55:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	This is an abominable practise that no modern day government should allow. Just look at the animal cruelty & torture that was on going on the cattle ship from Brazil that was docked in Cape Town during February 2024. How much more proof is needed that this practice is cruel? If meat has to be exported, slaughter the animals humanely here first & then export the meat, there is no need to torture the animals for weeks & months before finally being slaughtered.	Kobus	Gauteng	employed individual
	2025-08-20 12:08:48	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I may change my mind if those who are in favour of this cruel process are willing to travel by sea in the exact same conditions as these animals.	Anya	Western Cape	self-employed

	2025-08-20 13:35:28	No I do not	No I do not	Yes I do	Animal Welfare	No I do not	It is well documented that the export of live animals, especially by sea, is very poorly managed at all stages. At the farm, only animals that are fit and healthy are separated from the heard. The movement and control of the selected animals must be kept to the minimum under all circumstances and kept that way. The slaughtering of the animals, certifying of the meat, and the handling thereof must be controlled at all times up to the time of final sale. The current practice of transporting by lorry for long distance with unstable conditions with no feed, in unhygienic conditions is disgusting; stressful and totally unsafe. The transfer of the traumatised animals into holding pens, or worse still, being-herded directly into the ship whereby the animals are to be conveyed to their destination is despicable. The sea-voyage is fraught with stress and trauma with inadequate food, faeces and urine accumulating in the crowded pens. Should there be even moderately unstable conditions then the animals fall into this filthy mixture, are not able to eat and are subject to injury and even death. All too frequently and often not reported, the ship is subject to breakdown or worst of all sinking when tens of thousands of animals drown trapped and suffering in agony. Should the animals reach their destination, they are subject to ill-treatment during un-loading and unspeakable cruelty before being killed in the most terrifying and painful manner with total disregard to outdated and primitive rituals.	John	Western Cape	retired

	2025-08-21 09:56:02	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	How is this cruelty allowed. Why export a live animal, crammed into spaces, wgere they can't move, get trampled to death, dont have proper food abd ti endure tgese horrific environment for weeks on end, only to be killed!! What a barbaric act of cruelty!! Stand up and fight for animal rights... STOP THE CRUELTY!	Lorraine	Western Cape	retired
	2025-08-21 10:19:18	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Live animal exports cause unavoidable suffering through long journeys. Notwithstanding low mortality rates, that animals suffer is inevitable. The justification is economic — exporters make more money and importers pay less. This is not about necessity but rather financial gain at the expense of animal welfare. Thus I oppose the continuation of live animal exports and support a shift to humane alternatives such as certified meat exports.	Robert	Gauteng	retired
	2025-08-21 10:36:44	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Imagine as human you have a fear of flying or sea - but you can use drugs to be calm and not get seasick. Animals cannot get that treatment. We as humans can get in life boats or swim, what can they do - humans will not save the animals. So imagine drowning - animals should never suffer because of human greed.	Janine	Gauteng	self-employed
	2025-08-21 10:52:37	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	What is the point of transporting animal while alive? As far as I can tell it is in order to slaughter them at their destination and the only reason to do this, as far as I can tell, is for rituals of a religious origin. This is such cruelty for 'moral/religious' needs. We had a ship dock in Cape Town harbor where the stench of the animal excrement was so overwhelming that it flooded the whole City for days. Now imagine being captive in those conditions? Dying in your own excrement with no help or recourse. It is cruelty and torture of the utmost extreme. South Africa cannot stand-by while this is going on. Regulations will most certainly not help. If these cargo freighters wish to continue transporting live animals, South Africa should say no to them docking in our harbors.	Jolana	Western Cape	self-employed
	2025-08-21 10:56:33	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Animals should be slaughtered locally and the frozen carcasses exported. Not only would this prevent werks of animals suffering but , for those with no interest in animal suffering, it would provide business opportunities and jobs for locals.	Jane	KwaZulu-Natal	retired

	2025-08-21 16:01:32	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Put those responsible for this cruelty in the belly of the ship and see how quickly their minds change. You cannot truly understand the pain and suffering these God-created, beloved animals endure during sea transport until you experience it yourself. Trapped in the dark, terrified, and tossed about for days—this is not care, this is torment. Yet once again, politics raises its ugly head. How much suffering will be tolerated just to fill pockets and feign concern ahead of next year’s election parade? The truth is simple: the countries receiving these animals are fully capable of breeding their own livestock. This isn't about necessity—it's about profit at the cost of compassion.	Charl	Western Cape

	2025-08-22 09:25:57	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	It is quite simple. All people always have two options available when making a decision; to do the easy thing, or the right thing. The right thing, for those of you who are unclear as to what this might be, is to act eithically and with humanity towards both people and animals alike. The conditions under which animals are transported are almost identical to the vision of Hell in times when the majority of people still believed in these things. To permit this is an indictment of all that is decent and compassionate. It is only the utterly despicable and flagitious who would subject any living creature to such conditions.	Mathew	Gauteng	self-employed

	2025-08-22 10:34:32	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I strongly object to live animal export because: It is indisputably cruel; whilst there may be some (theoretical) welfare measures up until departure, there are none after that. So, "Nothing we can do now. Hard luck". AND all of this prolonged suffering because Islam demands Islamic slaughtering ritual. Whilst we as a largely Christian country respect the beliefs of others, we do NOT need to bow to, and enable, this cruel system AND because, economically, pre-slaughtered, packed and refrigerated meat delivered by ship makes far greater sense for both provider and consumer. Bottom line: We are bowing to and enabling an appalling system in order to make a few people rich. Please just stop.	Connie	Eastern Cape	retired

	2025-08-22 10:53:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	South Africa exports thousands of live animals by sea each year. We export mainly cattle to Mauritius and sheep to the Middle East, but its not limited to just that. Last year 52 (FIFTY TWO) animal welfare organisations urged government to ban this cruel trade. Instead, they've proposed new regulations in an attempt to legitimise and perpetuate this harmful practice . The current system lacks credible oversight! By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries – such as Kuwait, Saudi Arabia, the UAE, and Mauritius – have animal welfare standards that fall well below those of South Africa. ? ?Live animal export by sea is fundamentally inhumane.? The very nature of the practice ensures that suffering is an inevitable consequence . Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death.	Marina	Gauteng	employed individual

	2025-08-23 14:26:10	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is absolutely no need to export live animals by sea or by air. They should be humanely slaughtered at our abattoirs and the meat products exported as frozen products. No religious beliefs or customs justify the suffering that animals undergo during live export. It is barbaric to say the least.	Stephen	Mpumalanga	retired
	2025-08-23 14:28:34	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I feel strongly that this cruel practice of exporting live animals by sea needs to be banned completely. The conditions under which these animals are forced to travel and the suffering they endure are horrific. It is immoral and unethical for this practice to continue. These draft regulations will not help the animals as once the ships are out of South African waters the animals are beyond any sort of protection or help afforded by the regulations. Who can forget the horrendous conditions of the animals on the 'ship of death' that was permitted to dock in Cape Town last year? I also do not approve of the Department of Agriculture appointing its own monitors as this is a clear conflict of interest. Other countries have stopped exporting live animals by sea - it is high time South Africa did too. I urge you to please completely ban this practice of exporting live animals by sea.	Margaret	Western Cape	

	2025-08-23 15:10:11	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	No amount of legislation can justify this practice.	Jacques		
	2025-08-23 15:21:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	Export of live animals to other areas does not make economic sense. Areas which do not have animals for meat should not be eating this. Animal welfare stands above and beyond inhumanity. It should be compulsory for officials who support this immoral and unethical practice to endure the journey with the animals under the same conditions, including no access to vital resources during the journey. Overseas transport of animals could also lead to disease distribution.	Jacqui	Gauteng	employed individual

	2025-08-23 18:29:29	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is no need to export live animals. We have capable abattoirs in the country that slaughter within religious beliefs. Job creation is also created for slaughtering of animals in this country and exporting the by products. In fact, emerging farmers are not benefited by exporting of live animals-they get very little of the profits whereas slaughtering in country ensures all farmers,emerging or generational,are on an even keel and can benefit equally-this is all aside from the fact the cruelty is kept to a minimum as well. Our animals need to be protected as much as our people	Nadine	Gauteng	employed individual

	2025-08-24 14:53:13	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	I am writing to express my strong opposition to the proposed regulations regarding the exportation of live animals by sea. While I acknowledge the government's attempt to regulate this practice, I believe these new rules are a misguided effort to legitimize a fundamentally cruel and inhumane trade, rather than address its inherent problems. The suffering endured by these animals during long sea voyages is well-documented and widely condemned by numerous animal welfare organizations. Confining thousands of sensitive, sentient beings in cramped, unsanitary conditions for weeks at a time, often in extreme heat, is not only ethically indefensible but also a stark violation of their basic right to be free from harm. The reality of this trade is that many animals become sick, injured, or die before reaching their destination. The argument that these new regulations will somehow mitigate this suffering is, in my view, naive. It's like putting a fresh coat of paint on a crumbling building; the core problem remains. We would never tolerate this level of cruelty or disregard for the well-being of humans, and it is hypocritical to apply a different standard to animals. They are not cargo; they are living, feeling creatures who deserve our compassion and protection. Instead of trying to find ways to make this practice "less bad," I urge you to consider the moral and ethical imperative to ban the live export of animals by sea entirely. South Africa should take a stand against this inhumane trade and instead focus on promoting the export of chilled or frozen meat, which would eliminate the immense suffering caused by these voyages. 	2025-08-24 23:09:06	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There is absolutely no good reason why animals need to be transported in such horrific conditions. If we absolutely feel the need to export meat, then let it be animals that have already been slaughtered, rather than putting them through hell, just to be killed on the other side of it anyway. This is not only cruel and immoral, but also a massive risk in terms of the spread of disease. We need to move away from these inhumane archaic practices and create a future that is sustainable, for humanity, for our planet earth, and for all living beings.	Anne	Western Cape	employed individual

	2025-08-25 09:08:49	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	To whom this may concern I have reviewed the draft regulations issued by the Minister of Agriculture on 11 July 2025. I do not agree that any regulation can be enforced to a degree these animals will not suffer. I oppose this live export as even countries like Australia are unable to assure appropriate animal welfare standards during live animal exports. The results for these animals is torturous circumstances and suffering. As you have been told over and over again, Live animal export by sea causes unavoidable suffering—heat stress, overcrowding, injury, and prolonged deprivation of food, water, and rest. Conditions on ships cannot replicate welfare standards required on land. Mechanical failures, rough seas, and delays are inevitable risks that regulations cannot prevent. Animals endure weeks in confined spaces, exposed to extreme temperatures and ammonia buildup from waste, leading to illness and death. These harms are inherent to the process, not the result of poor compliance. Therefore, attempting to regulate live export only legitimizes cruelty; the only way to protect animal welfare is through a complete ban. I therefore strongly oppose the draft regulations and call on the Minister of Agriculture to ban live animal exports by sea. I trust you will consider banning this practise totally to ensure that animal welfare standards are upheld appropriately and with their interest at heart. Yours Sincerely	Astrid	Western Cape	retired

	2025-08-26 10:28:01	Yes I do	No I do not	Yes I do	Animal Welfare	No I do not	There's no way I can ever support such a cruel practice of herding these animals into such a confined space for any period, be it a second or 1 month! Humans often treat animals with such disdain and never recognise "how much they understand in what's going on around them" (especially the negative actions) and this causes them undue amounts of STRESS which in the long run goes into their systems and all these "meat lovers" devour that stress and its' associated toxins (all Cause and Effect you see). Hence my absolute rejection of any half-hearted new law which "blindsides us" into believing everything is "above board".	Catherine	Western Cape	retired

	2025-08-04 16:40:52	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	SA is a country that lists among the top 10 worldwide for 'the worst' in most areas, and this seems to be continually overlooked while new Rules and Regulations are 'thought' up to make it look like these makers of said R & R's are concerned by things that caused the changes to be presented. However, keep on trying to brush paint over the flaws that have been in place and difficult to challenge (SA makers of policy do not generally listen to anyone beyond their own limited mindsets). In the minds of many there is the concept that 'animals' don't matter or feel anything. The time is now to really address ourselves, behaviour and actions and outcomes and hard as it is, take a new approach, new decisions, new actions that will result in better outcomes. Sick of the same old same old. To truly change decisions have to be made, solutions have to be found, and then implemented not merely as a knee jerk reactions when something goes wrong as the guideline. Decide right is right from the get go, then we move forward, ... On behalf of the animals and suffering of same - stop this practice. Thank you	Jennifer

	2025-08-04 18:22:19	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Summary of Objection: I object to the proposed regulations for the export of live animals by sea. While they appear to introduce welfare controls, they fail to provide meaningful protection or enforcement. Monitoring requirements (e.g. ammonia, temperature) are not backed by enforceable limits or intervention triggers. Measuring suffering is not the same as preventing it. The regulations also lack clear penalties or real-time oversight once a ship leaves port. There is no independent auditing, and voyage data is not publicly reported or monitored live. Space and welfare provisions remain vague, with no defined stocking density formula to prevent overcrowding. Veterinary presence is required, but without guarantees of autonomy, transparency, or action. Ultimately, these regulations provide the appearance of reform while allowing cruelty to continue. South Africa should follow international precedent and move toward a full ban on live export by sea. No regulation can make this practice humane.	Andre	Gauteng	employed individual

	2025-08-04 20:27:57	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I am deeply concerned with the need to move livestock in appalling conditions which causes extreme distress and suffering when, if it was just "meat" they wanted, it could be provided by slaughtering the animals locally under South African animal health standards and then the transporting of carcasses in refrigerated containers. I strongly suspect that the need for live animals is more to do with animal sacrifice rituals which are brutal and abhorrent. I would ask the Minister of Agriculture to look into this aspect. this kind of primitive practice needs to be shamed and ended as soon as possible. For that matter the growing trend of cruel animal sacrifice in this country needs to be exposed and legislation put in place to ban these primitive practices here too.	Cynthia	KwaZulu-Natal	retired
	2025-08-04 20:30:18	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It is cruel and has to be stopped, no amount of money can be worth the suffering of these animals. Shame on anyone that thinks this is OK.	Gerda	Western Cape	retired

	2025-08-04 20:46:10	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I strongly support the banning of live animal exports by sea due to the inherent cruelty, risks, and lack of enforceable welfare standards during long-distance transport. Animals endure extreme stress, overcrowding, injuries, hunger, dehydration, and exposure to extreme temperatures while confined in cramped conditions for days or even weeks. These voyages frequently result in unnecessary suffering and, in some cases, high mortality rates. Once the animals arrive at their destination, they often face further suffering due to lower animal welfare standards and brutal slaughter practices that would not be permitted in their country of origin. There is no humane way to conduct live exports by sea. The risks and suffering are systemic and cannot be mitigated with regulation alone. Exporting chilled or frozen meat instead not only protects animal welfare but also supports local slaughter industries under regulated and inspected conditions. Ethical, environmental, and reputational concerns make it imperative that this practice be brought to an end. I urge decision-makers to prioritize animal welfare, public sentiment, and South Africa's international image by implementing a total ban on live animal exports by sea.	Walter	Gauteng	retired

	2025-08-05 07:10:40	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	To treat a living creature in this inhumane way is despicable. Its bad enough the animal is going to be slaughtered in the most horrific manner at its middle east destination, but to subject a living creature to this horrific prolonged trauma en-route and prior to its being slaughtered is totally unacceptable. The conditions on these so called "ships" is nothing short of horrific. No matter what legislation you put in place, once the vessel sets sale, those poor creatures are at the mercy of that crew. It is just a job for some and compassion is not a prerequisite for employment on these vessels. There are far too many factual reported incidents of cruelty and horrific conditions to be ignored. And what are the repercussions and consequences of not properly looking after these poor creatures that have been placed in their care....well nothing!! And there in lies the lack of accountability with no recourse. All we see and hear about in this mess of a country is the putting of more useless unenforced rules and legislation in place. Those that have a conscience and a voice need to speak out against this practice on behalf of the victims that have no voice.....	Roland	Gauteng	employed individual

	2025-08-05 07:52:40	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The newly proposed regulations is an attempt to legitimise and perpetuate the inhumanity of the current system. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries – such as Kuwait, Saudi Arabia, the UAE, and Mauritius – have animal welfare standards that fall well below those of South Africa, whivh are already invioudly lackong wothin yhe vurrent way of transporting these animals. As lve animal export by sea is fundamentally inhumane, the very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. It's absolutely monstrous	Monique	Gauteng	
	2025-08-05 07:55:05	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I believe that there should be an all-out ban. Personally, I look at the proposed "commercial wildlife preserve" bill that the government is pushing, and feel that much the same, it's just proposed canned hunting and all-out exploitation of our land, air and (most alarmingly) sea. The government has no interest in actually preserving our wildlife and even less interest in animal welfare or the morals required to properly act and enforce the required laws, rights and disciplines to address these issues. heck - they're the ones pushing for exactly the opposite.	James	Gauteng	employed individual
	2025-08-05 07:58:36	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	this is utter animal cruelty. Why is a DA person supporting this?? He should ban it - & the trade in / captive breeding of / wild animals, fish, birds etc - where is Syeenhuizen's moral compass - his duty of care to the wildlife & environment? He should come clean & join the ANC!	robert	Gauteng	self-employed

	2025-08-05 10:54:58	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It is very easy... All for exporting, just slaughter the animals here in a humane way and export frozen meat. The condition on those ships is terrible	Willie	Western Cape	business owner
	2025-08-05 11:09:20	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It is unethical and inhumane.	Peter		
	2025-08-05 11:20:08	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not		Elizabeth	Eastern Cape	retired
	2025-08-05 11:23:07	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I just don't see how we can cause suffering for animals in the pursuit of profit. I understand farmers need to sell for slaughter but surely there is a moral and ethical need to ensure no suffering. Especially to countries who have low standards of animal welfare. I am totally against live animal transportation by sea.	Stephen	Western Cape	self-employed

	2025-08-05 11:34:36	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Surely it would be more humane to slaughter the animals in an environment that is controlled in South Africa and thus more humane (hopefully)? I do realise that we all enjoy a 'doppie and tjoppie' on the braai, but I would like to know that the animal did not unduly suffer as a result. Equally, we have no control over how the animals are transported and the conditions of this. Would it not be better to send over the carcases rather, in a refrigerated environment? We do this with fish and no one complains....	Susan	Eastern Cape	self-employed
	2025-08-05 11:35:22	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	African animals must remain in SA, I am totally against our animals being exported to countries where their diet and environment will not be good for them. Export of our animals should be banned. Another thing that should be banned is the hunting and trophy trade.	Belinda	Gauteng	retired
	2025-08-05 11:52:07	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I think that animals are sentient and need to be treated with care.	Michael	Western Cape	business owner

	2025-08-05 12:51:24	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	As they are obviously exported alive to be slaughtered later why not ship them over as frozen meat. There would be no loss of money then and minimal pain for the animals concerned.	Jean	Western Cape	retired
	2025-08-05 12:51:32	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Mahatma Gandhi says it all: "The greatness of a nation and its moral progress can be shown by the way its animals are treated" This inhumane practice of live animal transport on death ships must be stopped!!	Wendy	Western Cape	retired
	2025-08-05 13:07:44	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The sheer cruelty of it would be truly terrible. Imagine what it must like for those poor animals to be squashed into a ship where it is dirty, dark and damp. This is condition that they will be in. Imagine yourself in that situation and then think why on earth you would ever want to do that to any other living soul on this earth. If you are happy to do that it means that you are truly heartless and careless. It blows me away that this even has to be considered. Please don't let this happen to these innocent sweet animals.	Piper	Western Cape	student
	2025-08-05 13:16:27	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	If we as South Africans are to evolve as a nation, we have to look after all the vulnerable demographics in this country, including animals. We have a sacred duty to manage animals with respect & compassion, recognizing their intrinsic value as part of God's creation. Unfortunately our government cannot be trusted to regulate themselves. Cruelty to animals dehumanizes us all. It makes us all complicit if we neglect to do the right thing.	Janine	Western Cape	retired

	2025-08-05 17:19:58	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The Animals could be processed in a South African facility according to the religious and ethical beliefs of the country they are being exported to and frozen, either by a South African entity or and agent for the destination country, in a controlled and managed environment. After which, the processed product could be shipped in refrigerated containers to its destination. This would immediately do away with health and biosecurity issues; animal welfare concerns; transmission of disease et al. The cost of the loss of life suffered due to unsavory conditions on the ships can be ameliorated and fed back into the South African economy. Hopefully our people can benefit by more affordable meat prices. By-products such as skins and wool etc. could be processed here as well, creating training and jobs for our people.	Michelle		retired

	2025-08-06 07:22:02	Yes I do	Yes I do	Yes I do	Moral and Ethical Implications	No I do not	The proposed regulations for the Exportation of Live Animals by Sea in South Africa aim to improve animal welfare during transport. However, many organizations and individuals strongly oppose these regulations, arguing that live export by sea is fundamentally incompatible with animal welfare. Some key concerns with the proposed regulations include [1] [2] [3]: - *Inherent Cruelty*: Live animal export by sea inherently involves prolonged suffering, confinement, heat stress, and rough seas, which cannot be fully mitigated by regulations. - *Enforcement Challenges*: Oversight can be patchy, especially once ships leave port, making it difficult to ensure compliance with regulations. - *Lack of Transparency*: The regulations do not clearly outline penalties for non-compliance, raising concerns about accountability. - *Alternative Solutions*: Some argue that slaughtering animals locally and exporting chilled or frozen meat would be a more humane alternative. Given these concerns, it seems that many stakeholders do not support the proposed regulations, instead advocating for a complete ban on live animal exports by sea. If you'd like to share your opinion, you can participate in the public consultation process until August 25, 2025 [2].	Matshidiso	Free State	Non-profit

	2025-08-06 10:12:45	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Absolutely not acceptable. Anyone with a conscience will agree. Furthermore, if we could stop eating animals in general, that would be great. They're beings, not commodities.	Roxanne	Eastern Cape	business owner
	2025-08-06 10:20:49	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I feel strongly that this practice is morally and ethically totally unacceptable. There are no regulations that would make it OK. As we have seen in so many spheres in South Africa, even if there are regulations it is the enforcement that is so often problematic. We shouldn't even be consuming these animals at all! No matter the economic benefit. (Human) slavery was also economically beneficial, and no doubt there were guidelines for the proper treatment of slaves - but we now recognise slavery as a moral stain on our history. Exactly the same applies here.	Karen	Gauteng	self-employed
	2025-08-06 10:29:09	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Live transport of animals has no moral or religious justification as it inflicts unnecessary pain and suffering. These regulations do not provide definitive guidelines to manage heat stress, animal welfare etc. onboard and leave too much to the vessel's veterinary inspector. In addition, these animals are often shipped live to Muslim countries so that they can slaughtered according to halal. However, the principles of halal slaughter are based on compassion, respect, and the avoidance of unnecessary pain for the animal, and so live animals transported by sea do not qualify. A similar statement was made by a South African Iman when the vessel transporting livestock docked in Cape Town.	ANGUS	Western Cape	employed individual
	2025-08-06 10:30:16	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Sea exportation takes time. Animals are living beings and should be transported from point A to B in as short a time as possible. Even transport by road can sometimes take longer than 24-hours which is a no-no.	Louis	Mpumalanga	self-employed

	2025-08-06 10:54:53	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It is absolutely disgusting that we still allow the shipment of live animals. They are sentient beings who are forced to endure excruciating suffering for the benefit of people on foreign shores to be able to eat a piece of steak for supper.	Tanya		
	2025-08-06 10:56:56	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	As a country which claims to support the ethical welfare of all sentient creatures, we are obliged to honour this commitment by halting, or not expanding, actions which undermine this fundamental foundation of our moral wellbeing and our responsibility to uphold a cruelty-free environment.	Alleyn	KwaZulu-Natal	retired
	2025-08-06 10:58:17	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	South Africa (and all other countries) need to ban live animal export by sea due to the inherent cruelty involved in transporting sentient beings long distances in cramped, unsanitary conditions. It is time to stop treating animals like “stock” and recognise that these animals are living, feeling sentient creatures that experience pain and suffering in the same way human animals do. South Africa needs to stand up for those that have no voice of their own - Ban live animal export and set a precedent for the rest of the world to follow!	Samantha	Gauteng	self-employed
	2025-08-06 11:02:23	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I wish to express my strong opposition to the continued exportation of live animals by sea from South Africa. This practice is inherently inhumane, as it subjects sentient beings to severe stress, physical harm, dehydration, and in many cases, death during prolonged sea voyages. No set of regulations, however well-intentioned, can eliminate the suffering that is intrinsic to live animal export. The conditions aboard livestock vessels are not conducive to safeguarding animal welfare, and the lack of enforceable oversight once animals leave our waters further exacerbates this cruelty. It is deeply concerning that South Africa is willing to continue a trade that disregards basic animal welfare standards, especially when many destination countries offer little to no legal protection for these animals. I urge the Department of Agriculture to reconsider this harmful practice. Rather than introducing regulations that attempt to legitimise an inhumane trade, South Africa should demonstrate ethical leadership by banning live animal exports by sea entirely. The moral and reputational cost of continuing this trade far outweighs any economic benefit. I call upon the South African government to prioritise the humane treatment of animals and implement a complete prohibition on the export of live animals by sea.	SHARON	Gauteng	employed individual
	2025-08-06 11:04:37	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals are already suffering during the process of domestic transporting and slaughtering when done on a large scale and this is taking into account the local laws and oversight. The extended journeys by sea outside South Africa's jurisdiction will therefore always be much worse and there is no way to guarantee it is done humanely on a large scale.	Jacques

	2025-08-06 15:21:24	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The exporting of live animals by sea is a NO NO. It is extremely cruel, the animals are pushed in a small space and they become injured very quickly; many animals die in this transport process. The animals are so stressed they can not eat even if any food or water is provided for them. All creatures are God's creation and should not be treated in such an awful manner. The people who herd these animals have no right to even touch animals, they are so harsh and uncaring of the animals feelings and rights to life. They do not care at all for animals. My comments are NO, NO, NO, under any circumstances. Please do not allow this. Those people agreeing with the exportation of live animals are inhuman.	Janet	Gauteng	retired

	2025-08-06 18:50:20	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I believe that the live animal export process can never be successfully regulated, even by an appropriate body that has no conflict of interest (which already is currently not the case). The only moral, ethical and logical solution to address this inhumane practice which also poses a dangerous public health risk, is to ban the practice altogether. I don't believe the flawed economic justification for the practice as the majority of exporters are large corporate farmers. We should ban this practice and should really be investing in initiatives to support local, smaller farmers and develop rural communities. Most importantly, any cruelty to sentient creatures is inexcusable and ruins our credibility as a country.	Joana	Gauteng

	2025-08-07 13:33:26	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals are sentient beings who experience pain and distress like human beings. Transporting animals by ship unnecessarily prolongs their suffering. The conditions on animal transport ships are terrible and there is little to no oversight to ensure a bare minimum of animal welfare. South African officials will not be able to change that. Transporting life animals also is environmentally unsustainable as it would be more effective to transport frozen meat. There are halal butcheries in South Africa. Consumers in the destiny countries are quite capable to purchase meat that was slaughtered halal in South Africa in their local supermarket.	Simone	Western Cape	self-employed

	2025-08-08 00:00:04	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Any inhumane treatment of animals whereby they suffer is unacceptable. If these countries want our meat, then they should purchase it already slaughtered and packed frozen for shipment at related market prices, where the animal was slaughtered humanly without having to suffer an agonising and prolonged cruel death. The animals should be given the respect and kept and reared in a pastured environment and not kept in cages or miss treated and made to suffer. The transporting by sea takes weeks if not months in a small caged environment, through conditions that re cruel and inhuman. The stress and injuries caused are unacceptable and the lack of proper feed and water while being transported are not up to our standards and the lack of oversight to enforce proper care is yet another failure that instigates corruption and miss treatment of the animals. Like other first world countries the practice of transporting live stock should be banned.	Jason	Gauteng	business owner

	2025-08-08 16:52:44	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It is inhumane , due to space constraints, so little or no space for animals to lie down, turn around, or escape distress. They are forced to remain standing, which is very cruel. When the animals panic, due to stress, noise, heat, or motion of the ship, they trample each other, especially the weaker ones fall & get crushed. Voyages are long & the accumulation of feces causes slippery conditions. Animals get trapped in the slurry-like waste, & can suffocate, get skin & hoof infection as their waste ferments They also suffer motion sickness, vomit & dehydrate in hot weather. IF THEY MAKE IT ALIVE, THEY ARE INHUMANELY SLAUGHTERED. Why must animals suffer when they can be humanely slaughtered in SA and we export frozen or chilled meat instead of live animals. BAN the exporting of live animals for slaughter in another country.	Eileen	Western Cape	self-employed
	2025-08-08 16:54:19	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The cruelty to helpless animals is beyond any justification. No one should support this. Surely we can export beef and mutton that has been humanely killed, and not force animals onto the open sea in unpredictable conditions to suffer pain and terror, only to end up in countries where there is not a lot of animal safety and care reputations.	Eileen	Western Cape	self-employed

	2025-08-11 13:54:45	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I have heard from someone who had to be on the ships about the apauling conditions for the animals on these ships and about how many died en route. This is barbaric and supreme cruelty to animals and I am shocked to hear they are considering continuing this horrifying act. It needs to be banned immediately and I am horrified our government is even considering this bill	Sue	Gauteng	self-employed
	2025-08-11 22:22:18	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Transport of live animals by sea is not ethical. When there are other options available, such as freezing and refrigeration, live export should never be considered. The stress endured and filthy conditions faced by these animals is unconscionable.	Natasha	Western Cape	
	2025-08-12 02:41:54	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	In the past, living, feeling beings were transported by ship from Africa in the interests of greed. To ensure not the comfort of these beings but rather that they arrived alive and intact, it is likely there were regulations in place but, as history shows, besdt practices were seldom followed, corners were cut and apathy and neglect reigned. For this, many African people died under terrible conditions. It is unbelievable that it would be suggested, once again, to put indigenous African beings, or any beings, into the same situation. It is unethical to make regulations that would knowingly enable and endorse the suffering of other living beings. It is amoral to look the other way and allow this suffering to continue, with full grasp of the fact that regulations barely translate to practise and really only result in bribery and corruption. It is either completely naive or intentionally ignorant of a government official, especially a minister of parliament, to think anything otherwise. I fully oppose the sale, transport, uprooting and suffering of live animals, as should anyone with a shred of conscience and compassion.	Peter

	2025-08-12 15:30:41	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I do not support exporting livestock by sea cargo for one simple reason , it is a brutal, outdated practice that subjects animals to prolonged suffering in confined, filthy conditions, often for weeks at a time. These ships are not designed for animal welfare; they are floating prisons where heat stress, dehydration, disease, and injury are common, and where countless animals die before even reaching their destination. Profit should never come at the cost of unnecessary cruelty. In an age where we have the technology and infrastructure to transport meat humanely and efficiently, there is no ethical justification for shipping live animals across oceans.	Des	Western Cape	self-employed
	2025-08-12 15:35:12	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals laws and protection needs to be implemented, they have suffered enough at the hands of humans! They are innocent, human criminals are treated better! It's time for animal protection! They feel pain, give birth to life and grieve for their dead. What makes them different? It's a known fact that animals meat is harmful to humans. Why only when we have heart disease or problems, cancer and other aliments do we then stop eating meat? Make the healthy decision, stop eating meat! And protect the innocent!	Lexine	Gauteng	employed individual
	2025-08-12 15:37:55	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The biggest issue for me personally is the disregard for the animals. If humans can suffer sea sickness, it could be that animals could suffer some variation of sea sickness. The fact that that regulation is even considered goes to show how these politicians will readily ignore adverse effects and effect animal cruelty at will.	Tshegofatso

	2025-08-12 16:52:28	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I think it is cruel and unthinking of the government to allow this practice to continue. It is not normal for an animal to Be confined for such a long time. In unsavory conditions and with vessels passing through different weather patterns and the affect on the vessel when passing through rough seas and then being allowed to just stand there in the heat during becalmed seas. Animals are used to Being outdoors with soft ground under their feet and the ability to move around. Especially in the heat, they can seek shade or at least lie down for a period. I can understand that in the old days it was deemed necessary to hel humans to survive but not these days. There are ad aways local animals that can be used and refrigerated containers have been around for a while now. If people want meat then let's add benificiation to the process and make A little extra money for the country by exporting meat products rather than poor animals suffering in this transport method.	Peter	Gauteng	retired

	2025-08-13 05:03:15	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Having in my youth been a Engineer officer at sea and for a short time having sailed on a animal freight vessel (was unable to complete my contract after seeing the abject fear in the Cattles eyes and the stench of fear - loss of bowl control) that came from such cramped confinement . Recommend any politician- legislature who has to authorize such form of transportation- themselves due a mere 5 day trip , then DECIDE Being a sea going officer - the risk associated with the ocean travel is manageable(motion/ salt laden atmosphere / wind and UV exposure to certain humans) , but animals cannot handled the elements at sea (their hooves slip on the decks- bone on wet steel) they fall and are maimed/ trodden on by their fellow travelers and often succumb or suffer for weeks in terrible pain and circumstances(onboard vet attendant cant reach them safely to administer... due to sea state(heavy rolling-pitching) and the larger the vessel LOA the greater this motion tends to be . The continual salt spray over the lower decks (vessels usually multi decked) exasperated the animals discomfort- sores develop and hoof infections (although the fresh water wash downs are done often) However ultimately- its the abject terror in the crammed animal enclosures that that has the greatest effect on the live stock- on some trips to Saudi, if the weather had been bad we often would arrive with as much as 55% of our livestock having died on the voyage . Please this is a barbaric method to transport and must be stopped (regardless of what the shipper states are their mitigation method (un regulated once the loading port departed !!) and South Africa does not need this trade - its poor greed ignoring the animals wellbeing .	Stanley	Western Cape	retired

	2025-08-13 07:11:41	Yes I do	Yes I do	Yes I do	Moral and Ethical Implications	No I do not	It is cruel to load animals for such a long time in a confined space.We have to protect our sea life.This also bring new sickness to our vanurble country that was number 1 in the world and now ZERO.If the people want to do their rituals they can came to an abator and do it their.It would be better to export carcasses.	George	Mpumalanga	retired
	2025-08-13 07:12:45	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The live export trade represents a moral failure. It prioritises profit over the wellbeing of sentient beings, turning a blind eye to their suffering for the sake of economic gain. South Africa's continued participation in live animal export comes at a reputational cost, undermining the country's credibility on animal welfare and ethical farming practices. How we treat our animals, is directly linked to how we treat each other as humans. This is a great concern as there is so much suffering going on in South Africa which show that we don't care. But most of all, animals are a gift from God and God gave us the authority to LOOK AFTER and CARE for them so that they do not suffer on our own selfish account. Humans can think. Animals only have the instinct that God blessed them with.	Alzira	North West	retired

	2025-08-13 08:37:27	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The truama that these animals go through is the same as what people went through when they were captured and put into the holds of slaveships. Living and surviving inhumane practises by men on these ships can never be approved. No matter what directives are passed to regulate the transport of animals there is no oversight after they are loaded and on the sea.	Piet	Western Cape	retired
	2025-08-13 08:57:15	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	We saw the suffering first had at Cape Town harbour. I believe we should give no space for this kind of trade.	Catriona	Gauteng	employed individual
	2025-08-13 09:11:18	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Subjecting animals to trauma (particularly prolonged trauma) simply because it is cheaper than treating them humanely is unacceptably cruel. Export of live animals intended for slaughter should not be tolerated. If the destination customer requires control over the slaughtering process (for ritual or superstitious reasons), then they should be obliged to have the animals slaughtered before departure in a facility approved by them, and carry the additional cost of chill-shipping the meat. The proposed regulations provide the best-case handling of live animals being exported individually or in small groups where the intention is to land them healthy and untraumatised for breeding or other live purposes (e.g. farming).	Godfrey		business owner
	2025-08-13 09:26:23	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Transport of non-human animals by sea can only result in great suffering - regardless of what measures are put in place to mitigate suffering. Outright prohibition is the only ethical option. "The greatness of a nation and its moral progress can be judged by the way its animals are treated". ~Mahatma Ghandi	Kate	Western Cape	self-employed
	2025-08-13 09:29:12	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Exporting live stock will fall short in every way at the volumes exported and the lack of decency by shipping personnel to take care of them in such over crowded and confined spaces. Exporting processed and frozen meats creates jobs on South African soil and prevents stock cruelty/mistreatment, loss. Added jobs for the impoverished ANC steered country is sorely needed.	Gary	Gauteng	business owner
	2025-08-13 09:32:12	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Top be honest no matter the regulations put in place I do not believe that animal cruelty will be prevented. We all know that corruption runs wild in South Africa and this means that the poor treatment of animals will continue with regulations in place or not. No animal can speak up for themselves so we must!	Lesley	Western Cape	business owner
	2025-08-13 09:39:24	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not		Dave	Limpopo	Non-profit
	2025-08-13 09:50:04	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals should not be transported by sea! End of story. Who looks after the animals while at sea? Are injured animals treated? Are the animals fed and watered at all? This is beyond cruel and must be stopped at once!	Annette	Gauteng	retired
	2025-08-13 09:51:18	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Live animal export by sea is inherently cruel, with suffering occurring at every stage—from loading, to transport, to slaughter. The practice prioritises profit over welfare and continues despite viable, humane alternatives. For ethical, compassionate, and practical reasons, it should be banned.	Elizabeth	Western Cape	employed individual
	2025-08-13 10:04:26	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Exporting live animals by sea is controversial and often criticised because it can cause significant harm to animal welfare, public health, and even trade reputations. Here’s a clear breakdown: Why not export live animals by sea Severe animal welfare risks Long voyages (often weeks) mean animals are confined in cramped spaces. Heat stress, cold exposure, or extreme humidity can kill animals before arrival. Limited ability to treat sick or injured animals at sea. High mortality rates Deaths are common due to dehydration, starvation, suffocation, or disease outbreaks. Carcasses must be disposed of at sea, which can attract predators and spread disease. Stress and suffering Loud engine noise, constant vibration, unstable footing, and overcrowding cause prolonged distress. Biosecurity risks Diseases can spread between animals in confined conditions. Arrival of sick animals can harm local livestock industries and public health. Reputational and trade impact Countries that export live animals under poor welfare conditions face public backlash and possible trade restrictions. Legal challenges and international condemnation can harm future export markets. Safer, More Ethical Alternatives Export chilled or frozen meat instead of live animals Animals are humanely slaughtered in regulated facilities before shipping. Meat is transported in refrigerated containers, avoiding welfare risks entirely. Transport live animals by air (only when necessary) Shorter travel times reduce stress and mortality. More controlled climate and better welfare oversight during flight. On-site breeding programs in importing countries Instead of shipping grown livestock, export semen, embryos, or breeding technology. Avoids transporting adult animals and reduces disease spread. Regional slaughter facilities Build or partner with abattoirs close to export ports so animals travel less before slaughter. Maintain high welfare and food safety standards.	Luke	Western Cape	employed individual
	2025-08-13 10:12:27	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	It's just insane, cruel and rediculous to send live animals on a ship to be slaughtered in another country if they arrive there alive. I cant believe there are people who actually proceed with this horrific practice just to enrich themselves.	john	KwaZulu-Natal	retired

	2025-08-13 11:41:54	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	My objections are Moral, Ethical, and related to Animal Cruelty. Laws are only as good as the ability and willingness to enforce. As soon as those ships leave our shores, all of that is gone. Quite aside from that, the level of suffering caused to these animals is despicable and inhumane. It should be banned. Only strictly regulated, managed and monitored transport of live animals for breeding purposes should be permitted, and those animals should travel in conditions that match extremely expensive and upmarket livery stabling throughout the trip.	Heath	Gauteng	business owner

	2025-08-13 17:41:50	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Live animal export is not only inherently cruel but also entirely unnecessary. The conditions these animals are subjected to are appalling. They endure weeks — sometimes months — at sea, confined in overcrowded, unsanitary conditions, which causes them immense suffering. The new regulations being proposed will do little to alleviate this cruelty. The proposed regulation is structured to allow the industry to fully self-regulate, which, as history has shown, results in animals being sacrificed for profit. The industry is well aware of the cruelty involved in live animal exports — which is why the regulations specifically block the release of photo and video evidence that could expose the reality of these conditions. This lack of transparency is deeply troubling, and it is precisely why reputable animal welfare organizations, including the NSPCA, vehemently oppose the continuation of live animal exports. 	2025-08-14 05:43:31	No I do not	Yes I do	Yes I do	Moral and Ethical Implications	No I do not	South Africa's proposed regulations on live animal exports by sea mask cruelty under bureaucratic control. Despite 52 welfare organisations urging a ban, the government opts for legitimisation over protection. Cattle to Mauritius, sheep to the Middle East—this trade prioritises profit, not compassion, prolonging suffering under the guise of regulation. A society's moral compass is reflected in how it treats its most vulnerable. animals, children, and women alike. By allowing such inhumane practices to continue, we erode empathy and dignity at the core of our humanity. True progress demands prioritising care and ethical responsibility over economic gain, protecting those without a voice.	Sindi	Gauteng	employed individual
	2025-08-14 06:26:57	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals deserve the same dignity and respect as humans. Transporting livestock by sea leads to trauma and illness due to stress. Imagine we squeezed hundreds of humans into a tight non hygenic environment where we stood in our own shit for weeks. I'm not a bunny hugger, but really why must the animals be delivered live just because a Religion says so. Let them produce their own livestock. The sick animals they receive and then consume have such high levels of stress that the meat becomes contaminated and leads to humane illnesses.	Robert	Western Cape	self-employed
	2025-08-14 07:01:08	No I do not	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I am an animal admirer. I already feel the manner in which animals are treated and transported is inhumane. We use and treat animals appallingly. To expose them to long journeys of without fresh air daylight room to move is the most dreadful manner to expose any living thing. They are not on this earth for human convenience or capital gain. Humans should be protecting animals. Not expose them to hardship discomfort and poor decision for human gain. I beg you please to not let this become a new way of trade	Janine	Western Cape	self-employed

	2025-08-14 10:31:42	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	I do not understand why live animals are shipped only to be slaughtered at the destination. Surely meat can be exported frozen? It can be certified Halaal.	Veronica	Western Cape	employed individual
	2025-08-14 10:41:58	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	The mass slaughter of animals is morally indefensible, as is the mass export of animals for slaughter. In both cases, animals are treated as lifeless things that have no feeling to serve human appetites. This is a transgression against nd a misunderstanding of Life itself. Eating animals has a deep effect on the web of life and the way in which this eating takes places is of the essence. Where people do or must eat meat, killing an animal should be regulated by strict Laws of Mercy that ensure a minimum of suffering to the animal and a maximum of reverent awareness in those doing the eating.	Silke	Eastern Cape	self-employed
	2025-08-14 10:45:38	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Rather export meat. As far as me as a farmer you do not just say goodbuy to animals you raised and took care of up to stage for slaughter. How do they feed the animals during travel overseas. How can they drink 50 to 100 lit of water per animal per day.How is the space. Even by road in SA we loose 2 or more cattle per trip. I say NO. Yes we as farmers suffer due to export of meat is stopped. But rather I suffer financially rather than seeing animals suffer for a days and I have to explain to JESUS why I was part of cruelty just for the sake of the enrichment of wealth. 	2025-08-14 17:23:35	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Against Live Animal Export My Opposition I watched thousands of sheep being loaded onto a cargo vessel at the harbour—a floating prison carrying them to distant slaughter. Workers used electric prods to force terrified animals up ramps into makeshift pens with inadequate ventilation. For weeks, they would stand in their own excrement as the ship rolled through rough seas. The Queen Hind capsized in 2019, drowning over 14,000 sheep. The Gulf Livestock 1 killed 41 humans and 6,000 cattle in 2020. Livestock vessels sink at twice the rate of freight ships, yet this trade continues. I cannot support the systematic torture of sentient beings. No economic benefit can excuse this cruelty. Better Alternatives Meat Export: Slaughter animals domestically and export chilled meat "on the hook" rather than live animals "on the hoof." This eliminates suffering whilst often proving more profitable. Domestic Production: Finish animals locally instead of exporting them young, as Britain successfully did with its calf industry. Regional Processing: Establish processing facilities serving regional markets, eliminating live transport needs. Conclusion Live animal export by sea is inhumane and outdated. Proven alternatives exist. We must choose compassion over cruelty and end this practice now.	Bernadine	Western Cape	self-employed

	2025-08-15 08:17:47	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	This is an extremely cruel practice and no amount regulations can stop the suffering these animals have to endure. Humanity needs to stop putting profit ahead of everything and start seeing the real picture. Animals suffer enough as it is when going to slaughter to then add in a horrific sea journey in confined spaces with no way to move and living in their own excrement is barbaric. Additionally once they are on these ships there is no way for regulations to actually ensure that they do no suffer!	Shannon	KwaZulu-Natal	employed individual
	2025-08-15 08:31:22	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	NO! That's enough. Just plain and simply, NO!	Brigitte	Eastern Cape	employed individual

	2025-08-15 13:22:09	Yes I do	Yes I do	Yes I do	Moral and Ethical Implications	No I do not	This cruel practice should not be allowed, particularly not for the food trade. Cape Town was stunk out for 3 days when a vessel carrying livestock to the Middle East made an emergency stop recently, reminding us all of how cruel, unhygienic and disgusting this is. Secondly, allowing livestock transfer in the food industry potentially robs South Africans of jobs in the secondary/value added food processing businesses. Our hapless, pathetic government needs to stop selling our resources out of hand and start focusing on developing value added, processing industries to help provide jobs and rebuild our economy.	Janet	Western Cape	retired

	2025-08-16 02:10:21	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	In this day and age, where we claim to be a humane and free society, we call the SPCA on our neighbors and have animals taken away from owners who don't care for them. We put animals out of their suffering to prove our love for them when they have served and befriended us their whole lives. Our farmers take special care of cattle, sheep and goats, supervising the birth of new arrivals, innoculations, the construction of shelters, food, water and pasture management. How can we now throw all caution to the wind and let their offspring be carted off under inhumane conditions, only to be slaughtered under the most extended process, and believe we are congruent, justified and righteous?	Marietjie	Northern Cape	self-employed
	2025-08-16 04:41:12	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Animals must be treated humanely and must not be traded across borders no matter what the purpose is for. There are no good reasons to export live animals. The way a country treats animals shows their humanity as a nation. If other countries want livestock they must rear their own. Animals should only be exported as pets for private use or scientific exchange and this would be a limited number of animals not for consumption. Food can be exported already slaughtered and or processed but never alive as this is cruelty beyond all measure	Maryann	Western Cape	retired

	2025-08-17 18:48:52	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Live animal export should be banned due to the severe welfare risks and ethical concerns it poses. Animals often endure long, grueling journeys in overcrowded, unsanitary conditions with limited access to food, water, and veterinary care. This not only causes immense suffering but also increases the risk of injury, disease, and death. Furthermore, once animals reach their destination, they may be subjected to slaughter methods that fall far below humane standards. By banning live export, we uphold our moral responsibility to treat animals with dignity and compassion, and encourage more humane, local processing alternatives that minimize suffering.	Delaney		
	2025-08-17 19:35:13	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	No I do not	Mahatma Gandhi, who often spoke about the moral measure of a society said of the 8nhumane treatment of animals; “The greatness of a nation and its moral progress can be judged by the way its animals are treated.” If the economical imperative is to have to slaughter these animals, this government cries about mineral beneficiaries, so why not export frozen carcasses.	Fred	KwaZulu-Natal	retired

	2025-07-29 18:54:50	Yes I do	Yes I do	Yes I do	Accountability and Oversight	No I do not	Meat can be exported. Butchering and processing carcasses locally will create much needed jobs in SA. Quality of the exported product can be improved, which in turn may create higher demand. The skins and bones, that aren't exported also provides raw material for other industries, which in turn may create manufacturing opportunities. These products in turn may generate new export markets of their own. It is very shortsighted to export raw materials without any value add. This goes for mining and agricultural produce. Agricultural processing can be considered low hanging fruit, as most of this type of industry can be implemented cheaper and easier than mineral processing.	Mauritz	Mpumalanga	retired
	2025-07-29 21:11:42	Yes I do	Yes I do	Yes I do	Accountability and Oversight	No I do not	Daar is eientlik meer as een van die opsies wat geld. Ongelukkig Kan ek nie almal kies nie. Geen dier behoort binne in 'n boot vervoer te word nie. Dis wreed vir 'n dier om vas gekluister te wees, nie die vars lug of vryheid te he nie. 	2025-08-05 05:21:43	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	From the very creation of all life on earth, man has been tasked with the responsibility of animal welfare. In fact, if one believes in the Bible, which I do, together with 85% of other South Africans, then it's evident that one of man's first responsibilities was the oversight and care of all living creatures and flora. He was later on permitted to kill certain animals for their meat - of the kind which are exported today from SA - but that didn't mean his primary task fell away: the oversight of the welfare of life on earth, even, maybe especially, those be used for the purpose of eating. From an economical perspective and a humanitarian one, slaughtering the animals bound for export here in SOUTH AFRICA is far better for all concerned: the animals don't suffer needlessly; their meat can be transported by air freight or sea in refrigerated containers, the extra cost of which can be offset by the elimination of shrinkage due to loss of life; the meat would be of a higher standard, since the quality of the meat of distressed animals would be affected (tougher); the local economy would benefit from butchery in our country - ie many jobs would be created.	Grant	KwaZulu-Natal	self-employed

	2025-08-05 08:38:21	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not		Rob		
	2025-08-05 08:39:32	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. High-stress conditions, close confinement, and poor sanitation on board create an ideal breeding ground for outbreaks. As other countries—such as New Zealand, Brazil, Germany, the UK, and Australia—have already demonstrated, it is both possible and necessary to phase out or completely ban this cruel practice. At its core, live animal export by sea is not a practice that can be fixed through regulation. No matter how stringent the rules, the systemic cruelty inherent in the trade cannot be eliminated. Attempts to regulate the process serve only to legitimise what is fundamentally an unjust and unnecessary industry. Rather than trying to reform the irredeemable, South Africa must move toward a complete and permanent ban.	Louise	Western Cape	business owner
	2025-08-05 08:50:30	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	SA is facing big financial problems due to very bad government policies and basically no ability to apply existing regulations on almost all fronts. There is no problem with exporting any goods or products to whomever wants to trade. Over and above the export of life animals it is also job loss as no beneficiation is done by slaughter, packaging and whatever to make the product acceptable at its end market. It is also discarding any possibility to ensure proper animal welfare. Thus a resounding NO to keep exporting live animals.	Jakobus PH	Western Cape	retired
	2025-08-05 09:02:40	No I do not	No I do not	No I do not	Accountability and Oversight	No I do not	The Dept of Agriculture is a disaster. Foe example they no longer have a functioning international accredited testing laboratory at Roodeplaat.	John	Gauteng	retired
	2025-08-05 09:16:53	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	Once the ship leaves the port no regulations are mandatory. Animals cannot complain and are left at liberty of people that do as they like	Dawid	Gauteng	retired
	2025-08-05 09:23:09	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	Rather than exporting live animals, the slaughtering should be done in South Africa and meat should be exported in cooler containers. Any meat slaughtered in a butchery hang in cool rooms for a few days before selling it. Why can this not be done in the export trade. If it has to be exported to a country further than six days on sea, the market should rather be changed.	Kleinste	Mpumalanga	business owner
	2025-08-05 09:35:47	Yes I do	Yes I do	Yes I do	Accountability and Oversight	No I do not	The trauma these animals must endure on these long journeys - someone needs to speak for them as they cannot. Well done Mr Steenhuisen	Rose	Western Cape	self-employed
	2025-08-05 09:38:30	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	The export of live animals appears to be mostly to Muslim countries. Muslims are well known for inhumane handling of animals (and women and infidels) with little care for animal welfare. There is no conscience of whether the animal handling is cruel/savage or not. The animal is for sacrifice which is the most important issue for the end-user.	Jim	Gauteng	retired
	2025-08-05 09:55:35	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not		Andre	Western Cape	retired
	2025-08-05 09:56:04	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	This is a cruel and inhumane practice. Animals suffer and die in terrible circumstances. They are living things. Regulations and oversight will not be seen or applied after the ship embarks and no accountability. It's just stock whether living or otherwise. I do not believe there is any justification in money for this trade and no oversight will guard against the abusive and difficult conditions at sea.	Adele	Western Cape	retired
	2025-08-05 10:00:38	No I do not	Yes I do	No I do not	Accountability and Oversight	No I do not	I don't think it's about the the suffering of the the animals but who is benefit from the exportation.	Phanuel	Gauteng	business owner
	2025-08-05 10:10:27	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	The transportation of animals by sea is morally susceptible and accountable, inthat, attention was brought to bare on the recent animal transport ships that visited our waters. The stench eminating from them is clear evidence that the animals are not cared for in the least! This is the alternative to frozen product presenting as not fresh when sent to market! Ban it outright? TOO MANY PEOPLE!!!!	ERROL	Western Cape	retired

	2025-08-06 09:36:08	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	Will you, minister, be willing to sit in a crate under the same circumstances and duration as these animals? The exportation of live animals by sea is an inherently cruel practice that subjects sentient creatures to unbearable suffering. These animals endure long, cramped, and unsanitary conditions for days or even weeks, often with limited access to food, water, or basic veterinary care. The journey itself is a brutal ordeal, where extreme temperatures, rough seas, and overcrowded conditions lead to high mortality rates. The psychological and physical stress of confinement, lack of space, and the inability to engage in natural behaviors can cause severe harm to the animals' well-being. Moreover, the risks of disease outbreaks and accidents further exacerbate the cruelty, making live animal exportation not only ethically indefensible but also a public health concern. This practice should be urgently banned to protect the dignity and lives of animals and to uphold the ethical responsibility we have towards them.	Embrenchia	Gauteng	employed individual

	2025-08-06 15:20:48	Yes I do	Yes I do	Yes I do	Accountability and Oversight	No I do not	Will Minister John Steenhuizen prioritise the killing of white south african farmers as well? I will vote against export animals by sea but I will never vote for the DA again after Steenhuizen lied to President Trump. The DA had the opportunity to let the world know about the anti white racial laws, the killing of white farmers but instead Steenhuizen chose to lie and such up to the SA pres and ANC. He is weak and should not be in that position, sorry	Joan	Western Cape	employed individual
	2025-08-06 15:31:32	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	The sheer numbers of animals transported by ship, e.g., 60 000 sheep in one documented case (The Star: Another Al Mawashi 'death ship' expected to ship live animals from East London to Middle East, Okuhle Hlati, Published 1 year ago) in practice means that the proposed regulations are not even sufficient to MONITOR the health of so many animals (all stationary in pens), let alone observe each and every animal in a single day. Just not possible. Here's another example: Cape Town cattle highlight awful conditions on livestock ships. 21 February 2024. Wedaeli Chibelushi, BBC News. Although these were Brazilian Cattle, the ship was carrying 19,000 cattle - the numbers are just too huge for any meaningful oversight. No matter how strict the regulations, the numbers of livestock involved means that any hope of regulatory enforcement is just wishful thinking. In any case, the South African government has no legal enforcement rights in international waters, which is where these ships travel, where animals and injured and suffer. 	2025-08-07 11:42:05	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	The Human race has the responsibility to protect and care for animals who do not have a voice to complain but can only suffer in silence and hope that someone will do something to help them. It is CRUELTY at its worst! Please stop the abuse and suffering of animals by humans and stop the curelty	gabriella	Gauteng	self-employed
	2025-08-07 11:54:13	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	I am concerned about the oversight, the care of the animals once they leave South African waters. The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries—such as Kuwait, Saudi Arabia, the UAE, and Mauritius—have animal welfare standards that fall well below those of South Africa.	Nora	Western Cape	retired

	2025-08-13 07:44:24	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	. Yes. The nature of long sea journeys causes animals severe stress, dehydration, injury, and death. This suffering is unavoidable and constitutes unnecessary cruelty under South African law (Animal Protection Act 71 of 1962) and international welfare standards. 2. No. The proposed regulations lack credible independent oversight and allow conflicts of interest, undermining enforcement. They do not address the fundamental welfare challenges of the trade and fail to meet standards set by the World Organisation for Animal Health. 3. Yes. To uphold constitutional rights (Section 24) and international commitments, South Africa must ban live animal exports by sea and shift focus to exporting meat products, which is humane and economically sound. 4. No. These regulations merely seek to legitimize a cruel and unlawful practice. They do not protect animals from inherent suffering and undermine South Africa's legal and ethical responsibilities. 	2025-08-13 09:58:30	Yes I do	No I do not	No I do not	Accountability and Oversight	No I do not	The proposed regulations are obvious, as they currently stand, no more than a work around without actually attending to or resolving the relevant issues regarding wellbeing or health of the livestock and as such will result disease outbreak of some manner. It's a lazy and rushed proposal and if the relevant persons in charge of creating it are incapable of creating are unable come up with are proper proposal that actually attends to the health and wellbeing of the relevant livestock, they should than be replaced by those who are actually competent and able to formulate such a proposal, not just for the betterment of the livestock, but also in regard to trade relations and preventing disease outbreaks which could occur as a result of poorly formulated proposal by those looking to only circumventive basic ethical standards.	Claude	Western Cape	business owner
	2025-08-13 10:02:05	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	Exporting live animals by sea is controversial and often criticised because it can cause significant harm to animal welfare, public health, and even trade reputations. Here's a clear breakdown: Why not export live animals by sea Severe animal welfare risks Long voyages (often weeks) mean animals are confined in cramped spaces. Heat stress, cold exposure, or extreme humidity can kill animals before arrival. Limited ability to treat sick or injured animals at sea. High mortality rates Deaths are common due to dehydration, starvation, suffocation, or disease outbreaks. Carcasses must be disposed of at sea, which can attract predators and spread disease. Stress and suffering Loud engine noise, constant vibration, unstable footing, and overcrowding cause prolonged distress. Biosecurity risks Diseases can spread between animals in confined conditions. Arrival of sick animals can harm local livestock industries and public health. Reputational and trade impact Countries that export live animals under poor welfare conditions face public backlash and possible trade restrictions. Legal challenges and international condemnation can harm future export markets. Safer, More Ethical Alternatives Export chilled or frozen meat instead of live animals Animals are humanely slaughtered in regulated facilities before shipping. Meat is transported in refrigerated containers, avoiding welfare risks entirely. Transport live animals by air (only when necessary) Shorter travel times reduce stress and mortality. More controlled climate and better welfare oversight during flight. On-site breeding programs in importing countries Instead of shipping grown livestock, export semen, embryos, or breeding technology. Avoids transporting adult animals and reduces disease spread. Regional slaughter facilities Build or partner with abattoirs close to export ports so animals travel less before slaughter. Maintain high welfare and food safety standards.	Jake	Western Cape	retired

	2025-08-13 15:00:08	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	We call on the South African government to prohibit the export of live animals by sea. Transporting animals over long distances in confined and often inadequate conditions exposes them to extreme stress, heat exhaustion, dehydration, disease, and avoidable suffering. These risks are inherent to the nature of long-duration sea voyages and cannot be sufficiently mitigated through regulation or monitoring. South Africa can protect animal welfare while maintaining international trade by prioritising the export of chilled or frozen meat products, ensuring economic benefits without compromising humane treatment. A ban on live exports by sea would align our nation with international best practice and demonstrate a firm commitment to ethical and responsible trade.	Kristie	Gauteng	employed individual

	2025-08-14 10:48:17	Yes I do	No I do not	Yes I do	Accountability and Oversight	No I do not	Dear Minister John Steenhuisen Thank you for taking the time to consider my input and comment on the proposed regulations for the Exportation of Live Animals by Sea. I strongly condemn the exportation of live animals by sea, as the evidence of harm and distress caused to the animals provided by Stop Live Export SA (SLESA) and supported by 50 social justice and animal welfare organisations, demonstrate that there are clear moral and ethical implications to this practice. Furthermore, there is growing distrust in Governmental Institutions with specific regard to their capacity to regulate and most importantly, to enforce the rule of law. For this reason alone, I completely reject the proposed Regulations, and implore you to please respect and take recommended actions as proposed by non-governmental stakeholders. Thank you for your consideration in this regard. With my best wishes and respect	Raynier	Western Cape	business owner

	2025-08-04 19:14:59	No I do not	No I do not	No I do not	Economic Justifications	No I do not	Considering the current tariff increases that will negatively mpact the agricultural sector it is suicidal to consider prohibiting the primary means of transporting livestock to major markets. What other options are available? The idea of flying sheep, goats and cattle is ludicrous and could only be considered by radical animal welfare NGOs. Secondly, I have been involved in conservation law enforcement and am quite certain South Africa has neither the facilities or trained staff to implement regulations. I consider the whole idea of virtually banning South African livestock exports to be madness. I am also aware that accusations of mistreatment on ships carrying Austrailian livestock have been disproven, or shown to have been instigated by radical animal rights activists. In some cases criminal charges have been laid against individuals that paid seamen to mistreat and video such mistreatment.	Edward	KwaZulu-Natal	retired

	2025-08-07 18:04:30	No I do not	No I do not	No I do not	Economic Justifications	No I do not	Proposal: The Necessity of Live Animal Export by Sea Date: August 7, 2025 To: Relevant Governmental Bodies, Agricultural Stakeholders, and Industry Partners From: Dries Louw Subject: Justification for the Continuation of Live Animal Export by Sea This proposal outlines the critical arguments for maintaining the export of live animals by sea. This practice is a fundamental pillar of our national agricultural economy and is essential for meeting specific international market demands. The necessity for live export is driven by key factors in importing nations, particularly in the Middle East and Southeast Asia. Many of these countries lack the cold chain infrastructure (refrigerated storage and transport) required for processed meat, making it unfeasible. Furthermore, there are significant cultural and religious requirements for fresh, local slaughter (e.g., Halal), which can only be met by importing live animals. While acknowledging welfare concerns, we believe a framework of stringent regulation, use of modern, purpose-built vessels, and mandatory onboard veterinary care makes this a responsible and necessary enterprise. Sea transport is the only logistically and economically viable method to meet this global demand. Prohibiting this trade would result in significant economic losses for our farmers and the nation, and would neglect the food security and cultural needs of our key trading partners. We advocate for a policy of robust regulation, not prohibition.	Dries	Free State	self-employed

	2025-08-11 15:28:32	Yes I do	No I do not	No I do not	Economic Justifications	No I do not	A Developed economy has the luxury of thinking that meat comes prepackaged. Any person who has spent any time on a farm, hunt an animal or even just watch a carnivorous animal catch kill and eat another animal has no illusions as to what makes food. Any actions or activities that kill livestock before they reach the slaughterhouse is (in blunt terms) lost profit. The death of animals before they reach their destination will also give rise to a lot of disease. that will also result in lost profit. Do not add regulatory burdens to a field that already innovates to prevent loss. As any government interference will more likely than not increase costs and decrease the number of organizations that can compete. thus lowering cost compactivity and increasing unemployment. Lastly the Idea that the way we treat animals in inhumane is paradoxical in itself. the are not human thus can only be treated in-human-ly. If there is animal cruelty involved (maliciou intent torture animals) which would decrease profit. Then the company is incentivized to deal with it, Otherwise stop trying to fix something that works and work on the THOUSANDS of other things that do not and need urgent attention. Staring with Foot and Mouth disease outbreaks from cattle coming illegally over the border. Or animals grazing along highways causing traffic collisions and killing people. Or huge amounts of stock theft that occur daily. Or The pathetic state of Farming schools in the country Or The collapsing numbers of Fruit, Beef and Milk Farms. Or the collapse of public soil Analysis and bio analysis due to mismanagement and lack of repair. Or The use of GMO seed in the country Or the Lack of control of supply and quality of GMO seed in the country. or The lack of control over pesticides and their side effects Or the lack of strategic grain reserves. Amount of farming pesticides and effluent from animals and people (living on the banks of resivours and dams) entering the rivers and dams. and many more.	Miles	KwaZulu-Natal	employed individual

	2025-08-14 08:47:19	Yes I do	No I do not	Yes I do	Economic Justifications	No I do not	This is animal cruelty. We have so many hungry South Africans right here amongst us, why are food (in every broad aspect) exported? Economic development is not an answer anymore as we all see the corrupt economic system. Every animal is worth much more right here in SA, rather than exported for funds that go directly to the wrong pockets. Rather farm with those animals here, making SA a rich country again, with resources and rather export the processed products like cheese, long life milk (to name only a few examples of the possible products derived from these animals) and in the process create jobs to the many unemployed citizens. We all suffer from these exports, but banning this can open a million other doors to help SA.	Amouri

The suppliers and buyers must be transparent and end customers must be informed what is required by the full supply chain. The effective management and reduction of animal cruelty must sit with the decision of all buyer in the chain.	Christo	Gauteng	self-employed
	2025-08-04 17:42:48	Yes I do	No I do not	Yes I do	Other	No I do not	The practice of exporting live animals should be totally banned. Just visit the emigration museum in Hamburg or read about the Exodus (ship 1947) to find out how horrific it is to travel on an overcrowded vessel with no space, room to breathe, fresh water or decent food. Let alone a bed to sleep in or medical services. Then multiply by 1000 to imagine the truly terrible conditions these poor animals are subjected to. Even if it made any financial or other kind of sense - which it absolutely doesn't - this is a practice worse than evil. Slaughter here according to need/traditions and transport cleanly and safely in a temperature controlled environment using much less space and less fuel, risking fewer diseases and other 'mishaps' and causing uncountable less anguish.	D

Om te "heers oor die skepping" beteken nie om wreedheid teenoor diere toe te laat nie; dit beteken juis om diere, wat deel is van God se skepping, te bekerm en hulle teen wreedheid te beskerm, ongeag die prys. . .	Kallie	Western Cape	retired
	2025-08-05 08:46:52	Yes I do	No I do not	Yes I do	Other	No I do not	Why Live Animal Exports Must End South Africa exports thousands of live animals by sea every year — mainly cattle to Mauritius and sheep to the Middle East. But this trade is inherently cruel and must be stopped, not regulated. Here’s why: ? Extreme Suffering at Sea Animals are crammed into ships for weeks in filthy, overcrowded conditions. They stand in their own waste, suffer from heat stress, disease, dehydration, and injury — many don’t even survive the journey. Regulation can't change the basic brutality of sea transport. ? Regulations Don’t Prevent Abuse Despite new proposed rules, 52 animal welfare groups agree: the suffering is unavoidable. No amount of oversight can guarantee welfare on long, gruelling voyages. These “regulations” are just an attempt to justify the unjustifiable. ? It’s About Profit — Not Welfare This trade benefits a few exporters while South Africa’s reputation suffers. There are more humane and sustainable ways to support our agricultural economy — ones that don’t rely on live animal suffering. ? A Global Shift is Happening Countries like New Zealand have already banned live exports by sea. It’s time South Africa joins the growing global movement toward compassion and modern, ethical trade practices. We must call on our government to ban live animal exports completely. Our animals deserve better. South Africa can do better.	Ursula	Gauteng	business owner

	2025-08-05 20:56:57	No I do not	No I do not	No I do not	Other	No I do not	My biggest concern is the fact that the regulations is nothing more than a smoke screen. "To make farmers more traceable". In my opinion. If the government want to secure better trade relationships for the food producers of South Africa. They should start by, firts supplying our own market with the products produced in South Africa. And only after that has been done can we open our borders to the rest of the world to fill up the shortage that is stil needed to feed every one. This would ensure that, prices wouldn't vary so much throughout the year. So more stability for the producers and more stability for the consumer's.	SJ		
	2025-08-05 21:02:52	No I do not	No I do not	No I do not	Other	No I do not	How on EARTH can you be worried about the treatment of animals on the sea,when they are on the way to the executioner?? Baffles me. These animals are not pets,they are going to be made into delicious dishes to be eaten. You have too much free time on your hands,focus on our countries issues first,before worrying about a sheep enjoying its final trip.	Brad		business owner

	2025-08-05 22:18:17	Yes I do	No I do not	Yes I do	Other	No I do not	Government can't even enforce the human rights guaranteed by the constitution of South Africa for human beings. There is no way they will be able enforce the proposed regulations, even if they had the will, funding and capacity to do so. In addition to that, these regulations would only be enforceable within the borders of South Africa. The only way to prevent the inhumane conditions inherent to the shipping of live animals would be to follow the example set by countries like Australia, which completely bans the shipment of live animals from / through our ports / borders. From Australia the animal exporters paid for example the SPCA to stop South African exporters because we undermine the SA exporters undercut them in price. That is the whole story! Not about animals, but about money!	Petrus	Eastern Cape	employed individual
	2025-08-06 18:10:53	Yes I do	No I do not	Yes I do	Other	No I do not	No matter what regulations are in place, the conditions on board these vessels are cruel. It is not just a day or two that the animals are subjected to this - many days/weeks. So any regulation prior to shipping might be controlled but not once the ship sails. I've been on board a livestock carrier and it haunts me.	Katja	Outside SA	employed individual
	2025-08-06 19:04:14	No I do not	Yes I do	No I do not	Other	No I do not	My concern is that our animal farmers, are being paralyzed by these regulations. We have a clear end to end business transaction here, whereas the producer knows the quality, and quantity of what attracts the buyers and the conditions to keep the product in it's full original state to satisfy the customers, and the customers also knows what they are ordering. Therefore I suggest that this matter be left between the two parties to decide what they want as long as each one is satisfied and both the importer, exporter, and the end user are happy. No one wants to sale or buy a bad product, of which will jeopardize the business. Those in this specific business are the ones who knows and can put the regulations they want as far as they are the ones in that chain of business. If one fails, fails his or her own business and someone takes over the customer.	Patience	Gauteng	self-employed

	2025-08-08 14:27:58	Yes I do	No I do not	Yes I do	Regulatory Limitations	No I do not	While regulations may be proposed, there is no way of ensuring they are implemented and enforced. Too much, not only here in SA but the world over, is 'open to interpretation' creating a baseless template. Furthermore, no amount of ministration can really offset the element of suffering. It is important not to fall for hype and narrative The sheer fact of the matter is that live stock exports by sea cannot be justified when judged dispassionately. The only solution is to export frozen or otherwise preserved produce SA may meet consumer demand of the Middle East and Mauritius, but on evolved terms. Foreign sensibilities are not our concern - we can trade with them but not without spine So far, for the sake of a few -those who appear indifferent in government -(possibly appointed by dint of this), and -those who shout most loudly in the belief they are promoting the red meat trade it seems as though millions of cattle and sheep, as well as millions of mindful citizens are made to suffer This is not democracy, nor is it the right trajectory to national standards, conduct and pride	Gavin

	2025-08-15 12:34:10	Yes I do	No I do not	Yes I do	Regulatory Limitations	No I do not	Dear Minister Steenhuisen, I strongly do not support the export of live animals by sea. South Africa has the capacity and expertise to process meat locally, and this is the route we should be taking. Exporting live animals is unnecessary, cruel, and ultimately undermines both animal welfare and the quality of our products. Having lived in countries such as Saudi Arabia and Mauritius, I have seen firsthand how poor conditions during transport and slaughter impact the quality of meat. The meat available in these countries is consistently far inferior to what we produce here in South Africa. There is simply no other explanation for this than the stress, poor handling, and inadequate care of the animals during transport. As someone who has hunted extensively, I am well aware of how the welfare and handling of an animal affect the taste, tenderness, and overall quality of its meat. Animals that are stressed, dehydrated, or poorly fed produce meat of noticeably inferior quality. Processing meat in South Africa before export not only eliminates unnecessary suffering, but also allows us to capture more economic value locally, create jobs, and maintain the world-class reputation of South African meat products. There is no practical, ethical, or economic justification for exporting live animals when we have the capacity to process and export high-quality meat. I urge the Department to ban live animal exports and focus on building a system that ensures both animal welfare and sustainable economic benefits for South Africa. Thank you for your consideration. 	2025-08-05 21:46:09	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	The photos and video material what I have seen previously of the crammed conditions, overcrowding, animal manure, unhealthy conditions, sick and dead animals on these ships are horrific to say the least. I cannot understand that any government and livestock organization and state veterinary authorities can allow these boats to transport live animals for export under these conditions. If these countries want meat SA can export to them frozen carcasses of meat from animals properly slaughtered and hygienically packed and prepared. These animals exported by boats are all going to be slaughtered and cut up to eat and are not for breeding livestock herds.	Petrus	Western Cape	retired
	2025-08-05 23:05:55	No I do not	No I do not	Yes I do	Public Health and Biosecurity	No I do not	how much more damage do we want to inflict on this creation to cause the universe to show humans that's ots ENOUGH.....STOP the destruction and inhumane activities	georgi	Western Cape	retired
	2025-08-06 06:34:15	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not		M J	Free State	unemployed individual
	2025-08-06 08:47:28	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	The entire experience of transporting live animals in vessels across the ocean is inherently traumatic and while these regulations aim to improve conditions 1) they cannot address the trauma of the experience itself unless the experience no longer happens and, 2) the regulations can't ensure that animals are able to engage in their natural behaviour in such an unnatural environment. Its also of great concern to me that the export of live stock poses a health hazard during a time where pandemics have already been experienced, and that this has been highlighted, yet the practice continues.	Kerry	Eastern Cape	business owner
	2025-08-06 12:01:27	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	We shouldn’t be exporting animals to other countries when 15% of South Africans face food insecurity on a daily basis. We need to start choosing people over profit. Exporting animals in such conditions also has implications for public health and spread of zoonotic diseases. SA also shouldn’t be exporting to countries that don’t share our values on animal welfare. We are betraying our own people and animals by engaging in such unethical activities.	João	Gauteng	employed individual
	2025-08-06 12:48:16	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not		Lungelo	Mpumalanga	unemployed individual

	2025-08-06 13:56:27	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	this needs to stop immediately, the conditions these animals suffer in is disgusting. It's going to spread disease. these countries need to grow and farm their own livestock. This government only cares about money.	afzal	Eastern Cape	employed individual

	2025-08-19 18:04:13	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	With today's technology it is abhorrent to still put live animals through the trauma of being packed as cargo onto a ship. Not only is this an animal welfare issue but it also affects human welfare. It affects the welfare of the crew on the ship and the crew in the harbours. But, most importantly it affects the consumers of the meat. With the types of trauma the cattle are put through they produce stress hormones that course througth their veigns poisoning the very meat that is being transported as "fresh". There is nothing fresh about poisoned meat	Kelly	Western Cape	retired

	2025-08-20 09:10:39	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	From viewing the provided material on the Australian live export market, I observed a high risk environment from a public health and biosecurity perspective. From my understanding, South African agriculture aims to deliver high quality foods at great value. This method of logistics at the scale presented in the video may go against that aim. The conditions in which the animals live for 2 weeks i.e., lighting, ventilation, and proximity, do not provide conditions to maintain high quality meat. Moreover, if there is a disease outbreak, how is it mitigated on ship, or are 1000 sheep dumped into the ocean? That being said, I still believe meat exports are of value for the South African economy. The question I then convey to the Minister is why can't we export packaged meat? Animals are then slaughtered here, which maintains quality in a controlled environment; More meat can be transported at less cost, you no longer have to feed, and vaccinate etc. And the risk of biosecurity is much less.	Chris		
	2025-08-22 11:55:34	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	No I do not	There is no place on earth, where proper care for the local animals will necessitate importing new animals.	Jacobus		unemployed individual

	2025-08-04 20:32:12	No I do not	No I do not	No I do not	No concern	No I do not	Most important of all is the export industry. Here we have to be flexible. Any new regulations will hinder the export industry i.e. South Africans. The SA economy needs to export anything overseas to survive the current US tariffs which are not likely to change under Trump's Administration. Just remember this : the proposed regulations will only hinder the export industry and imposing them will create more costs. Question: who will bear all extra costs? Certainly not the farmers who are already struggling in this industry!	leong	Western Cape	retired

	2025-08-05 20:26:45	No I do not	Yes I do	No I do not	No concern	No I do not	In my opinion your opening correspondence tries to sway opinion towards the belief that the animals suffer terrible cruelty! But none of you condemn the cruelty suffered by our livestock in our own country, South Africa. Have you taken the trouble to see the cruelty suffered by our stolen sheep? Have you taken the trouble to see the cruelty suffered by our hacked (alive) cattle? An investigation undertaken of stock theft in this area of over nearly 500 reported cases, revealed a police success rate of 0•8% (99•2% failure rate). The Agricultural sector needs these markets (revenue) and also the job creation opportunities.	John	Eastern Cape	self-employed

	2025-08-07 15:13:54	No I do not	No I do not	No I do not	No concern	No I do not	Dis nooit Boere wat beeste per skip uitvoer nie. Dis voerkrale!!!! Boere produseer en Bemark dit aan Voerkrale wat dit uitvoer na Mauritius o.a. (die land is mos F &M free). Hulle koop beeste spotgoedkoop by boere in SA (omdat ons F&M het.) en (skuif) dit dan na Mauritius. Na 2/3 weke in voerkrale in Mauritius weg is dit per skip Ooste toe. Dan verkondig Voerkrale aan almal wat leef en beef hulle kan kwansuis NIE beeste 'geskuif' kry nie. Die term ''skuif'' is deur Voerkrale geskep!!! Voerkrale baat dus by uitbreking van F&M in SA. Dis rede waarom die siekte (veral / altyd) by Voerkrale uitbreek - hulle baat daarby. Waarom kan daar nie WET gemaak word om Voerkrale te verplig om rekord te moet hou van waar af (boer/produsent,smokkel uit Botswana ens.) hulle beeste aankoop/afkomstig is. Dan kan die BRON van F&M mos maklik nagespeur word. Dis ook net Voerkrale (met hulp van Regering??) wat spuitstof @ F & M uit Botswana kan invoer -en hul beeste inspuit @ F&M. Dis NOOIT vir boere beskikbaar op die markte/by veeartse nie. Waarom nie???? So moenie net kyk na die verskeping van vee per skip nie, Kyk slag na die WURGGREEP wat Voerkrale op veeboerdery in SA het.	Andries Stephanus	Western Cape	self-employed

	2025-07-29 11:39:46	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	This practice is cruel, barbaric and unnecessary and needs to be stopped immediately. The suffering of these poor animals is heartbreaking. They are sentient beings and deserve to be treated as such. We are seriously lacking in morals if we don’t stop this abhorrent practice. Our country needs to do much more for animal welfare including hefty fines and jail time for abuse and donations to welfare organisations.	Sharon	Western Cape	self-employed
	2025-07-29 11:49:25	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I am vehemently opposed to mass animal transportation of any kind, especially the thousands crammed onto vessels that are barely sea-worthy and crewed by totally indifferent individuals! There is no doubt that all animals fear transportation of this nature and can anticipate what lies in store! Far too often, a ship will arrive at its destination where many animals have died en route and others have travelled in appalling conditions, among their own excrement and dead animals. It is barbaric, callous and should be abolished in total. There is no such thing as a "dumb animal"! This has been proven over and over. Good luck in your endeavours.	Bob	Western Cape	retired

	2025-08-04 17:41:09	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	This is cruel to the animals and opens doors of malicious crime opportunities by underground criminal organisations. Many foreign countries import animals from other countries only to place them in zoos. Japan being one of those countries and also China. The animals are kept in tiny enclosures and also are not well adapted to certain climates in that country. This is not suitable for the animals well being. Imagine being born in a country and you get shipped off to live in a completely new environment not suited for your needs. Animals are sentient beings. They're like us in so many ways. Even better. Criminals always find ways to exploit certain services and this could explain why there has been an uptick in human trafficking in South Africa as well as all the kidnappings taking place especially children. These are not widely made public. If animal Exportation is permitted it will possibly become a guise for human trafficking. Criminals could export endangered animals to wealthy individuals as pets, or they can be exploited in other explicit ways. This should be heavily prohibited and regulated through the correct channels because criminals like to infiltrate organisations that claim to protect animal rights only to then be the main suppliers to nafarious crime organisations. Protect the animals. We are their only voice.	Nicky

	2025-08-05 04:35:48	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	The live export trade represents a moral failure. It prioritises profit over the wellbeing of sentient beings, turning a blind eye to their suffering for the sake of economic gain. As other countries—such as New Zealand, Brazil, Germany, the UK, and Australia—have already demonstrated, it is both possible and necessary to phase out or completely ban this cruel practice. These nations are setting a clear moral and scientific precedent that South Africa has every reason to follow.	Debbie	Gauteng	employed individual

	2025-08-05 06:52:42	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries—such as Kuwait, Saudi Arabia, the UAE, and Mauritius—have animal welfare standards that fall well below those of South Africa. No matter how stringent the rules, the systemic cruelty inherent in the trade cannot be eliminated. Attempts to regulate the process serve only to legitimise what is fundamentally an unjust and unnecessary industry. Rather than trying to reform the irredeemable, South Africa must move toward a complete and permanent ban. I however support the regulations if this is the only reform beiong proposed.	Nichola	Eastern Cape	employed individual

	2025-08-05 08:04:23	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	The transportation of live stock at sea is an extremely inhumane practise given they are exposed to weather conditions,motion sickness and like any other human being exposed to the dangers and risks at sea not to mention the cruelty with which these animals are handled with by those who are supposedly " caring" for them while at sea. Like any other human these animals are live beings and have rights too and because they cannot verbalise their fears,and needs or the abuse they suffer at the hands of their handlers we have a moral duty and responsibility to speak up for these animals as we as humans are the advocates of the helpless or so I understand it to be. I cannot imagine what those poor animals must be going through while at sea and I wonder just how many of them die during transportation and those who manage to make to their destination alive ,the continuation of the abuse. If these were humans the public would speak up in one accord(or so I hope) so why not for these that are helpless? Are we not made the custodians of animals by the Creator? No I strongly object to this inhumane practice and I truly hope that more people whether animal lover or not speak up and voice their opinions because if this had to be our children we would want the public to rally with us to speak up against their inhumane treatment so as far as I am concerned their should be no distinction. Thankyou	Jeanette	Western Cape	retired

	2025-08-05 08:47:46	No I do not	Yes I do	No I do not	Animal Welfare	Yes I do	I work for the company, whose subsidiary sourced the animals last year so I might be a bit biased. But I am also one of the few that knows the truth how these animals are actually treated on the vessel and not the accusations in the media from the animal welfare organizations. These animals experience the same stress than they would in a normal feedlot with a few exception. A feedlot does not create motion sickness but I have not had any reports of animals experiencing motion sickness. There is a veterinarian on board which means these animals have 24/7 access to proper medical care. The vessels are temperature regulated which a feedlot are not. Our company's vested interest stop on the successful delivery of these animals on the ship in the South African harbour but we do send staff to travel all the way to the destination to ensure that the animals' welfare are taken care of. I would like if an independent organization can report on actual findings.	Pieter	Gauteng	employed individual

	2025-08-05 09:10:02	Yes I do	No I do not	No I do not	Animal Welfare	Yes I do	Research and Compliance: Understand the legal requirements and regulations governing the export of live animals. Animal Health and Welfare: Ensure that the animals you intend to export are in good health and meet all necessary health and vaccination requirements. Packaging and Transport: Prepare suitable transportation containers and packaging that meet the specific needs of the animals. Consider factors such as temperature control, ventilation, and safety during transit. Obtain the required permits, licenses, and documentation for the export of live animals. Arrange for any necessary inspections and adhere to quarantine requirements imposed by both our country and the destination country. Logistics and Transportation: Coordinate with a reputable freight forwarder or shipping agent experienced in live animal transportation. Communication with Authorities: Maintain open communication with relevant authorities, such as veterinary departments, customs officials, and animal welfare agencies. Animal Welfare during Transit: Ensure that the animals are provided with appropriate care, food, water, and any necessary medications during the transportation process.. Post-Export Follow-Up: Maintain contact with the recipient in the destination country to ensure the animals have arrived safely and are properly cared for. It's important to note that the export of live animals may involve additional considerations and requirements depending on the species, their conservation status, and the specific regulations of the countries involved. Therefore, it is crucial to consult with professionals, such as veterinary experts, customs brokers, and legal advisors, who have experience in the export of live animals to ensure compliance with all relevant regulations and to protect the welfare of the animals. A job for and by the Minister no?	Riedewaan	Western Cape	employed individual
	2025-08-05 09:10:05	Yes I do	No I do not	No I do not	Animal Welfare	Yes I do	Trade and commerce include animal imports and exports. Just curbing economic opportunities is probably unwise, but regulations and accountability regarding animal welfare is critical. As a Christian I refer to the Book of Proverbs that teaches that a righteous man looks after his animal. Humans are to be responsible stewards of animals and their welfare, whether domestic, in the Zoo, in the Game Reserve, in the wild (habitat conservation) and in trade.	Johannes	Gauteng	retired

	2025-08-05 10:02:23	No I do not	Yes I do	No I do not	Animal Welfare	Yes I do	The previous comments do not fully reflect my views. There is always the possibility that animals will suffer at sea. Nevertheless, live animals for breeding have to be exported somehow. The answer would seem to be that conditions on board should be strictly monitored. Animals have been transported on ships right through history . As for human sea goers, the conditions can be pretty rough at sea but could be made bearable with the right vessels fitted out properly.	Mary	Western Cape	retired

	2025-08-05 11:50:00	No I do not	No I do not	Yes I do	Animal Welfare	Yes I do	The world has lost it's moral compass. We treat all living beings with such disdain and don't give a dam. Animals crammed into small spaces, in the dark for days or weeks on end, the stink, the fear and the death, all for them to be unloaded into probably just as bad conditions, then to be slaughtered in terrible ways. No regulations will stop the cruelty, we just sign and pretend to obey them and when found out, no one is held accountable. Or the punishment is not severe enough. Yes, I do eat meat, but rarely and try to source through ethical businesses. I do NOT support the trading of live animals.	Sue	Western Cape	retired

	2025-08-05 18:23:49	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	I am strongly opposed to the export of live animals from South Africa, particularly the shipment of animals over the oceans by boat. I believe this practice is cruel, unnecessary, and deeply distressing for the animals involved. Transporting live animals across the sea subjects them to long, harsh journeys under stressful and often inhumane conditions. I urge the government to take a stand and end the export of live animals by sea. Our animals deserve better.	sarah	Western Cape	employed individual

	2025-08-05 22:54:02	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I think a better approach would be to end the life of the animal humanely before sending it via sea transport. Prolonging the animals suffering is not fair towards them. Not all sea travel should be banned especially if we want the animal to be used for breeding purposes etc. If the animal is for consumption only then we should not let them suffer unneccesarily.	Johan	Gauteng	employed individual

	2025-08-06 06:51:49	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	Notwithstanding the careless attitude to animal welfare by the majority of the ruling government, animals are destined to even less care, even downright delight in the suffering of animals by nations that take these animals.	Peter	KwaZulu-Natal	retired
	2025-08-06 06:53:16	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I honestly do not see why we have to export live animals as each country surely have their own means of breeding these types of animals. Half the animals do not even reach their destination alive, so I do not see the purpose of this. They do not get fed, they are cramped into small spaces, they have to stand in their own feces & urine for 3 months, they can hardly breathe. This trade is unacceptable & should be stopped. Our country is poor enough especially with meat prices going through the roof & this is partly the reason for it.	Marlie	Eastern Cape	employed individual

	2025-08-06 07:26:18	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Until I saw this petition I did not know that this was a practiced. I completely disagree with the practice of transporting live animals. An animal must be treated with the care and should not be mistreated for the sake of food industry or religious reasons. I am a meat eater however farm to table should be the least stressful process for an animal possible.	Wendy	Gauteng	employed individual
	2025-08-06 07:27:31	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	It is a small step but a crucial one. The way we treat those who we don't need to treat well informs a lot about the quality of our character and the treatment of animals shows that we are sorely lacking. They are not commodities, they are living breathing feeling things that require us to be better. Stopping the unjust and cruel export of animals on giant container ships is a small step towards us being better and hopefully one day, be good.	Keelan	Western Cape	employed individual

	2025-08-06 08:56:27	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	So long as the regulations completely prohibit the export of live animals by sea, I support it. When a ship docked in Cape Town in 2024, the smell was so bad we could smell it all the way into the city. This means the conditions that the poor animals were living in was absolute hell. These are sentient beings. Bad enough that we kill them for food, but we could at least make it quick and painless. Travel by sea is a long, drawn out, extremely distressing and disgustingly unhygienic way of moving animals. It MUST stop!	Lesley	Western Cape	business owner

	2025-08-06 09:18:04	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	It has been mentioned before that it would be better for animals to be slaughtered here in South Africa and then exported. By having the animals humanely slaughtered here in South Africa it would create jobs for South Africans. South Africa imports meat from other countries like Argentina that has already been slaughtered in Argentina and exported to South Africa. I do understand that countries like the UAE want live animals that they can resell. But the suffering of these animals on these ships out ways the economic justifications. We should be creating jobs here in South Africa for South Africans and exporting the meat.	Deborah	Gauteng

	2025-08-06 10:35:23	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I call for, A ban on the export of live animals by sea, particularly for slaughter. Investment in humane alternatives, such as chilled or frozen meat exports. Strengthening of international animal welfare standards and enforcement mechanisms. Sea transport exposes animals to prolonged periods of stress, overcrowding, injury, and disease. Many vessels lack adequate ventilation, space, and sanitation, leading to suffering and, in some cases, death. Once animals leave the jurisdiction of the exporting country, there is no guarantee of welfare standards being upheld. Regulatory gaps and limited monitoring make it impossible to ensure humane treatment throughout the voyage.	Chris	KwaZulu-Natal	self-employed

	2025-08-06 13:48:25	No I do not	No I do not	Yes I do	Animal Welfare	Yes I do	If there is no accountability and oversight as soon as the animals leave our shores, no regulatory limitations and moral and ethical implications once at sea or in another country, it is our duty to see that proper measures are put in place. Also in South Africa wherever animals are free to roam, or are transported.	Pia		
	2025-08-06 13:52:10	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	Live animal export by sea is fundamentally inhumane. The very nature of the practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. This cruel practice must be stopped and a more humane way must be found to transport these animals.	Nicolette	Western Cape	retired

	2025-08-07 10:30:37	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Revise the regulations. Recognising that Live Animal Transport by sea is a huge problem. I suggest that you have a look at live animal transport by road in South Africa. I live in a town where loads and loads of live animals go through the main road in our town. Animals are packed so tightly that they cannot even stand properly. Animals lying on top of each other. I can go on and on about what we experience . Trailors carrying one animal nog tight up at all. Poor animal thrown from one side to the other as the vehicle move.	Nicky	Free State	employed individual

	2025-08-07 12:19:45	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I have seen the road transporting of livestock which is absolutely cruel. Overcrowding in trucks where animals often trample each other and are driven recklessly causing them to fall down and injure themselves on the long trip to the "end point". I can only imagine how shocking and cruel it must be on a ship. Ignorant people do not realise that animals suffer FEAR. Being loaded onto a foreign vessel, experiencing imbalance from ships movement for weeks on end and possibly being left in a cold, dank cargo hold is terrifying for them. I am also sure the ones "taking care" of them are not in any way "trained" to deal with a petrified animal, which leaves these livestock having NO real care. This persecution must STOP!!	Jenny	Free State	self-employed

	2025-08-07 13:17:41	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I strongly oppose the continuation and legitimisation of live animal export by sea. This practice causes immense suffering to animals, many of whom endure long journeys in overcrowded, stressful, and often unsanitary conditions. Despite any regulations proposed, the reality remains that no standard can fully protect the welfare of animals over extended sea voyages. The risk of injury, disease, heat stress, and death is inherent in the process. South Africa should be taking a leadership role in ethical and humane animal treatment. With growing international awareness and public concern for animal welfare, we should be transitioning away from live exports and instead investing in chilled or frozen meat exports — a more humane and economically viable alternative. Over 50 animal welfare organisations have already voiced serious concerns. I urge you to listen to these experts and to the many South Africans who value compassion and responsible governance. Please reconsider this harmful practice and move toward a complete ban on live animal exports by sea.	Sara	Gauteng	employed individual
	2025-08-07 13:20:09	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	The suffering endured by the animals is cruel and inhumane. The South African government needs to put an end to this.	Nicky	Gauteng	self-employed
	2025-08-07 13:36:52	No I do not	Yes I do	Yes I do	Animal Welfare	Yes I do	Charity begins at home, and because of this greed practice South Africans do not enjoy the very product produced in their own country.	Mlungisi	Eastern Cape	self-employed

	2025-08-07 14:03:05	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Is he human at all, does he have love for anyone included livestock. Does he have a heart and does he feel the stress of the animal, does he see the fear of the animal's eyes. Shame on him for implementing all this just because of money. Anyone one who put Gods creation through this emotional stress will definitely answer to Him one day.	Frieda	Gauteng	retired
	2025-08-07 14:03:38	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	We must urgently adopt faster and more humane methods of transporting animals. Shipping them by sea not only prolongs their journey but also exposes them to unnecessary suffering—and in many cases, death. Animals are sentient beings whose health and dignity matter just as much as ours. As stewards of God's creation, we have a moral duty to ensure their safe and compassionate treatment. It's time we act with conscience and care.	Heather	Gauteng	retired

	2025-08-07 17:57:02	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	The difficulty in ensuring reasonable conditions for animals being shipped from one place to another makes the practice highly undesirable. Delays in ports and conditions at sea can not be controlled and subjects these poor creatures to the most wretched time in transit. If the purpose is for consumption they should be slaughtered before shipping and if for breeding flown to destinations or artificially inseminated.	John	Western Cape	business owner

	2025-08-07 18:10:03	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Public Comment on Proposed Regulations: Exportation of Live Animals by Sea I strongly oppose the export of live animals by sea and am deeply concerned that the proposed regulations are an attempt to legitimise a practice that is inherently cruel, unethical, and incompatible with South Africa's obligations to animal welfare. No matter how well regulations are drafted, they cannot mitigate the fundamental suffering experienced by animals during long sea journeys. These animals are subjected to extreme stress, overcrowding, heat, injuries, and prolonged deprivation of their natural needs. The 2023 tragedy involving the Al Kuwait ship in Australia, and countless other documented cases, are stark reminders that this practice cannot be made humane. The fact that over 50 animal welfare organisations have united to call for a complete ban should weigh heavily in this decision. Public sentiment, scientific research, and ethical reasoning all point in one direction: end live animal export by sea. South Africa should be moving towards a progressive, compassionate agricultural sector that invests in local processing and job creation, not propping up outdated practices that compromise animal welfare and damage our global reputation. I urge the Minister to ban live export by sea altogether, not regulate it.	Charmaine	Western Cape	retired

	2025-08-08 08:36:10	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	LIVESTOCK by SEA is BARBARIC. The only reason it is still used is because of the tax on live stock vs slaughtered. Livestock is MUCH cheaper. These animals can be spared hese absolutely barbaric conditions by being humanely slaughtered here in South Africa and shipped to various countries . Raise the tax on live stock shipments to be higher than slaughtered and BAN livestock carriage by sea. Many meat producing countries have done this and they still have the trade but slaughtered carcasses are being shipped. DO THE RIGHT THING	Donne	Western Cape	self-employed

	2025-08-08 09:25:08	Yes I do	Yes I do	No I do not	Animal Welfare	Yes I do	Evidence from multiple investigations (including those by the NSPCA in South Africa, Animals Australia, and the UK's RSPCA) shows that animals on live export vessels often face: * Overcrowding and inability to rest comfortably * Heat stress, dehydration, and exhaustion * Prolonged exposure to faeces and ammonia fumes * Injuries and illness with limited veterinary attention * High mortality rates on some voyages Because voyages can last days or weeks in often extreme conditions, many welfare scientists argue that suffering is *inherent* in this system, even with improved facilities. Regulations for the Exportation of Live Animals by Sea*) set minimum space allowances, feeding/watering schedules, and veterinary requirements, enforcement at sea is challenging. * Inspections are limited before departure; at-sea monitoring is minimal. * Welfare breaches often occur mid-voyage when oversight is impossible. * The commercial incentives to maximise load sizes conflict with welfare priorities. Many animal welfare groups believe regulations can *reduce* but not *eliminate* inherent suffering during sea transport. South Africa could replace live exports with chilled/frozen meat exports, which would create more local processing jobs and eliminate transport suffering. * A full ban would align South Africa with countries like New Zealand, which recently prohibited live animal sea exports for welfare reasons. 	2025-08-08 11:33:41	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	Animals are creatures that should not be treated in a way that causes such suffering. We, in Cape Town, witnessed how enormously stressed the cattle and other animals were, when we experienced a strong offensive smell for miles. What cruelty; what insane cruelty! This is what woke me up to this horrifying practice that we subject on animals. Surely we can find a more humane way of preparing food in the correct way required for relious practices. This i say with respect. The world was aghast when humans were treated so cruelty too, on route to concentration camps. We, too, should not do this to animals. There is too much suffering in our country that people are subjected to. Terrible violence. No security which is a basic right. All laws that are for the welfare of humans should apply to the animals who are in our care and totally vulnerable. It's a disgrace and it need not continue if we show respect and acted to make this world a better place for humans and all creatures God has made and put in our care. 	2025-08-12 15:55:45	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	I am writing to express my deep concern and opposition to the transportation of livestock via shipping. The treatment and conditions these animals endure during such journeys are, in my opinion, inhumane and unacceptable. The risks of disease, injury, and death associated with livestock shipping are well-documented. Moreover, the prolonged periods of confinement, lack of adequate care, and exposure to extreme weather conditions raise serious welfare concerns. As a society, we have a responsibility to prioritize animal welfare and explore more humane transportation options. I urge you to consider the ethical implications and potential alternatives to livestock shipping. Sincerely, Sasha	Sasha	Western Cape	self-employed

	2025-08-13 05:58:55	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	Placing animals in locked holds on an unstable medium..water...where they stand or lie or fallover into their own urine and faeces, without the grip to stand up, for weeks, is horrific. How many humans could withstand that? I am ashamed of our ' educated' country and such open cruelty. NOT to mention the adrenalin-filled, bruised tainted meat, arriving on the other side. And their destination? What type of slaughter methods await these terrified survivors? Would you eat that meat? How can it be a financially viable method with the cruekty and losses? Come on South Africa, do the right thing. There is a huge meat eating community in South Africa, and it is healthier, without the weeks of cruelty,to export packaged meat, no sustained stress on helpless animals, loss of dreadful deaths at sea! TO take a pet dog overseas, we need specific crates and monitoring by animal welfare professionals. What makes cows, sheep and goats or livestock any different? Say NO.	Wendy Anne	Eastern Cape	self-employed

	2025-08-13 07:42:21	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	Long durations – Voyages can last days or even weeks, during which animals are often confined in cramped, stressful conditions. Heat stress & dehydration – Inadequate ventilation, fluctuating temperatures, and poor water access can lead to suffering or death. Injury & disease – Movement of the ship, overcrowding, and lack of veterinary care increase the risk of injury, illness, and the spread of disease. Lack of humane oversight – Once at sea, there's often minimal independent monitoring, so welfare standards can drop. Mortality rates – Even with regulations, deaths in transit remain disturbingly common, especially for sheep and cattle in hot seasons	Caroline	Western Cape	retired

	2025-08-14 07:38:55	Yes I do	Yes I do	Yes I do	Animal Welfare	Yes I do	This has clearly been proved to be an unnecessary practise! Australia has done great research on this practise & results are horrific & unbearable to see. Animals can be slaughtered locally & frozen meat exported. Establishing abattoirs locally will provide much needed jobs in towns our farming communities!. Farmed animals will not have to endure days on the road travelling to ports on the coast. People will always eat animals. The least we can do is honour our inherent kindness, & take good care of them until they have to die.	Ana	Western Cape	retired

	2025-08-14 08:42:01	No I do not	Yes I do	No I do not	Animal Welfare	Yes I do	With good regulations, time of export to prevent hot seadon, proper delection of travel fit animals, enough spacing and good communications with importers, this gives a very good alternative for livestock farmers. In our country abattoirs and even export abattoirs are closing down due to various reasons. It is a fact that animals must be slaughtered as close as possible to its farm of origin but we know this is not happening. It is a huge logistical challenge to export fresh meat and our country is just not ready for exporting boxed meat. Export is a mayor income for all farmers and if we are not capable to export fresh or frozen meat we must regulate the alternative and that is live exports.	Jaco	Western Cape	retired

	2025-08-15 11:01:07	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	To the Honourable Minister Steenhuisen and Members of the Public: I write as a deeply concerned South African who believes that the live-export trade is inherently cruel. Animals shipped by sea endure extreme stress, overcrowding, rough weather, heat, disease outbreaks, and even death before reaching their destination. No matter how stringent the rules, such voyages place sentient beings in unnatural, inhumane conditions—conditions we would never accept for our companions or livestock at home. My chief concern is animal welfare. These creatures cannot voice their suffering, yet they endure hunger, thirst, injury, and psychological distress for weeks at sea. History and countless investigations—from Australia to Europe—show that regulatory safeguards routinely fail under economic pressure, profit motives, and the sheer unpredictability of the open ocean. The proposed rules may tighten pen sizes or ventilation standards, but they cannot eliminate the fundamental cruelty of loading live animals onto ships and sending them on a torturous journey. Because no regulation can guarantee humane outcomes, I urge the South African government to take the only ethical path available: prohibit the export of live animals by sea. Instead of perpetuating a trade that commodifies and endangers living creatures, let us lead by example—shifting to chilled and frozen meat exports, fostering local abattoir capacity, and supporting farmers through fair transition programs. In banning live exports, South Africa would join the ranks of nations prioritising compassion, public health, and consumer confidence. A complete prohibition protects animal welfare, safeguards our global reputation, and aligns with our values as stewards of the natural world. I respectfully call on the Minister and Parliament to withdraw these regulations and enact a full ban on live animal shipments by sea. Thank you for considering this submission. 	2025-08-15 11:21:53	Yes I do	Yes I do	No I do not	Animal Welfare	Yes I do	All my positive answers are based on the regulations being "followed to a t". South Africans today are a pretty lawless. There are laws and regulations, but they are not followed. Policing has always been a problem and how can anyone guarantee this will be different. They can't. Many officials are not trustworthy and easily persuaded to be otherwise. So my bottom line is, "if these principles can be adhered to, then this means of transportation has my approval. Any different, then my support is withdrawn.	Basil	Eastern Cape	retired

	2025-08-18 10:10:30	No I do not	No I do not	No I do not	Animal Welfare	Yes I do	Good day I do not believe that this practice is any more inhumane that feedlots. Since feedlots is accepted, then this must also be accepted. Farmers get praised for their excellent farming practices when putting sheep in feedlots from birth to end of live. Or worse, farm with them in multistory building! This while the animals on sea is in a 'feedlot' situation for only a short time. I actually saw a video made by independent observers of a ships voyage, the animals were much better looked after that in any feedlot. Yes, animals get sick and yes they die, but that is part of any feedlot on either land or sea or even free range. Although I do not agree with the necessity of the practice, I cannot earnestly object to it just because I believe it is a total unnecessary practice. It is my choice if I want to sell my livestock alive or slaughtered. I do believe not all sea voyages is of the same high standard, but that said, not all farmers is equally effective with their feedlots. To me this is an absurd debate driven by the media with people who do not understand farming at all.	Marisa	Western Cape	self-employed

	2025-08-19 10:33:26	No I do not	Yes I do	No I do not	Animal Welfare	Yes I do	Reasons I support the export: 1. Animals on the ship have full time carers and vets. 2. The death rate percent is lower than on farms. 3. The meat price in South Africa is atrocious - and the farmers are forced to export - it's a matter of time before livestock farming in South Africa will be non existent, if they stop this. I know as i am one of them. I and many of my friends, have stopped farming as it is unsustainable. We cannot continue funding food. 4. If you know animals - they need food, water and a friend then their anxiety drops. This is what the ship provides. 5. Yes there must be controls to ensure animals well being. 6. Farmers who love, care and adore their animals are fine with putting their animals on the ship - that should say something. 7. The customer buying the animals do not want to have any deaths and go to extreme length to ensure they arrive in good order. If "they" want to stop this practice they should go after the - little grey man that sits in his cubicle and dictates the meat price - correct that and there will be no need to export. This is squarely where the problem lays. One problem i do have is - we do not know what happens to the animals when they arrive in an Arab country. What are their slaughter practices? This is the scary part. PS... if the do gooders want to see change maybe they should pay the farmer the difference between local price and exported price.... We may see a different mindset then.	Cindy	Eastern Cape	business owner
	2025-08-20 00:23:35	Yes I do	No I do not	Yes I do	Animal Welfare	Yes I do	For Me,The wellbeing of The Animals is the most Important point!! And unfortunately Government/Agriculture is turning a blind eye on the topic. The conditions under which the transportation is taking place,is absolutely not acceptable in modern times. I see just "human greed" in this whole "operation"! Allowing this "practice" isn't a Good reflection on Us as a Nation. Please put a Stop to this ?	Barend	Western Cape

	2025-08-02 18:57:43	No I do not	Yes I do	No I do not	No concern	Yes I do	It has been shown on a number of occasions that animals are treated humanely on the ships and that mortality rates are easily within acceptable levels when compared to land based feedlots. Live exportation is a very important component of the economic viability of livestock farms which are under massive financial pressure.	Graeme	Eastern Cape	self-employed
	2025-08-03 12:48:17	No I do not	No I do not	No I do not	No concern	Yes I do	The NSPCA has wasted millions of rands on court cases in order to inspect a shipping company which they accused of animal cruelty. They lost the case and lost millions in due process because even though they sent private investigation teams on these journeys there was no form or animal cruelty found. By banning such exports puts our already suffering south african economy at risk. Animals are not at harm from these exports Why should countries pay for animals Treat them with cruelty Keep them in unhygienic and unsafe environments in order for the country to be able to eat them Thats just stupid business because they would lose more money then	Abdullah

	2025-08-05 05:26:05	No I do not	Yes I do	No I do not	No concern	Yes I do	You guys fail to grasp one thing. It is in the best interest of the transporter as well as the importing country that animals are treated humanely and given the best care possible. If, as you paint the picture, the environment was so bad that the animals suffered and died as a result of it, it would make no economic sense for them to undertake this import of animals. The picture you portray of it is misleading and false, so that people forget what the argument is really about. Your argument quickly turns from transporting live animals into whether or not to slaughter any animals at all. Just look at the comments for proof hereof. Another point to make is this. Whether the animals are staying onshore or not, some will inevitably die as a result of disease or sickness. Keeping the animals in SA would not change this. You cannot hold up an argument that some animals die during transit, as animal mortality is just a part of life, even in the best circumstances.	roland	KwaZulu-Natal	self-employed

	2025-08-06 15:12:25	No I do not	Yes I do	No I do not	No concern	Yes I do	If the animals arrived at their destination in a poor condition the buyers wouldn't want them, so by definition the animals would need to be kept in good condition while on board. Just like a farmer looking after his own animals on his farm. Weak and thin animals don't fall pregnant, so how can a successful farmer farm without looking after his animals? This is an emotional topic which needs to be decided upon by informed people, not the general public, most of whom no nothing about farming and animal husbandry and what happens along the chain of exporting live animals. I'm afraid even the NSPCA can be quite emotional rather than pragmatic, having a predetermined viewpoint. I'm sure all those who've voted "no" to live export haven't considered the positive financial impact live export has on the agricultural economy of the main livestock producing provinces.	Robert	Eastern Cape	self-employed
	2025-08-06 16:34:34	No I do not	No I do not	No I do not	No concern	Yes I do	the more freedom we have to farm and sell livestock the more farmers will be able to farm. Do not in time of crisis make it harder to farm. Common think about saving the country not ending opportunity to survive!	Benjan

	2025-08-12 17:03:19	No I do not	Yes I do	No I do not	No concern	Yes I do	My father was a Veterinarian and actually went on a few trips onboard these ships to oversee the process and ensure the welfare of the animals onboard. He was particularly passionate about animal genetics and helping farmers across South Africa and the rest of Africa improve their herds. Many animal exports are specifically done with the intent to improve the livestock quality though cross breeding and strengthening genetic pools in other countries throughout Africa. That's why he had to travel with the animals because they were very valuable. So to put a complete ban on exports would not only affect our local farmers but countless farmers throughout Africa. In addition to this, when livestock is purchased and shipped there's a cost and obviously there are always risks. But if the losses were as staggering as the clearly biased info in the call to action piece, then who would be paying to ship animals in this way? Who would pay a small fortune to ship valuable animals all the way from SA to have the animals arrive dead, or emaciated? And if animals can not be shipped via sea, then what's the alternative? Cramming them into a hot truck and driving all the way? That doesn't sound like a good alternative either. In effect you might as well just close South Africa off to animal imports and exports if you want to ban the export by sea... Lastly, as mentioned I do not think the info provided is unbiased and giving a clear view for people on this platform to give an informed comment. There are no pictures showing a ship full of animals. There are no comments from the veterinarians that travel with the animals. Only isolated sad pictures are shown to sweep up people's feelings without considering the consequences of what's being proposed.	Sharlien

	2025-08-14 09:19:25	No I do not	Yes I do	No I do not	No concern	Yes I do	Live animal trade is not solely based on the animals being earmarked for slaughter but often for furthering agriculture in other countries by increasing their own biodiversity. The opposition to this mode of transport is impractical and has not provided a viable and suitable alternative to transporting the animals.	Rudi		
	2025-08-14 15:30:29	Yes I do	No I do not	No I do not	No concern	Yes I do	You are not going to stop animal cruelty with any regulation like this. Just take money out of the hands of SA farmers and allow more unscrupulous people to make that money. This problem is not solvable until the rest of the world standards increase and banning certain farmers from making a living will do no more than just that. Hell I might buy a farm somewhere in Africa with more lax laws and start doing the same. You are not going to make those who don't care start caring, you will however take money from SA farmers and move the problem out of your view. (Which might be the only end goal some of these people want, out of sight out of mind)	Bruce

	2025-08-05 11:59:12	No I do not	No I do not	No I do not	Moral and Ethical Implications	Yes I do	Humans have been transporting animals via water ways and sea for centuries and would it be ridiculous to ban it. It forms a major part in trad and economical importance. Banning it will have a dire financial implications for many whom rely on the export of their product (animals). However, this does not mean that the transportation methods should not ad hear to strict regulations on the humane transportation of live animals. We have a moral and ethical obligation to make sure that the transportation of live animals is done as humane as financially viable and with the least amount of unnecessary stress on the animals. This entails clean, acceptable space and feeding for animals during transport. It is sad that news of especially Chinese vessels transporting animals in extreme inhumane circumstances and that needs to be regulated and if these vessels do not get their act together exportation of live animals must not happen to them.	Rudolf

	2025-08-06 10:22:50	No I do not	Yes I do	No I do not	Moral and Ethical Implications	Yes I do	The export of live animals is well regulated and monitored. The real question here is if you support eating meat or not. The conditions animals experience in road transport is not good. They then spend time alive in an abattoir environment which is massively stressful for them. this is a selective crusade. You want to help animals? Stop breeding and raising them for food. Anything else is hypocrisy. This campaign is a boutique effort at making yourself feel like you doing something good. If you want to do something good become a raw vegan who doesn't eat tofu.	Peter	Eastern Cape	employed individual

	2025-08-05 10:18:37	Yes I do	Yes I do	No I do not	Accountability and Oversight	Yes I do	Cutting corners by cutting costs is always the most despicable way of doing business. The exporters must ensure that their export is kept safe and healthy and clean by choosing a reliable shipping company no matter the cost. . As with all living creatures, the wellbeing of the passengers on a ship has to be the shipping companies main concern. even more so when the passengers cannot care for themselves.	Maria		retired
	2025-08-05 10:45:15	No I do not	Yes I do	No I do not	Accountability and Oversight	Yes I do	Like any industry, it is good to be accountable. Should live exports be done in well regulated and controlled environment, it should be no different for them than to be in a feedlot on water. The same regulations as for a feedlot should apply to ships. This will ensure humane treatment for the animals at sea, and will protect the industry. No one wants to see animals suffer, and no one wants to see millions of people in the industry loose their jobs because a market was closed down. opening up markets with adequate regualtion should make it both competitive and encourages greater business models to increase job opportunities. 	2025-08-05 19:14:17	No I do not	Yes I do	No I do not	Accountability and Oversight	Yes I do	My concern with this petition is that most people who respond will be responding out of ignorance or worse, their response will be based on the misleading stance of the NSPCA. Modern shapes that transport live animals are geared to provide for the animals needs. They are floating feedlots. I personally know administrators that have inspected these ships as the animals have been loaded.; they were impressed. Animals that are shipped are purchased at the going price. They are not purchasing discounted animals. Therefor they have no interest in allowing the animals to loose condition or worse die; that would be economic suicide. This is an important extra market for South African livestock farmers; with the local economy floundering along these markets are needed. Jobs depend on it. That said, I certainly would not support animals being loaded on a vessel of any kind if it would lead to the animals suffering. Regulations and inspections are required. While I suspect the auther of this petition would have liked a different response I trust my response will treated on an equal basis. That said	Graham	Eastern Cape	self-employed

	2025-08-13 07:30:15	No I do not	Yes I do	No I do not	Accountability and Oversight	Yes I do	Animal export, as cruel as it may be, is for many farmers their only lifeline and means of survival. Banning export to other countries, might soothe those who feel deeply for the animals, but would cause devastating poverty and loss of human capital due to the loss of income. Animal export is a large contributor to the countries GDP, and our farmers are not in a position where they can withstand such a economic hit, this ban would hit the primary sector hard, and all of South Africa relies on this sector, our people suffer enough as it is. What this bill proposes and hopes to achieve is a gold standard of animal care, during the export process, to ensure that our clients receive the highest quality lifestock, setting South Africa apart from any other country. This I can support. We cannot control what another country does or does not due with our animals, banning trade and harming our farmers and their families and all the families that work for them and the entire supply chain which they supply, and all of South Africa, just to feel better, is evil. If there is a problem in the animal export industry, fix it, do not ban free trade for hardworking, already suffering, citizens.	Leopold	Western Cape	self-employed
	2025-08-13 08:07:25	Yes I do	Yes I do	Yes I do	Accountability and Oversight	Yes I do	It is a GOD given responsibility to look after and care for animals. When a godless people or government think they can take responsibility it soon becomes greed at the expense of the animal. A disregard for life soon becomes very evident. If they sacrifice animals for nonsense,are they going to worry about them?	Karl		retired

	2025-08-14 16:36:17	No I do not	Yes I do	No I do not	Accountability and Oversight	Yes I do	I support the transport of live animals, because it ensures you get fresh products! The concern is how its done. If its done correctly, and the animals kept in suitable conditions for the trip, then its ok are the cages being cleaned daily, is there enough room to walk around for excersise, these are big ships, it can easily be achieved to give the animals enough space to move around in. then its ok! its very good for business for our farmers, so we need the export market, its non negotiable, but there must be proper management of how it gets done, so its not cruelty to animals. We as people, are smart enough to come up with solutions to not have to be cruel to animals and still farm and harvest them for profit and food. we are definitely smart enough, we just need to make sure we care enough and in action, not lip service!	Adrian	Eastern Cape	unemployed individual

	2025-08-08 14:07:31	Yes I do	Yes I do	Yes I do	Other	Yes I do	High risk to both the sea and livestock. Firstly Cattles and sheep don't survive inside water that is their nature, secondly the sea animals AQUATIC only survive in water. Sea traveling is much longer than air, live animals (sheep, Cattles) can get sick again those ships that carry livestock will contribute in sea pollution. Spiritually it is against Christianity morality that livestock travel or be inside the sea. It will be against morality again that Sharks, Wales, penguins, seals that they be exported by African trucks. If Mauritius and Middle East wants livestock they must start to farm them. The sea must be clean always today there is dirty river waters because of livestock that polluted river waters. 	2025-08-22 23:13:36	Yes I do	Yes I do	No I do not	Other	Yes I do	The export of live animals is a centuary old practice. I agree that the hardship on the animals must be limited to the utmost. The very fact that the animals are alive leaves a posibility that they could stay alive for some time. The alternative once sold is the abbatoir and certain death. I cannot support the notion that sure "humane" death is better than a probable survival. Logic indicates that if the mortality rate was too high it would not be financially feasible to indulge in this practice since Noah's adventure. The way to go is to do it as best as possible.	Hermann	KwaZulu-Natal

	2025-08-04 17:16:14	No I do not	Yes I do	No I do not	Economic Justifications	Yes I do	We are part of the Agriculture community in South Africa and exporting animals to other countries should by all means be done in a way that support best practises. Therefore fair regulations for securing the animals well fare within reason is important, but with most of the animal welfare organizations they do tend to be unreasonable at times. We are economically strained as farmers as it is, stopping this avenue for revenue for this sector witch is one of the biggest job creators in our economy will just add to an already strained situation. There is nothing wrong about using sea transport. if we dig deep the same Campaigners are funded by whom. it is a matter of economic interest. the country cannot afford to lose revenue just because of someone who does not understand value chain. before air transportation we used the sea. as long as they are transported in a carrier suitable for animal transportation.	Nathaniel	Gauteng	unemployed individual
	2025-08-05 11:10:41	No I do not	No I do not	No I do not	Economic Justifications	Yes I do	The animals exported are not done so for the sole purpose of slaughter. Some animals are exported for commercial farming purposes and establishment and supplementing the commercial/food sustainability of countries abroad. The livestock market is in need of exports of live animals due to RSA's abbattoirs being unable to purchase and process all available livestock at prices that make commercial livestock farming sustainable for the producers. These will create additional pressure on the agricultural sector indirectly influencing RSA's food security and potential income into the economy. This will also create situation where to only users/clients of livestock other that breeding will be for the supply to abbattoirs which will create a significant threat to the free market established. This will push RSA back into a controlled/planned market, putting the livestock farmers under immense pressure, especially up and comming farmers that are attempting to access the market.	Marthinus C.J.	Limpopo	employed individual

	2025-08-05 12:32:41	No I do not	Yes I do	No I do not	Economic Justifications	Yes I do	This subject is something to be addressed carefully. If there is a humane way of the transport of live animals by ship, I support this 100%. We need to remind ourselves that our farmers also have a say and this is a way for them to sustain themselves and for the good of the waning SA economy. The lobby groups have absolutely nothing to loose financially, and I am sure that these concerns have not been addressed with the farmers either. Also using examples of over-crowded ships that is from elsewhere paints a false picture and leads people in to making emotional choices.	Andrew	Mpumalanga	self-employed

	2025-08-09 15:03:04	No I do not	Yes I do	No I do not	Economic Justifications	Yes I do	Footage used in court by animal welfare groups were posed in many cases and staff on the ships were bribed to starve animals and take videos of it. This was done by so-called animal welfare groups. This is appalling behaviour! Footage used to win over public opinion was taken in very rare cases of ships running into trouble or, like mentioned above, when staff were offered handsome amounts of money to starve and injure animals. If the live export market closes, farmers will not be able to move lambs to these feedlots and will have to feed them at great cost or watch them starve. Without this market the bottom of lamb price will fall out and farmers will not be able to feed their livestock. This will cause a lot more suffering than what they may possibly, though unlikely, suffer on-board a ship. Animals experience discomfort when being transported by road as well. Do you want to ban all forms of transport? Then you may as well shut down all of the Karoo and every other semi-arid region in SA. Agriculture is what keeps the rural economy going. Without a strong rural economy more people will flood to cities. Save your view and help farmers, do not in any way make life harder for them.	Mercia	Western Cape

	2025-08-13 09:47:27	No I do not	Yes I do	No I do not	Economic Justifications	Yes I do	I do not have the background on this issue. However, based on what I read in this article, my opinion is the following: Farmers are already suffering under economic strain, droughts and other regulations. If they have a market for live animals .... allow them to export. (I assume there is a good reason why they want to export live stock and not carcasses.) What other means do they have for transporting the animals: - Airplane tickets .... who is going to pay? - Land transport .... on a train / truck for 3 weeks or more travelling through Africa? I am sure regulations can ensure that food / water and medical help is available on the ship.	Louis	Gauteng

	2025-08-01 15:29:08	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	I object to the draft regulations on live animal export by sea. Regulating instead of banning is ineffective because welfare harms in live export—stress, injury, disease—are systemic and cannot be fixed by incremental rules. No independent oversight: Government-appointed monitors create a conflict of interest and undermine credibility. No jurisdiction post-shipment: Once ships leave South African waters, animals fall under weaker foreign laws. Economic claims contested: The claimed benefits are overstated; mainly large commercial exporters profit, not small-scale farmers. Global precedent favors bans: Countries like New Zealand and the UK have banned live export entirely, recognizing that regulations do not prevent suffering. This draft does not protect animal welfare. The only ethical and effective solution is a full ban on live export.	ANCOIS	Mpumalanga	self-employed
	2025-08-01 15:30:49	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	I would want to ban it completely, but if that is not possible, then please pass regulations to improve the situation	Hanli	Western Cape	self-employed
	2025-08-02 00:27:36	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Why export live animals in disgusting cruel conditions, why can't they rather export already processed meat using cold storage?? Why is this barbaric primitive means of exporting meat still being used??? No live animals should be exported.	Janine	Eastern Cape	retired
	2025-08-02 08:58:53	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Live animals should NOT be exported be sea. This practice is barbaric and savage. Animals have emotions and feelings and any man who has a bit of empathy will know this. Cruelty cannot be condoned for the end dollar. STOP LIVE EXPORTS NOW	Danielle	Gauteng	retired
	2025-08-02 23:54:15	Yes I do	Yes I do	Yes I do	Animal Welfare	Not fully	It should completely be banned because loop holes will be found to still do whatever they want - bribes, etc. The government doesn't even care about the people in SA, even more so about animals! 	2025-08-05 07:00:18	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	There is no regulation that can prevent the cruelty of transporting live animals for extended journeys by sea. I understand that farmers rely on this export and that it is good for the South African economy but we cannot turn a blind eye to the inhumane experience for the animals. This has to stop. If the whole world refuses to export live animals to these countries, they will have to adapt their requirements and animals will be spared this harrowing suffering.	Liesl	Eastern Cape	self-employed
	2025-08-05 07:04:07	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	It's outright cruelty to transport live animals in appalling conditions for lengthy periods at sea.	Sharon	Western Cape

	2025-08-05 07:04:40	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	A barbaric practice which has no place, moreso in an age where sentience of animals is not disputed. There can be NO justification for this.	Caroline	Western Cape	self-employed
	2025-08-05 07:05:32	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Every year, millions of animals endure horrific journeys on live export ships—crammed into overcrowded, filthy conditions, often without adequate food, water, or ventilation. These long voyages, lasting days or even weeks, expose animals to extreme heat, stress, disease, and death. Many collapse, suffer injuries, or perish before reaching their destination. Those who survive face slaughter upon arrival, making their suffering all the more senseless. Live animal transport by sea is a cruel, outdated practice driven by profit, not necessity. It's time for change change—ban live exports once and for all!	Evi		business owner

	2025-08-05 07:28:11	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Sadly where there are countries with limited resources and lack of agricultural resources there will be a demand for food. Live animals versus slaughtered and packaged or processed animals appears to be the issue here. Most animals that are shipped to Middle East countries will be used for slaughter and food. Why the need to ship live is purely economics and greed in my understanding. It's cheaper to send a live animal than a processed packed animal. Firstly the industry of food safety and processing can be regulated and managed properly and also gives jobs to South Africans. Secondly the value added to the economy if vastly improved by banning live animal export and rather creating a framework for processed meat. Thirdly The cruelty is unbearable and should be outlawed for this alone.	Neil		
	2025-08-05 07:28:25	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	The proposed regulations serve to legitimise an abhorrent practice instead of recognising that no amount of regulation can make it right. The transport of live animals is fundamentally cruel, forcing animals who are stressed, injured and frightened by confined conditions into vessels for weeks on end with death as the only outcome. If animals are to be killed in any case slaughter in South Africa is a better business practice and less cruel. South Africa can employ local workers to do the processing of the animals, creating jobs. Businesses can profitably, safely and less cruelly process the meat for consumption under better food safety conditions. Animals exported alive in addition are reservoirs of diseases and can trigger potential health emergencies in other places.	Francine	Western Cape	retired

	2025-08-05 07:48:44	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	The export of live animals is fundamentally cruel and the regulations only serve to legitimise an industry that should not exist. However present legislation is inadequate and the reality is that many farmers and businesses support the export of live animals. Any improvements in the welfare of animals destined for slaughter are important and the transport of such animals should be closely regulated. However lack of capacity and motivation will surely prevent the proper implementation of such regulations. The reality is that South Africa will continue to export animals under abhorrent conditions and lacks the moral and ethical foundation to ban this export. The saddest part is that South Africa could create an ethical, less cruel and economically profitable meat processing industry, employing many people and businesses.	Francine	Western Cape	
	2025-08-05 07:50:40	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Why would you export live animals ? If it's for food then why not send pre packed and sealed food. 	2025-08-05 10:26:27	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	I tried reading the 21-page proposed regulations document... it reads like a primary school essay! It is vague on many vital issues. Looking at the state of our ports, the state of many international so-called 'sea worthy' vessels, the mental capacity of the current government ministers... I doubt VERY much any of the proposed regulations will be adhered to, let alone enforced - whether in RSA or onboard. It is a known fact that many destination countries do not respect animals - alive or dead! This topic is huge. It calls for 'traditions' and religions to adjust with the times. If Rabbi's can call for and agreed on the banning of live animal exports, way back in 2017, so can the Imam's in 2025. With so many countries having banned this barbaric practice, it will be highly beneficial for South Africa to do the same (especially now, when our reputation is at such a low!) It is time to change old habits and old ways of doing things. It is think beyond ourselves and to include all living, feeling, breathing (sentient) beings in welfare practices. (* These laws need to extend to domestic animals as well, the goats, cows, donkeys, horses - besides cats and dogs - who live deplorable lives in the townships throughout RSA. Decent legal consequences (i.e. jail time and heavy fines, including ownership-bans) must be enforced rigorously by our courts of law). Thank you.	Jean	Western Cape	self-employed

	2025-08-05 17:22:59	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	I am.opposed to practices that cause trauma to animals. Export by sea results in the inhumane handling of animals in overcrowded environments without careful temperature regulation. Extreme stress and sicknesses occur and animals are often cruelly treated especially during the embarking and often worse, disembarking processes. Access to vetinary care is limited. Clean food and water and sanitation are grave concerns. Mass disasters like fires, resulting in more animal deaths also occur.	JUSTINE	Eastern Cape	employed individual

	2025-08-05 18:51:43	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	There is no justifiable purpose for the export of live animals by sea. The exports are to the same destinations year after year. If they are not able to sustain animals in those locations, then by it's very nature it's animal cruelty sending new animals there over and over. Should these countries require animal products, South Africa is more than capable of slaughtering them here and supplying the products via cold chain or processed items. We've seen year after year the exporters show little to no regard to the animals being exported. Crammed into tiny spaces, often standing on dead carcasses of animals that have perished from malnutrition or stress during the voyage. Remember that we're not talking about a few animals here. They are crammed in to the gills. I have zero faith in our government's ability to draft regulations with the wellbeing of the animals at the core of the matter, and even less in them ensuring the enforcement of good regulations. We know that the Chinese and Japanese are plundering our coastal waters. Strip-mining our fishing grounds in alarming quantities, and absolutely nothing gets done about it. The Navy hides in Simonstown along with the "Fisheries protection vessels". Start enforcing that and I'll gain a lot of lost respect back, but until then I have no faith in the government to serve the people and the country.	Benjamin	Western Cape	employed individual

	2025-08-06 08:24:33	No I do not	No I do not	Yes I do	Animal Welfare	Not fully	These regulations fail to address the fundamental cruelty of the trade and instead seek to normalise a practice that is inherently inhumane and ethically indefensible. Every year, thousands of animals are loaded onto ships and subjected to long, stressful journeys that expose them to severe suffering. Motion sickness, injury, extreme heat, thirst, and fear are the norm — not the exception — aboard livestock vessels. These are sentient beings, not commodities, and no regulation can eliminate the suffering that is hardwired into this method of transport. The proposed system lacks transparency and independence. Appointing departmental monitors introduces a serious conflict of interest, making any assurance of animal welfare deeply questionable. Furthermore, once animals leave South African waters, they fall into jurisdictions with significantly lower (and often nonexistent) welfare standards, removing any meaningful protection. Instead of legitimising and perpetuating this cruel trade, South Africa should take a stand for animal welfare and environmental sustainability by banning the export of live animals by sea altogether. We have the capacity to lead with compassion — let us choose that path. I urge you to listen to the voices of the public and the more than 50 animal welfare organisations who have already called for an end to this practice.	Chavonne	Western Cape	business owner

	2025-08-06 09:54:42	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Live animal export by sea is extremely inhumane. This practice ensures that suffering is an inevitable consequence. Once animals are loaded onto vessels, they are subjected to prolonged journeys marked by severe stress, motion sickness, physical injury, dehydration, and the constant threat of death. The environment on board is often horrific—animals are confined in overcrowded conditions with limited ventilation, standing in their waste, and exposed to dangerously high levels of ammonia. Even before reaching the ship, many animals are transported over long distances while unfit to travel, enduring additional trauma. Once at sea, there is no independent oversight to ensure compliance with welfare standards. With only government-appointed monitors – who are not impartial – on board, any regulations in place become effectively unenforceable. Tragically, the suffering doesn't end when the journey does. In many of the destination countries, animals are subjected to brutal slaughter practices, often without stunning or in unregulated backyard operations, where South African welfare laws no longer apply. 	2025-08-06 13:42:22	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	To The Government of South Africa: "Every year, thousands of animals are shipped from South Africa to foreign countries, in conditions that cause immense suffering, only to be slaughtered at their destination. Globally, there have been instances where animals have died on board these vessels. This was highlighted in 2024 when the 'Al Kuwait" vessel, which was on its way from Brazil to Iraq, docked in Cape Town in February causing a city-wide stink that highlighted the plight of the estimated 19 000 cattle on board. Inspectors from the NSPCA boarded the vessel to assess the condition of the animals. According to the NSPCA, the smell was caused by the conditions the livestock had endured, having spent two and a half weeks on board, with a build-up of faeces and ammonia. Several animals had to be euthanised due to injuries before the ship departed for the next leg of its journey. Many other countries have already outlawed this barbaric practice, for example New Zealand, Brazil, and the UK. Australia has also recently legislated a ban on live export, to be phased in by 2028. South Africa needs to follow this example and STOP putting profits before compassion!" https://www.change.org/p/ban-live-animal-export-by-sea Please do finally the right thing and stop now this terrible horror and unimaginable for any normal person cruelty!! P.S. Please watch this movies below! https://www.youtube.com/watch?v=uRE_UjxEO04 https://www.youtube.com/watch?v=OOi7-Erm7q0&t=11s "Cape Town cattle highlight awful conditions on livestock ships": https://www.bbc.com/news/world-africa-68351772 https://animalsaustralia.org/our-work/live-export/live-export-ship-mid-journey-exposed/ https://nspca.co.za/another-tragedy-for-south-african-sheep/# https://stopliveexport.co.za/	Hanna	Outside SA	retired

	2025-08-06 14:50:20	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	If live animals are exported just to be killed on arrival it makes no sense at all. Every religious group can send people to where the animals are and slaughter them there, according to their tradition and believes and send the meat to their home country. Why must the animals suffer before they are being slaughtered!	Pia	Western Cape	retired
	2025-08-06 14:50:29	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	As with most issues, they are not simple. While I do not condone the transport of animals by sea, there are financial ramifications to this opinion which may have an impact on all of us. Similarly, flying the animals, while faster, has a fossil fuel cost that also needs to be factored in. Rigourous discussion is needed to look at welfare, cost, alternatives, etc. The ships may be in international waters but are still sailing under a country's flag and need to be held accountable for animal welfare throughout the journey.	Claire	Gauteng	employed individual

	2025-08-06 14:55:57	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	It is a shame that animals should be transported between countries. I suppose it is inevitable. If they are transported just be slaughtered in the other country they can rather be slaughtered and transported as meat. The voyage should be as direct fast as possible without stops at other ports making the trip longer. The animals should be placed in compartments so that mass trampling cannot happen, well ventilated and cleaned daily compartments. They are traumatized and loose weight and their immune systems get comprimised from the environment and stress.	Felicity	Gauteng	retired
	2025-08-06 15:01:41	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Anyone with half a brain cell would agree that these ships constitute EXTREME animal cruelty. The only moral and decent move would be an outright ban of these ships. However, morals and decency seem to be of little value to the SA government. In fact, most decisions seem to be made in the hope of bringing about the MOST harm and injustice possible in the name of greed.	Tracy	Gauteng	business owner

	2025-08-06 15:29:51	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	At its core, live animal export by sea is not a practice that can be fixed through regulation. No matter how stringent the rules, the systemic cruelty inherent in the trade cannot be eliminated. Attempts to regulate the process serve only to legitimise what is fundamentally an unjust and unnecessary industry. Rather than trying to reform the irredeemable, South Africa must move toward a complete and permanent ban.	Sanet	Gauteng	employed individual

	2025-08-07 20:49:44	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Stop the Cruelty: No Live Animal Exports from South Africa Every year, thousands of living South African animals are shipped across oceans in cramped, overheated, and filthy conditions. Onboard, they endure extreme stress, dehydration, disease, and even death. In one 2020 shipment, over 50,000 sheep were packed onto a ship bound for the Middle East — many suffered in sweltering heat, with high ammonia levels burning their eyes and lungs. These voyages often last over two weeks. While official mortality rates are between 0.5% and 2%, this still means hundreds or thousands of animals die en route. Those who survive often arrive injured, ill, or barely alive. The crowded conditions also create a breeding ground for dangerous pathogens like E. coli and Salmonella, posing public health risks. Globally, countries like the UK and New Zealand are banning live animal exports because the cruelty is undeniable. South Africa, instead of leading with compassion, risks falling behind damaging its global image. The better solution is to export meat, not live animals. Processing animals locally creates jobs, ensures humane treatment, and boosts our economy without the cruelty. Meat exports are more sustainable, ethical, and safe. Many animals are also mistreated in the country of landing due to lax or no animal welfare regulations. Lets lift the curtain on the charade of "proposed regulations" that are only a cover for this barbaric practice to continue. South Africa must do the right thing. Protect our reputation. End live animal exports. Show compassion	Dean		business owner

	2025-08-09 16:26:31	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	If they could speak, they'd beg us not to send them STOP the cruelty – choose humane trade Long sea voyages for live animals mean days or weeks of heat, overcrowding, injury, and suffering. . We don't need to choose between compassion and the economy. There's a better way: Slaughter locally under strict humane standards (including halal and religious-compliant facilities). Export chilled or frozen meat — creating jobs here, keeping profits in our communities, and protecting animal welfare. Follow global leaders like New Zealand and the UK who have moved away from live animal exports entirely. No regulation can make live export by sea truly humane. Let's ban it, invest in ethical alternatives, and show the world that South Africa can lead with compassion and economic strength.	Mariëtta	Western Cape	retired

	2025-08-13 08:54:52	Yes I do	No I do not	Yes I do	Animal Welfare	Not fully	Every year, countless animals are loaded onto ships for weeks-long journeys across the ocean. They endure sweltering heat, cramped spaces, injuries from rough seas, and the constant stress of confinement. Many never make it to the other side alive. Those that do often arrive weak, dehydrated, and suffering. This is not an accident. It is the reality of live animal exports by sea. No matter how much we try to regulate it, you cannot make such voyages humane. The animals pay the price every time. South Africa has the chance to choose compassion over cruelty. By ending live exports, we can protect animals from needless suffering and still support farmers by exporting processed meat instead. Let's take pride in being a nation that leads with humanity. Ban live animal exports by sea.	Jarred	KwaZulu-Natal	employed individual

	2025-08-13 09:54:04	Yes I do	Yes I do	Yes I do	Animal Welfare	Not fully	This is a difficult one to comment on, as there will probably be farmers who suffer some income stream loss if trading is stopped. But from what we can see animals are indeed suffering in this process. I'm not an economist, I'm not fully aware of the financial impacts, but as a citizen of SA, I'd like to see cruelty to animals stop. If the financial impacts are visible perhaps, the public could comment better and more clearly? But as for my opinion, I'd like the live exports by sea to stop. Or, indeed, actually and in reality, be regulated better.	Le-Roux	Gauteng	employed individual
	2025-08-13 10:09:57	Yes I do	Yes I do	Yes I do	Animal Welfare	Not fully	I CANNOT ACCEPT THE DEPLORABLE TRANSPORT OF ANIMALS UNDER INHUMANE CONDITIONS. IT IS OUR RESPONSIBILITY AS HUMAN BEINGS TO TAKE GOOD CARE OF THE ANIMALS ON OUR PLANET	CAROL	Western Cape	employed individual

	2025-08-05 09:10:37	Yes I do	Yes I do	Yes I do	Moral and Ethical Implications	Not fully	The current system lacks credible oversight. By appointing its own monitors, the Department of Agriculture introduces a clear conflict of interest that undermines the credibility of any animal welfare claims. Once animals leave South African waters, they are beyond the reach of our legal protections. This is particularly concerning given that many importing countries—such as Kuwait, Saudi Arabia, the UAE, and Mauritius—have animal welfare standards that fall well below those of South Africa. Live export by sea also poses serious risks to public health. The mass movement of animals across borders significantly heightens the risk of zoonotic disease transmission. High-stress conditions, close confinement, and poor sanitation on board create an ideal breeding ground for outbreaks. These risks are not just theoretical—global health authorities have repeatedly warned that such practices increase the likelihood of diseases that can spread from animals to humans, with potentially devastating consequences. The live export trade represents a moral failure. It prioritises profit over the wellbeing of sentient beings, turning a blind eye to their suffering for the sake of economic gain. As other countries—such as New Zealand, Brazil, Germany, the UK, and Australia—have already demonstrated, it is both possible and necessary to phase out or completely ban this cruel practice. These nations are setting a clear moral and scientific precedent that South Africa has every reason to follow. Despite claims that live export supports small-scale or emerging farmers, the reality is starkly different. The vast majority of animals exported are owned by large, commercial farming operations. The narrative that the trade boosts rural development or spreads economic benefit is misleading. Moreover, South Africa's continued participation in live animal export comes at a reputational cost, undermining the country's credibility on animal welfare and ethical farming practices.	Nadia	Western Cape	unemployed individual
	2025-08-05 11:05:04	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	From an ethical standpoint, sentient beings have a right to live without unnecessary suffering. Live animal export treats animals as commodities, disregarding their intrinsic value and welfare. Decomposing carcasses, waste buildup, and disease outbreaks during transport can pose risks to marine ecosystems and human health. As stewards of animals, humans have a moral obligation to protect their welfare. Subjecting them to such harsh conditions for economic gain is widely seen as unethical. Exporting chilled or frozen meat instead of live animals meets consumer needs while significantly reducing animal suffering. Continuing live exports despite alternatives is morally questionable.	Reta	Gauteng	employed individual
	2025-08-05 12:09:37	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	We are morally obligared to ensure that we minimize physical and mental harm to all animals we keep and that we eat. This moral obligation includes ensuring that those animals passing from our care into the hands of foreign jurisdiction are not then subjected to lesser standards.	Margaret	Western Cape	retired

	2025-08-05 22:57:59	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Live animal export is one of the most cruel practices in the entire animal agricultural industry. It does not justify the economic and profit-driven reasons behind it. Besides suffering at sea, animals suffer horrendously when they reach their destination, especially in Muslim countries were halal regulations prevail and where animal welfare issues are not even on the statute books. This horrible practice must end. South Africa, set an example.... DO THE RIGHT THING. END LIVE ANIMAL EXPORTS.	Lionel	Outside SA	retired
	2025-08-06 00:07:24	Yes I do	Yes I do	Yes I do	Moral and Ethical Implications	Not fully	It is such a cruel practise & soo morally wrong. The conditions are appalling.	Rosanne	Gauteng	employed individual

	2025-08-06 14:40:57	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Although the animals will not be transported to be kept as pets, but to be slaughtered it does not mean that inhuman principals and methods should prevail . If regulations can be implemented and policed to ensure the save and as close to comfortable to the animals it could be considered as an option. The flip side is unfortunately that greed is always the downfall of any reasoning when profits are involved. Against the obvious GREED i do without agree that sea transportation for herds of animals should never be allowed. If it is about food security, South Africa can create a lot of jobs and export the meat.	Piet	Western Cape	employed individual
	2025-08-06 15:07:05	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Extremely cruel. Please do not export live animals.	Robyn		
	2025-08-06 15:13:26	Yes I do	Yes I do	No I do not	Moral and Ethical Implications	Not fully	In this day and age of economic chaos and the lack of accountability and forward thinking of the Government (yes the GNU), this is an absolute waste of time and effort. Yes, man was tasked to rule over the animals but this is pushing the limits. Uplift the residents of SA, put their needs first, that is at least what you as a politician is supposed to do. remember you are in your position at the behest of the citizens, not the other way around. And let's not talk about the DA and going for easy wins, DA and John, you are as useful as Kortbroek of old. Time to catch a wake up and do what you were elected to do by the citizens.	Deon	Limpopo	employed individual
	2025-08-06 16:22:53	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Sadly the real root of the problem seems to me to lie at the recipient end of the problem. I think the WTO should make a world wide regulation banning transport of live animals. The end-user should have the right to choose how animals they receive should be slaughtered, but not the right to insist that the animals arrive alive. If they are to be transported live then transport conditions need to change drastically to ensure that it is humane. If this is not an international regulation then animals will be sourced from other suppliers and the cause is still not addressed.	megan	Western Cape	retired

	2025-08-09 14:14:57	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Exports are important for our economy. Moral & Ethical behavior defines how advanced is a civilization. Complicity in barbarism is morally and ethically wrong. Standards must be agreed and adhered. Stressed out animals for slaughter spoils the tenderness and tastiness of the product. The SPCA and other animal rights organizations should be involved in discussions to form Standards.	David	Western Cape	retired
	2025-08-12 11:21:25	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	It is dire to see what humans do to animals, yet they own pets and raise children with the consciousness based on the murdering of innocent animals. I believe that animals have legs and legs are meant for land, not sea. There must be other things that can be exported and imported to alleviate the peoples hunger. Meat is over eaten because people cannot control their tongues. Looking at the research on the planetary boundaries, animal farming in itself has put us in the danger zone of destroying this planet, one step of securing the future generations health and wealth is to at least stop the export and import of animals. Rather just use the meat in this country as a first step. There are many positives to stopping meat imports and exports: - hygiene - less spread of diseases - less chemical contaminated animals - a more cleaner ocean It will also have a positive fed back as the consciousness of the animal is transferred to the eater of that meat. Imagine eating the meat of an animal that was held in a torturous environment, where it was constantly in fear and its own filth. This is the same consciousnesses that will be imbibed in the eater. No wonder why so many of the South Africans (rich and poor alike) act like animals and are always tormented by living in their own filth with so many mental health problems. It is because they have not learned self discipline to control their tongues and literally eat fear, disgust and torture on a daily basis. This policy is one step in the right direction, but still lots have to be done.	kirodh	Western Cape	employed individual
	2025-08-12 12:32:30	Yes I do	No I do not	Yes I do	Moral and Ethical Implications	Not fully	Ban all live animal export, whether by sea or by land or whatever. In fact ban all animal agriculture...	roger		self-employed

	2025-08-05 09:04:41	Yes I do	No I do not	No I do not	Accountability and Oversight	Not fully	I urge the Department of Agriculture to appoint independent accountability and oversight measures and to only export to countries which uphold animal welfare standards.	Stephan	Western Cape	self-employed
	2025-08-05 09:08:30	Yes I do	Yes I do	No I do not	Accountability and Oversight	Not fully	I don't think banning the exporting of animals by sea is going to solve the problem. The people and organisations causing the suffering probably neglect animal welfare at every step of the value chain. We should rather regulate who we export to and the minimum standards they need to adhere to. If we ban it completely, they will simply export from somewhere else, and at this stage, our country can't afford to lose more export potential.	Heinrich	Gauteng	employed individual
	2025-08-05 09:12:29	No I do not	No I do not	Yes I do	Accountability and Oversight	Not fully	THE ANC CAN LEARN FROM THE AUSTRALIAN GOVERNMENT THEY DONT CARE ABOUT THE PEOPLE ,WHY CARE ABOUT ANIMALS	Lidwina	Gauteng	retired

	2025-08-05 11:40:43	Yes I do	No I do not	Yes I do	Accountability and Oversight	Not fully	The documentaries of the suffering on live animals transported by sea are proof enough that the animals all suffer on board a vessel. The description of what should be done and that oversight is necessary, is evidence that this treatment of live animals in inhumane. I have no doubt that the carrying out of these controls are not done or are done in the lowest sense of the word, after all they are "just animals". mostly on their way to be slaughtered. The idea of transporting live animals by sea is already a cause for concern for the wellbeing of the creatures. My absolute first choice would be a total ban on the transport of live animals by sea, only to be slaughtered on the other side for want of personal choice. The animals should be slaughtered on land, packaged and then shipped out. We in South Africa often see imported meat that was packaged in the land of origin, which is the right and humane thing to do. Please stop this brutal trade!!	Don	Western Cape	employed individual

	2025-08-05 21:21:29	Yes I do	No I do not	Yes I do	Accountability and Oversight	Not fully	My main concern regarding this matter is the accountability of the countries involved and the efficiency of the various ports and port authorities. Why can't the livestock be slaughtered in the countries of departure. Thereby creating jobs and exporting the carcasses to the countries intended for. The various countries can appoint authoritarian to oversee that the correct slaughter prosedures are following e.g. halal, kosher etc. Also adhering to strick health and regularity processes. This to me would be more humane. Us as farmers need the export of livestock and produce to ensure a sustainable farming livelihood. Our harbours are in such disarray how on earth can we even think of overloading them with living creatures. Sort out one problem before creating another.	Joany	Gauteng	retired

	2025-08-06 12:25:50	Yes I do	Yes I do	No I do not	Accountability and Oversight	Not fully	There must be countries that are transporting live livestock humanely and we must be guided by these standards. We need to be competitive in this market by wuthin reason.	ANDY	Gauteng	business owner
	2025-08-06 13:12:00	Yes I do	No I do not	Yes I do	Accountability and Oversight	Not fully	There should only be one exception to the ban - transport of of large live indigenous threatened animal species as a contribution to breeding of a reserve population in the event of a wild population crash or the need to conserve genetic diversity	Jone	KwaZulu-Natal	retired
	2025-08-06 13:24:40	No I do not	Yes I do	No I do not	Accountability and Oversight	Not fully	There is no other method, except for flying which is outrageously expensive, that could be used to export live stock. The main key is that exporters need to ensure that proper arrangements are made before the time, to ensure that the live stock is well looked after whilst on the vessels. With regards to the rocking of the vessel causing a problem is not true as many people use the same transport on smaller vessels without having motion sicknesses. It is only in extreme cases where such sicknesses are experienced. In total I do not think it is inhumane to transport live stock in this manner.	Frank	Free State	retired
	2025-08-06 13:46:40	Yes I do	Yes I do	No I do not	Accountability and Oversight	Not fully	South Africa needs the export of livestock. 	2025-08-25 20:12:42	No I do not	Yes I do	No I do not	Accountability and Oversight	Not fully	The proposed legislation goes way beyond the existing legal requirements and thus practices on board. Could it go further, yes it could. I disagree with the argument, that RSA regulations cannot be enforced on the vessel at sea. - It can be done with the use of remote observation of condition on board, possible with the use of AI, and managed by RSA. - The licence RSA gives to vessels has to be tied to strict regulations (oversight = see above). Vessel operators not complying will not be given any further animals to transport. No animals no business = great inventive.	Jürg	Western Cape	retired

	2025-08-06 13:11:35	No I do not	No I do not	No I do not	Other	Not fully	There is one thing that must be made clear to these animal rights groups, once these animals are sold to whomever whether an individual or a company, it is the new owners prerogative as to how the animals are to be transported. It has nothing to do with the SA Government once these animals on loaded onto the ship, it is the new owners responsibility. The Animal Right Organisation must deal with the new owner of these animals. Are these groups suggesting these animals are transported overland or by aircraft to destination in the Middle East or Mauritius. I'd would like to know from the Animal Rights Organisations just how many of these animals would survive at the end of a road trip loaded into the haul trailers going through Africa and how much it would cost for such a journey to the Middle East. It is obvious that the quickest form of transport would be by air, I guess that no thought has been given of ether the cost or in fact one could get say 500 animals onto an aircraft. Then these animals possibly being air sick, mess from the urine and faeces. Then there is a further problem with the animals moving or shift about which would make the aircraft to unstable to fly. So again, this is the Animal Rights Organisations job to find a solution and not that of the SA Governments.	Alan	KwaZulu-Natal	retired
	2025-08-06 15:58:51	Yes I do	No I do not	Yes I do	Other	Not fully	My biggest concern is that in a country with an economy that is failing more and more on a daily basis, prohibiting these exports will negatively affect the farmers and the workers and we can not afford any more job losses as it is. I absolutely agree that the inhumane conditions is unacceptable, but what is the alternative to keep the economy going?	Millie	Mpumalanga	employed individual
	2025-08-06 15:59:40	No I do not	Yes I do	No I do not	Other	Not fully	This is further cruelty than that suffered already which we have come to accept.	Mike	Gauteng	self-employed
	2025-08-07 11:46:04	Yes I do	No I do not	No I do not	Other	Not fully	The export of live animals is a valuble source of revenue for the economy . The way that animals are transported however is less than ideal . Cramming animals into holds with no space to move , poor lighting etc is cruel . I believe that humane transportation can be achieved , but this means less animals , more space and less profit . There needs to be a healthy balance between economics and aniimal welfare . Outright ban is not the answer	Grant	Western Cape	employed individual
	2025-08-10 10:08:51	Yes I do	No I do not	Yes I do	Other	Not fully	All indications from the internet are that shipping meat instead of live animals is cheaper. The regulations should only be an interim measure until the practice of shipping live animals is stopped in about 3 or 4 years. Livestock for slaughtering should only be shipped by sea if the importer of the destination country can guarantee and prove that every animal is stunned before being killed.	Hermann	Gauteng	retired
	2025-08-13 09:47:14	Yes I do	No I do not	Yes I do	Other	Not fully	Why are we exporting and then only to import meat.	Lyn		
	2025-08-13 10:08:27	No I do not	No I do not	No I do not	Other	Not fully	I am against cruetlt to any living creater. Its a source of Income for our struggling economy. To find a better way of exports the products	Andal Nalini	Western Cape	self-employed
	2025-08-13 11:26:47	Yes I do	No I do not	Yes I do	Other	Not fully	There is really no discussion required considering very dark forces at work and what they do however I petition your office, Minister, to take decisive action on the following: Phase Out Live Export by Sea: Implement a legislated roadmap to phase out live animal exports by sea, shifting to a higher-value, more humane "boxed meat" trade. Strengthen and Harmonise Animal Welfare Legislation: Review and strengthen South Africa's farmed animal welfare laws, including banning cruel practices like barren battery cages and sow stalls, and mandating transparent oversight in slaughterhouses. Ensure Ethical Sourcing and Trade: Implement strict import and export regulations to ensure all livestock and meat products adhere to the highest animal welfare standards, preventing South Africa from facilitating regulatory arbitrage. Promote Humane Practices: Work with all stakeholders, including religious communities, to ensure livestock practices align with core compassionate principles. Enforce Regulations and Sanction Offenders: Establish robust mechanisms for proactive enforcement of South African animal welfare regulations across the entire supply chain. This must include clear and swift penalties and legal action against any entities—exporters, importers, or transporters—found in violation of these standards. Invest in Humane Alternatives: Support and incentivise technologies and farming practices, like Precision Livestock Farming, that genuinely improve animal welfare.	Dirk	Western Cape	employed individual
	2025-08-14 09:12:17	Yes I do	No I do not	Yes I do	Other	Not fully	Even if we have the best regulations, we are unable to enforce any of these. The country's history of implementation of Laws and regulations are shocking and therefore to try an coat the issue with a sauce of regulatory control is ineffective to prevent bio-security risks and inhumane treatment of animals. As long as the trade continues, ships will enter our ports that bring bio-security risks to our ports. The regulations will only cause these ships to dump the bio security risks in our regional waters before entering the port with dire consequences to our environment similar to what the oil carriers do when they flush their oil tankers in our territorial waters. These countries may not have the agricultural ability now to have grazing for cattle and sheep, but if they follow the desalination technology they will be able to improve this. Furthermore they can buy feed and farm animals in their own countries using feedlots. It is just easier and cheaper for them to buy from other countries. Let us not collaborate in the inhumane treatment of animals purely because it is cheaper. The problem is that our society and government has been morally degraded due to the unethical behaviour, looting, involvement in crime, corruption etc. and therefore they have an attitude to turn a blind eye. They will choose not to enforce and thereby become complicit. DIRCO has already been hijacked by the Middle-east and are therefore not acting in the interest of ordinary South Africans. It is a great way of committing money laundering between SA and the middle east countries and to promote terrorist financing. Similar to the illegal Gold trade that the government is currently enforcing by eliminating competitors of role players who are complicit in the illegal stripping of gold from the country. The sudden spate of arrests of Zama Zama is not to protect the people, it is to eliminate their competition. It is similar to a targeted attack on rival taxi owners by impounding.	Hanli		
	2025-08-18 07:23:35	No I do not	No I do not	Yes I do	Other	Not fully	Why are we exporting live animals when we can process the meat in South Africa, creating economic wealth and jobs for people. What is the actual difference between processed meat from South Africa and doing it in the destination country? Money. We need to build South Africa for South Africa. Put our own people and country first	Adam	Mpumalanga	business owner
	2025-08-18 12:21:34	No I do not	No I do not	No I do not	Other	Not fully	My concern is the practicality of the control thereof. 	2025-08-15 08:33:01	No I do not	No I do not	No I do not	Regulatory Limitations	Not fully	We are in the process of setting up a snail farm to export to Cyprus. The red tape involved is huge and the conditions to export are strictly controlled. The snails would go to Cyprus by sea in a refrigerated container - so not dead and frozen but in a hibernation state in a controlled temperature. Although I don't agree with state of livestock being exported by sea, the complete ban would affect our ethical business. I feel that live stock that suffer from motion sickness would feel the same on a back of a truck so banning export by sea wouldn't stop land travel. If more thought was put into the process by those in the industry a solution could be found for a safer more humane way to equip the vessels that being used for export as well as constant care by an external party while in transit.	Wendy	Eastern Cape	employed individual

	2025-08-06 13:18:56	Yes I do	No I do not	No I do not	No concern	Not fully	I am at a loss on the value of this questionaire. Although I am opposed to cruelty to & mishandling of animals in general, I fail to see the value or aim of this petition. If it is to stop export of live animals altogether, I must oppose the effort . To cut vital export revenue, is economic suicide. There are much more urgent human suffering in SA that must be attended to. We cannot even fix that !! I think our focus are completely scew & mis-placed on this matter. If the hardship of animals are causing economic loss or the slauhtering & freezing & transporting of frozen meat is more expensive than the loss of vaue of "suffering" animals, then the "economics" will sort out the mess. I am NOT saying to cast a blind eye to the problem - I stress realism in solving the problem.	Frikkie	Western Cape	retired

	2025-08-14 15:57:16	No I do not	Yes I do	No I do not	No concern	Not fully	Dit gaan net meer armoede in die landbou gemeenskap veroorsaak. Boere kry klaar swaar, en meeste van hierdie 'diereregte' groepe kyk vas in hul eie vooropgestelde idees. Daar is geen bewyse dat hulle swaarkry nie	Philip	Northern Cape	employed individual
	2025-08-14 22:13:29	No I do not	No I do not	No I do not	No concern	Not fully	I dont care. Live stock are food nothing more nothing less. All this hype about animal wellbeing comes from people who love animals more than they love people and they are unable to understand that animals are just food, nobody cares about how an animal felt during to process that it is turned into a chop.	Dylan	Free State

	2025-08-06 09:54:13	Yes I do	No I do not	Yes I do	Public Health and Biosecurity	Not fully	I would like this practice to be fully banned. It's an unnecessary and cruel practice not unlike the slave trade, it's a bio hazard, and there's no way that people will be held accountable if they were in charge of regulations. It is also morally and ethically corrupt.	Eden	Western Cape	business owner
	2025-08-12 18:52:49	Yes I do	No I do not	No I do not	Public Health and Biosecurity	Not fully	I think the fact that the Exportation of Live Animals by Sea regulations speaks for a global issue on economic trade. A lot of South Africa's resources are often exploited by companies with better infrastructure and stakeholder positioning. There exists much advantage for export trade, esepcially one that can be founded on good ethics and public safety standards. That being said, it does not mean that the deployment of this act is right and just - it lacks proper structuring and consideration for the things that really matter. For example, revision and emphasis on strengthening South Africa's own internal disease management regulations could be key in more ethical trade practice, as well as gaining entry into more prominent economic markets.	Miguel	Western Cape	student
